

Amit S. Bingewar.

Design Engineer

CAREER OBJECTIVE

Looking for an opportunity in a reputed organization which will encourage me to deliver my best and continuously upgrade my engineering skill sets to meet the organizational goals.

TECHNICAL SKILLS

Product Development (NPD)

Project Management

Design Optimization

Mechanical Design

Hydraulic control Valves

Hydraulic Schematic

Casting Design

Manifolds Design

Sheetmetal Design

3D Modelling

Tolerance stack up Analysis

Engineering Drawings

Manufacturing Drawings

Design Documentation

GD&T

ECR/ECN

DFM/DFA, DFMEA

DFSS, VAVE

DVP&R

MS Office

PROFILE SYNOPSIS

- A dynamic professional with 10+ years of experience in **New Product Design & Development** of off highway and automobile vehicle's hydraulic control system.
- Expertise in Conceptualization, Detail design, Design documentation, Design calculations, CAD modelling, Prototyping, Verification and Validation of a New product development.
- Expertise in understanding the technical inputs from customer and provide **Proposals & Technical support** to global engineering and cross functional team of US, China & UK.
- Good hands-on experience in **Castings Design, Manifold Design, Hydraulic Schematic, Component Design, IST Spring design & Validation (Impulse & Durability Testing)**
- Perfection in **Tolerance Stackup Analysis, GD&T** and good in **ASME & ISO** standards.
- Very good hands on **Creo 8.0, CATIA V5 & Solidworks** with hands on **PLM Windchill 11.0**.
- Perfection in parametric modelling, Part, Surfacing, Assembly, Drafting & Detailing.
- Strong ability to create/review **Engineering drawings** in stipulated time frame.
- Preparation of **3D Models, Shrink-wraps, Iges & Step models** with necessary documentation based on customer inputs for creating **Proposals**.
- Handling technical changes **ECR** (Engineering change request), **ECN** (Engineering change notice) **Release** activities of finalized design into production level with ERP (**IFS / BAAN**).
- Managed **team of 4 members** with leading the ECR/ECN & release activities and allotted the appropriate resources as per the tasks to achieve the targets.

SOFTWARE SKILLS & CERTIFICATIONS

- **Certification in CAD Software:** **Creo 2.0 & 4.0, Solidworks, CATIA V5, Auto Cad** - 10+ years hands-on experience of Part Modelling, Top down & Bottom-up Assembly, Surfacing & Engineering Drawings.
- **PDM/PLM: Windchill :** 8+ years hands-on experience of CAD data handling.
- **ERP (IFS & BAAN):** 8+ plus years hands-on experience to generate and release BOM.

PROFESSIONAL EXPERIENCE

HUSCO HYDRAULICS PVT. LTD.

(July 2015 –Till date)

Design Engineer

- ♦ **Company Profile:** Headquartered in US with operation locations in UK, China and India. HUSCO is the leading hydraulic control valve manufacturer for Construction, Agricultural & Automotive sectors.
Customer worldwide (worked for): JCB, CAT, SANY, JOHN DEERE, HYSTER etc.
- ♦ **Roles & Responsibilities:**
 1. As a part of global NPD/R&D team, I am responsible for variety of New concept designing, Component design Casting development, MS/Durabar Manifolds development, Schematic preparation & Interpretation, New idea generation and implementation to improve the product, develop new product & provide quick and best solution to the customer.
 2. Responsible for preparing proposals for hydraulic control valves as per customer requirement, Generate assembly layout to finalize the designs and preparing sub-assembly drawings and production parts (BOM) list.
 3. To engage in the meeting with global sales and marketing department for inquiries to provide technical information and clarifications when required for the proposed design & design review.
 4. Review customer order specifications and highlight important points during meeting with cross functional team.
 5. Perform linear & Radial tolerance stack-up analysis on detail parts, housing machining and assemblies.
 6. Prepare/checking of detailed manufacturing drawings as per ASME GD&T standards and technical specification.
 7. Modify old existing designs to meet the customer's requirements.
 8. Involved in product testing and qualification activities (DVP&R). Impulse or Durability and Performance testing of the component, Dust box testing for seal testing and validation, preparation of Lab test reports.
 9. Prepared SOP, Valve service instructions, Service kit drawings and Dealer training manual.
- ♦ **Projects:**
 1. Development of base casting.
 2. Development of LLC casting for BOOM function.
 3. Development of casting for platform function
 4. Spring DV Test: Spring design using IST software and verify its durability for 10 million cycles.
 5. Designed various End caps and test manifolds.
 6. Deere motor grader valve: Designed inlet and Outlet castings for hydraulic control valves.
 7. Designed Single spool end cap for six spool mono block.

DYSMECH CONSULTANY SERVICES PVT. LTD.

(Aug 2013 – jun 2015)

Executive for Technical Support (CAD engineer)

- ♦ **Company profile:** DCS is a pioneer in CAD-CAM service & training, providing customized solution in the areas of Engineering (CAD/CAM/CAE) for a variety of application in the engineering industry. also in sales and services to PTC Inc.
- ♦ **Roles & Responsibilities:**
 1. Worked in the technical team for the project works and software training for Creo, AutoCAD, CATIA, Solidworks.
 2. Was a Presentator for many educational & industrial awareness programs on CAD softwares.
 3. Was a trainer for DTE (Government) syllabus as per G-scheme for Nagpur Zone.
 4. Supported Sales & Marketing team to grow the business in educational & industrial markets.

EDUCATIONAL SNAPSHOTS

Bachelor of Mechanical Engineering. Pune University. (72.49%)

Diploma of Mechanical Engineering. M.S.B.T.E. University, Mumbai. (61.67%)

I do hereby assert that, the information provided above are quite genuine & flawless to the best of my knowledge & belief.

Place - Pune, Date -

(Amit S Bingewar)
