Agile	2+ Years of experience

ANAPARTI SRINIVASAMURTHY

AWS & DEVOPS ENGINEER

CONTACT

+91 9705148319

anaparthisrinivas333@gmail.com

SKILLS

- ◆ Linux,python
- ◆ Cloud services (AWS):EC2, EBS, ELB,EKS, VPC, Subnets, Route tables, IAM, S3, SNS,CloudWatch,Route53,Lambda, Boto3.
- ◆ Git
- ◆ Maven
- ◆ Nexus
- ◆ Jenkins
- ◆ Docker
- ◆ Ansible
- ◆ Kubernetes
- ◆ SonarQube
- ◆ JIRA
- ◆ Terraform
- ◆ Apache, Nginx, Tomcat
- ◆ Shell script, Python Scripting
- ◆ Cloud Watch, Nagios

EDUCATION

B. Tech, Electronics and
Communication Engineering, 62%
JNT University, AP
2014

PROFESSIONAL SUMMARY

- ◆ 4+ years of IT experience as an AWS & DevOps Engineer.
- ◆ Good working knowledge of Amazon Web Services (AWS) including EC2, ELB, ALB, VPC, S3, CloudFront, IAM, AMI, Route 53, CodeCommit, and CloudWatch.
- ◆ Experienced in setting up CI/CD pipelines with Jenkins and using Terraform to create AWS infrastructure.
- ◆ Familiarity with various DevOps tools such as Maven, Git, Jenkins, Apache Tomcat, AWS, Docker, and Kubernetes.
- ◆ Proficient in AWS services for building servers, security groups, autoscaling, Elastic Load Balancers (ELBs), and IAM roles.
- ◆ Skilled in configuring and monitoring cloud infrastructure and applications.
- ◆ Expertise in AWS S3 services, creating buckets, configuring permissions, and logging.
- ◆ Automated Continuous Integration (CI) and Continuous Delivery (CD) pipelines using Jenkins and implemented Master-Slave architecture.
- ◆ Experience with Jenkins plugins for building, deploying, and automating projects.
- ◆ Strong in deployment, data security, and troubleshooting using AWS services.
- ◆ Familiarity with Agile methodology for enterprise architecture strategies.
- ◆ Proficient in planning, designing, and implementing system applications in AWS cloud for various platforms.
- ◆ Skilled in using Kubernetes for automating deployment, scaling, and operations of application containers.
- ◆ Experience with Ansible for automated deployment processes and configuration management.
- ◆ Extensive use of Docker/Kubernetes for containerization and virtualization.
- ◆ Monitoring EC2 instances performance using CloudWatch.
- ◆ Configuring user accounts and roles for AWS resources using IAM.
- ◆ Implemented and maintained branching and build/release strategies with Git.
- ◆ Setup GitHub repositories, branches, tags, and permissions.
- ◆ Implemented CI/CD processes using Jenkins and shell scripts for automation.

PROFESSIONAL EXPERIENCE

Working as an AWS & DevOps Engineer for “Juniper Networks” From November 2019 to till date.

PROJECT DETAILS

Project: HMM Implementation

Role: DevOps & Cloud Engineer

ROLES AND RESPONSIBILITIES

- ◆ Proficient in creating Jenkins pipeline jobs using Jenkinsfile and setting up build triggers for automation.
- ◆ Skilled in using Maven as a build tool for Java projects and familiar with Pom.xml.
- ◆ Experience in AWS provisioning, including creating EC2 instances, configuring Security Groups, EBS volumes, auto-scaling, ELBs, and S3 within VPCs.
- ◆ Deployed WAR, JAR, and EAR files on Apache Tomcat servers.
- ◆ Proficient in configuring Docker containers and creating Dockerfiles for various applications. have working experience with python creating scripting automating & streamlining software
- ◆ process Created end-to-end CI/CD pipelines, integrating Git, GitHub, Ant, Maven, Jenkins, Docker, and AWS for seamless provisioning.
- ◆ Utilized Jenkins to automate Jenkins jobs and streamline the build process.

Project: GENESYS

Role: DevOps & Cloud Engineer

ROLES AND RESPONSIBILITIES

- ◆ Proficient in Git, responsible for maintaining repositories, handling releases, and managing branching activities.
 - ◆ Experienced in configuring user accounts for dev, QA, and production servers, and creating IAM roles for EC2 and EBS resources communication.
 - ◆ Implemented monitoring for EC2 hosts using AWS CloudWatch, setting up alarms and notifications.
 - ◆ Established an Auto Scaling group to maintain a fixed fleet size and replace unhealthy EC2 instances with new ones.
 - ◆ Utilized Jenkins for continuous integration, monitoring daily builds, and automating the build process with Jenkins jobs.
 - ◆ Proficient in Kubernetes for automating deployment, scaling, and operations of application containers across host clusters.
 - ◆ Experienced with Ansible, automating deployment processes through playbooks with various modules, loops, facts, and ad-hoc commands.
 - ◆ Configured servers remotely using Ansible playbooks to install packages, start services, and copy files. I have working Scripting python responsibilities were automating & streamlining software process.
- Extensively used Docker for containerization, virtualization, and secure application deployment to accelerate Build/Release Engineering.
