+ 91 9390141415

Summary

- Having around **6+Years** of Experience in IT Industry with Primary Focus on BI tool Using **Power BI, Power BI Modeling and Power Visualization, Power BI Service,**
- **5+ years** of extensive Power BI experience in developing Reports/Dashboards in Power BI **Power BI Modeling and Power Visualization, Power BI Service,** and **1 years** of Experience in **Tableau 8.x, 9.x and 10.x.**
- Experience on Power BI (Desktop and Service) with different data sources such as **SQL Server** using **Live Connection** as well as Importing data from Excel Sources.
- Expertise in importing data from multiple data sources into Power BI, created relationships between various datasets in power pivot.
- Experience in Data preparation in Enter Data and shaping data in Edit Query like **add column, split column, pivot column, un pivot column, changing data type, and Merge queries and Append queries.**
- Experience on DAX Functions like **Aggregate, Counting, Logical, Information, Text, and Date** Functions
- Comfortable in working with **filters/calculated columns/measures/relationship** and transformations of Edit Query section.
- Combined the tables and columns by append queries and merge queries by Joins Concepts.
- Having valuable experience in creating Filters like **Visual level, page level, Drill through and Report level filter** in Power BI.
- Experience on Formatting visuals and conditional formatting and all components of Power BI.
- Having good experience in creating Parameters, **Sorting, and grouping, binning.**
- Expertise in Creating Data Visualizations like **Matrix table, Area Charts, tree map, Line and Stacked column chart** and Creating Visuals like **Donut chart, Waterfall chart, Gauge chart and Funnel chart**

- Worked custom visualizations like **hierarchy slicer, Word Cloud, Histogram, Dual KPI, Bullet Chart**
- Experience on sharing reports, gateways, creating content packs and scheduling, solution for troubleshooting of **tiles, reports, dashboards.**
- Worked on Formatting, Advanced Formatting in tooltip labels like descriptive tooltips, and conditional formatting
- Created Data extracts for better performance and accessing data offline.
- Created Joins by combining tables, Created Column Elements from available data sources and Created Filter elements to limit the data retrieved.
- Implemented role-based security as part of user level security in Power BI
- Extensive knowledge on SQL queries relevant to and Power BI.
- Having good experience on creating partitions using Table Binding and Query Binding.
- Developed Tableau visualizations and dashboards using Tableau Desktop.
- Developed Tableau workbooks from multiple data sources using Data Blending.
- Mastered the ability to design and deploy rich Graphic visualizations with Drill Down and Dropdown menu option and Parameterized using Tableau.
- Preparing Dashboards using calculations, parameters in Tableau.
- Having Knowledge on different types of charts like Bar Hover Bar, Donut, Pareto, Line chart, Heat map, and Tree map.
- Extensive knowledge in various reporting objects like filters, Calculation fields, Sets, Groups, Parameters, Hierarchies in Tableau.

Education

B.TECH(MACHANICAL)-2016 from JNTU A University.

Key Skills

Reporting Tools	Microsoft Power BI, Power Automate, Tableau, Advanced Excel, Power Platform
Database	SQL Server 2008/12/14, Azure Data Factory.
Languages	SQL, DAX
Operating System	Windows 7/10, 11

Work Experience

- Worked as a Power BI Developer in **Hexaware Technologies** from JULY 2024 to STILL WORKING.
- Worked as a Power BI Developer in **P360 Solutions** from November 2021 to AUGUST 23.
- Worked as a Power BI Developer **Fidel Technologies PVT Limited** From FEB 2017 to OCT 21

Project 1#

Client	: Mundi Pharma
Role	: <i>Power BI Developer</i>
Database	: SQL Server
Environment	: Power BI Desktop, Power BI Server and SQL Server

DESCRIPTION:

Mundi Pharma is a global network of independent associated companies that research, develop and manufacture innovative *pharmaceutical* medicines and consumer healthcare products. We are an agile and fast-paced company seeking to increase access to health care through programmers' and effective partnerships.

Roles and Responsibilities:

- Create the clustered/non-clustered indexes on tables.
- Involved in database design, creating tables and maintaining the relationship between them.
- Extensively worked in data Extraction, Transformation and Loading (ETL) from source to target system.
- Involved in Design and development ETL packages using SSIS.
- Extensively used various containers, Tasks and Transformations of SSIS.
- Involved in Scheduling the SSIS packages.
- Involved in Error handling, error logging, check points, Break points and configuration for SSIS packages.
- Involved in Report Design, Development and Deployment using SSRS.
- Designed different Types of reports like Table, Matrix, Drill Down, Drill Through, Sub reports, Parameterized Reports and Cascading reports based on client requirement.

Project 2

Client : Marketing & Sales
Role : Power BI Developer
Database : SQL Server
Environment : Power BI and SQL Server

Roles and Responsibilities:

- Responsible for defining the scope of the project, gathering business requirements, doing analysis and documents.
- Importing the data from data sources and preparing the data as per user Requirement.
- Building the relationships between the various data sets in power pivot.
- Created new columns, new measures and conditional columns using DAX functions.
- Created different filters like visual level filters and page level filters and report level filters as per reporting needs.
- Expertise in various visualizations like donut chart, Pie chart and Bar graph, Tree map and water fall charts and Card Visualizations.
- Designed diverse types of reports like drill down, drill through, And Sync Slicer.
- Developed custom report tool tips for different reports to showcase the multiple data points in one report.
- Created various Customized and interactive Reports and Dashboards in Power BI.
- Publishing reports to Power BI server and providing the access to required users.
- Prepared best practice documents on Tableau & Power BI.
- Designed and documented the entire Architecture of Power BI POC.
- Expertise in writing complex DAX functions in Power BI and Power Pivot.
- Created visualizations and reports based on the requirement.
- Shared reports/dashboards by creating Content Packs and created reports to view in Power BI Mobile.
- Involved in configuring Gateway for Power BI to access on-premises data and Monitored Scheduled Datasets Refresh.
- Interacting with onsite counterparts and business directly for understanding the requirement.
- Developed metrics, attributes, filters, reports, dashboards and created advanced chart types, visualizations, and complex calculations to manipulate the data.
- **Environment: Power BI 2.79.** Tableau, SQL Server.

Project 3#

Client : Walgreens
Role : *Power BI Developer*
Database : SQL Server
Environment : Power BI and SQL Server

Roles & Responsibilities:

- Create the clustered/non-clustered indexes on tables.
- Involved in database design, creating tables and maintaining the relationship between them.
- Extensively worked in data Extraction, Transformation and Loading (ETL) from source to target system.
- Extracted data from different sources into staging area then cleaned the data using appropriate business rules and load the information into Target tables.
- Involved in Design and development ETL packages using SSIS.
- Extensively used various containers, Tasks and Transformations of SSIS.
- Involved in Scheduling the SSIS packages.
- Involved in Error handling, error logging, check points, Break points and configuration for SSIS packages.
- Extracting the data, the from various data sources into Power BI desktop and transforming the data in Power Query Editor.
- Building the relationship between tables by using Power Map.
- Developed analysis reports and visualization using DAX functions like table function, aggregation function and iteration functions.
- Scheduled Automatic refresh and scheduling refresh in power bi service.

Project 4#

Health and Claims

Application Development Analyst .

- **Responsibilities:**
- Create and develop Power BI visuals and data models as required.
- Building Power BI dashboards and doing ad hoc reporting.
- Experience in developing Visualization reports using Power BI as per client requirement.
- Visualize data, author reports Publish and schedule automated refresh of reports.
- Using DAX For power BI Reports.
- Designed the Reports with Conditional formatting.

- Applied the different Formatting & Styles to Reports.
- Created calculated columns to simplify the data.
- Prepared Weekly Status Reports and shared with the Onsite Managers.
- Created Named Calculations and Named Queries in the Data Source view based on business requirement
- Created Dimensions, Measure Groups with Custom formats.
- Good experience on Sorting Attribute by another attribute based on requirement

Environment: Tableau Desktop, Server, SQL.
