EDUCATION

B. Tech
West Bengal University of
Technology

SKILLS

- Core java/Java 8
- Spring Boot
- Spring Data JPA
- Restful Web Services
- Microservices
- Spring Security
- JWT Token
- JSON
- MySQL
- Agile
- Postman
- Git/Github
- Debugging
- Spring MVC
- Maven
- Swagger
- Apache Kafka
- Spring Data Jpa
- Exception Handling
- Redis Cache
- SonarQube
- IntelliJ idea
- JUnit Testing
- AWS S3 , EC2

PROFILE

To utilize my 3.4 years of Java Development experience and strong skills in Spring MVC, Rest API, Spring Boot, MYSQL, Spring Security, web services, microservices, and object oriented programming to contribute to the development of scalable applications, excel in bug fixing, and advance my career in software development.

WORK EXPERIENCE

Rakuten Symphony

SEP 2021 - PRESENT

Java Backend Developer

Tech Stack : Java, Sql, SpringBoot ,Hibernate ,Git, AWS,Java8

- Proficient in advanced Java concepts, including **Java 8 features**, object-oriented programming (**OOP**), and **core Java**.
- Designed and developed responsive web applications, adhering to best practices and coding standards.
- Extensive experience in developing applications using **Spring MVC** architecture and utilizing **HTML/JSP** for front-end implementation.
- Demonstrated expertise in building various components of applications, such as controller layer, service layer, and repository layer.
- Well-versed in **Spring Boot** application development and adept at implementing microservices efficiently.
- Skilled in using Spring **Data JPA** for Hibernate implementation, ensuring efficient database operations and data management.
- Hands-on experience in developing and working with **microservices** and **RESTful webservices**.
- Implemented API security using **Spring Security** framework and **JWT token** for secure data transmission.
- Capable of handling **data validation** in Spring Boot applications using **Spring Validation** framework.
- Experienced in **integrating third-party APIs** for functionalities such as **OTP generation** and sending SMS & emails.
- Experienced in creating entity classes in Spring Boot, adhering to **ER diagram** specifications, and establishing necessary mappings for database operations.
- Experienced in **debugging** and troubleshooting issues within Spring Boot projects.
- Proficient in using **Git** and **GitHub** for version control and collaboration with team members.
- Skilled in utilizing **Java 8** features such as **Stream API**, **Optional classes**, and **Functional Interfaces** for efficient code implementation.
- Proficient in testing APIs using **Postman** and **Swagger**.

PROJECT DEMONSTRATION

PROJECT NAME -HOTELS.COM

DURATION-3.4 YEARS

DESIGNATION- JAVA BACKEND DEVELOPER

PROJECT DESCRIPTION

The Hotel Booking System project, developed for Hotels.com, introduces a user-centric feature enabling travelers to select their desired rooms and amenities during the booking process. By integrating room selection functionality, the system revolutionizes the user experience, granting customers autonomy and control over their stay. This enhancement ensures utmost comfort and satisfaction throughout the reservation process, as individuals can conveniently choose rooms that align with their preferences and requirements. With this innovative feature, Hotels.com empowers guests to tailor their travel experience, setting a new standard for customer-centric service in the hospitality industry.

- Developed and implemented entity classes in Spring Boot based on **ER diagrams**, ensuring proper mapping.
- Designed and implemented service layer modules, adhering to project requirements.
- Integrated **Spring MVC** to develop **RESTful APIs**, ensuring efficient communication.
- Implemented Spring Security and **JWT token** for securing APIs, safeguarding sensitive data.
- Utilized **Spring Validation** for data validation, ensuring data integrity.
- Leveraged **JPA Repository** for database operations, including pagination and sorting.
- Generated reports in **PDF format** to meet project needs.
- Integrated third-party APIs for **OTP generation**, SMS, and email services, enhancing functionality
- **Debugged** and resolved issues in the project, ensuring optimal performance.
- Collaborated with team members using **Git and GitHub** for version control and code management.
- Deployed **Java 8** features like Stream API and Optional classes for efficient code implementation.
- Conducted API testing using **Postman and Swagger**, ensuring functionality and performance.
- Prepared comprehensive **API documentation** for project reference and future maintenance.
- **Handled exceptions** effectively, ensuring robustness and reliability of the application.
- Leveraged **Java 8 features** such as **Stream API** for functional-style programming.
- Enhanced code readability and maintainability by adopting modern Java features. Created and executed API tests using **Postman** for functional testing and validation.
- Utilized **Swagger** for documenting and exploring RESTful APIs.
- Generated API documentation using tools like **Swagger UI** or custom documentation formats.
- Supported developers and stakeholders with clear and up-to-date **API documentation**.
- Implemented **exception handling** strategies to handle runtime errors and unexpected conditions.
- Used **try-catch blocks** and **global exception handlers** to maintain application robustness.
- Collaborated closely with cross-functional teams using **Git and GitHub** for version control.
- Ensured API endpoints to conformed specifications and behaved as expected.
- Leveraged AWS EC2 for scalable compute and S3 for secure storage, enhancing application performance.

I sincerely declare that all of the above-mentioned particulars in this resume are accurate to the best of my knowledge
