EDUCATION

- **Bachelor of Engineering and Technology,** Alpha College of Engineering and Technology, Puducherry, Sep'15 – Jun'19

IT SKILLS

- AWS
- GCP
- Kubernetes
- Docker
- DevOps
- Linux
- Helm
- Terraform
- Argo CD
- Git

CORE COMPETENCIES

- Cloud Architecture Design
- Infrastructure Automation
- Security Best Practices
- Disaster Recovery Planning
- Performance Tuning
- Network Configuration Management
- Agile Methodologies
- Service Level Agreements (SLAs)
- Incident Management
- Cloud Deployment and Monitoring
- Application Migration

PERSONAL DETAILS

Address: Chennai, India
Date of Birth: 07th April 1997
Languages Known: English & Tamil

PROFILE SUMMARY

- Offering 6 years of DevOps experience in **Cloud Computing** & **Infrastructure Management** in **Healthcare** & **Tech Industries**
- DevOps Engineer at Netmeds, managing cloud environments and application deployments
- Expertise in cloud architecture, automation, and process optimization
- Led AWS to GCP migration, ensuring seamless transition and project success
- Strong leadership in cross-functional team collaboration to meet project goals
- Proficient in Kubernetes for scalable, resilient application deployments
- Experienced in all phases of Software Build & Release, including Development, Deployment, and Maintenance.
- Proficient in DevOps tools like ArgoCD, Docker, Kubernetes, and Git.
- Managed Build & Release with Docker, Cloud based CI/CD tools and Micro services.
- Facilitated Agile Scrum ceremonies and end-to-end project planning.
- Led DevOps architecture design and resolved integration issues.

WORK EXPERIENCE

DevOps Engineer | Netmeds.com | Chennai **Jun'22 – Present**

Key Result Areas:

- Administering 70+ EC2 instances, 300+ ECS Fargate containers, and 15+ RDS databases on AWS
- Leading AWS to GCP migration, including ECS to GKE, Cloud Build trigger setup, DB Migration, STS VPN setup, EC2 to VM migration.
- Managing AWS/GCP services (EC2, VM, Cloud, SQL, RDS, ECS, GKE, VPC, S3, Logging and Monitoring)
- Leading teams in automating and configuring IT solutions using DevOps platforms.
- Driving Build & Release processes with cloud based CI tools (Cloudbuild trigger in GCP, Codebuild in AWS, Azure DevOps) and DevOps tools (Kubernetes, Helmchart and ArgoCD).
- Applying Agile principles to enhance team performance.
- Managing automated deployments and optimizing performance through gap analysis.
- Supervising build and packaging processes for concurrent releases.

Achievements:

- Managed GKE clusters with 300+ Pods, deploying apps via Argo CD and Helm charts.
- Reduced cloud costs by **40%** through optimization and resource allocation.
- Streamlined deployment with automated CI/CD pipelines.

DevOps Engineer | Izetam Technologies **Mar'19 – Jun'22**

Key Result Areas:

- Managed, maintained, and troubleshot EC2 instances and AWS resources **(S3, IAM, VPC, R53, RDS, Load Balancer, Cloud Watch).**
- Built Docker images using Jenkins and ran containers on VMs
- Installed and configured middleware using tool (Ansible)
- Maintained and optimized CI/CD workflow for efficient deployment
- Design and create automated Build and Deployment processes.
- Maintain GIT Repositories, Handling Releases and Branching activities for GIT. Used Cloud Watch to Monitoring the Metrics
- Performed deployments to multiple environments like Dev, Test and Prod environment

Achievements:

- Reduced deployment times through automated CI/CD pipelines, enhancing the development lifecycle.
- Enhanced system reliability by implementing proactive monitoring solutions to identify and resolve issues.
- Recognized for exceptional cloud resource management, resulting in increased responsibilities.

CERTIFICATIONS

- GCP - Associate Cloud Engineer (Jul'24 – Jul'27)
- KCNA - Kubernetes and Cloud Native Associate (Mar'24 – Mar'27)
- CKA - Certified Kubernetes Administrator (Sep'24 – Sep'26)
