

Akshay Dhole

Key Skills	Comments
MBD	6 Years of good experience
MAAB/Mishra	6 Years of good experience
Code Generation	6 Years of good experience

Summary

An Embedded Developer & Tester engineer with 6+ years of experience in Model Based Design. A Creative thinker who is highly organized, analytical, enjoys solving problems and team oriented personality. Career Summary

- Total 6+ Years of experience in the automotive domain.
- 6+ Years of experience in MBD development and testing MIL/SIL.
- Good coordination and analytical skills, ability to grasp issues quickly and from action plans. Ability to work with a team
- in a positive and collaborative manner.

Experience

Sr. Software Engineer

KPIT Technologies Pvt Ltd • Pune, Maharashtra

02/2022 - Present

- Experienced Model Based Developer and Testing with over six years of experience in MATLAB. Excellent reputation for resolving problems and improving customer satisfaction.
- Worked on reverse engineering developed requirements from the Simulink model.
- Analyze the requirements thoroughly.
- Develop the model based on the received requirements.
- Worked closely with clients to understand the requirements and discuss ideas, problems and solutions. Implementation of required changes into the model in case of change in requirements.
- To generate code using Embedded Coder.
- Writing of Test cases based on received requirements.
- Verification and Validation using unit testing MIL/SIL testing.
- Generate Coverage reports for the model.
- Pass the model with MAAB and MISRA C Guidelines.

Model Design Engineer

AVI Worldwide Pvt Ltd • Navi Mumbai, Maharashtra

03/2019 - 01/2022

- The experience includes working on MATLAB - Model based development for AVI Worldwide Pvt. Ltd.
- Verification and validation using unit testing and MIL/SIL testing.
- Developed models are as per guidelines set by MAAB using model advisor tool.
- Creating the model as per client requirement, MIL, C code generation, MIL and SIL.

Engineer

Reflex Technologies Pvt Ltd • Navi Mumbai, Maharashtra

03/2018 - 02/2019

- Create high-level and low-level requirements for the project.
- Verification and validation using unit testing and MIL/SIL testing.
- To generate code using Embedded Coder.
- Generate Coverage reports for the model.
- To work on small activities related to the project.

Projects

Sensor and Actuators

- The purpose of Sensors and actuators are two essential components of smart systems that work together to respond to their environment. A sensor detects or measures physical properties such as temperature or pressure and converts them into signals that are transmitted to a controller.
- Worked on different features of Actuator Controls.
- Worked on prototype designing of resting position of Intake Air Throttle Valve.
- Developed features of diagnostics like OOR and CSERS as per customer requirements.
- Developed requirements from the Simulink model.
- Spend time in understanding the requirement of the client.
- Worked closely with the client to discuss various ideas/solutions and issues.
- Developed the model according to the requirement.
- Reviewed the work-product created by the team before delivery.

Adaptive Headlight System

- Purpose of this project is to design Adaptive Headlight System for Vehicle.
- Adaptive Headlight system is generally used in vehicle due to some drawbacks in Normal vehicle headlight such as when vehicle is taking turn that time for few second driver not able to the clear road.
- According to weather condition parking lights should on.
- While detect the slope focus will automatically adjust.
- Purpose of this project is to control the Light Distribution of the vehicle and improve Visibility. Contributed for software development and testing.

Delivery Assist

- Purpose of this project is to minimize the efforts and time for manual operations and to increase productivity. In Ordinary transit vehicle, Due to absence of delivery assist feature and Manual operation of all systems more time and efforts are utilized which reduces productivity. In lower visibility or night condition without Exterior lights Driver's safety is compromised. To eliminate existing defects from ordinary transit vehicle and increase productivity we have introduced delivery assist feature. Button start ignition, Automatic Cabin lights & Cargo compartment lights ON/OFF, Exterior lights, Power Windows, Power Mirror. Environment: MATLAB/Simulink.

Skills

MATLAB, SIMULINK, STATEFLOW, MIL/SIL, Agile, GitHub, AUTOSAR

Languages

English, Hindi, Marathi (Marāṭhī)

Education

Bachelor's of Engineering

Dr Daultrao Aher College of Engineering • Karad, Maharashtra • First Class.

05/2017

12th

Mahatma Basweshwar College of Arts, Commers and Science • Latur, Maharashtra

05/2012

- Second Class

Personal Details

Date of Birth : 2nd May 1995

Gender : Male

Material Status : Married

Nationality : Indian

Strengths

- Flexibility and Adaptability
- Time management
- Attention to Details
- Quality focused
- Organised

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge and behalf.
