OBJECTIVE

- To Work in a Project which encourages me to succeed and grow professionally where i can utilize my skills and knowledge appropriately.

PROFESSIONAL SUMMARY

Overall 5.5 years of experience and in SAP ABAP 4 + years experience and on HANA/ODATA 1+ year in Technical domain

1. Good hands on experience in Data Dictionary objects, ODATA, Reports(Classical, interactive), FM, BADI, BDC, BAPI, ADOBE FORMS, Enhancements, Back ground job
2. Knowledge on ABAP Object Oriented Programming and ODATA services.
3. Preperation of TS and other project related documentation.
4. Good Analytical and Debugging Techniques in the SAP R/3 System.
5. Developed ABAP reports with best performance tuning techniques and Coding Standards

Education

- LOYOLA ACADEMY DEGREE & P.G. COLLEGE 2017
- B.SC. COMPUTER SCIENCE & ENG..

Experience

- Cyberian system Analyst JUL 2018 - SEP 2022
- Capgemini Consultant SEP 2022 - NOV 2023

Technical Skills

1. Data Dictionary: Database tables, Data element, Domain, Search help and Lock.
2. Classical and interactive reports in ABAP.
3. Normal ODATA and ODATA using Hana CDS view.
4. Batch Data Communication (BDC).
5. BAPI, BADI.
6. Enhancements.
7. Adobe forms.
8. Performance tuning techniques and coding standards.
9. Strong debugging skills.
10. Modularization Techniques : Sub routines, Function modules.
11. Good communication Skills.

PROJECTS

Project : 01

COMPANY : Cyberian system

PROJECT : PHILIPS

TYPE OF PROJECT : IMPLEMENTATION

DURATION : FEB 2019 To JULY 2022

Description:

Philips, is a Dutch multinational conglomerate corporation that was founded in Eindhoven in 1891. Since 1997, it has been mostly headquartered in Amsterdam, though the Benelux headquarters is still in Eindhoven. Philips was formerly one of the largest electronics companies in the world, but is currently focused on the area of health technology, having divested its other divisions. Philips is organized into three main divisions: Personal Health (formerly Philips Consumer Electronics and Philips Domestic Appliances and Personal Care), Connected Care, and Diagnosis & Treatment (formerly Philips Medical Systems).

Responsibilities:

- Understanding the feasibility of the requirement specified in the Functional Specification and interacting with functional on the same.
- Preparing the Technical Specification (TS).
- Developing Objects and Performing Unit Tests on all objects prior to formal Delivery.
- Directly handled the client's w.r.t requirement gathering.

Objects:

- Created custom program to update staging table by reading concur files from Application directory.
- Post T&L Expenses details from Concur to SAP ECC by reading SAE/Accrual file information from staging table.
- Developed a Module pool programming to move the damaged materials from one storage location to another storage location by using the plant, storage type, storage location, storage bin combination.
- Extensively worked in Debugging of SAP Programs and Performance Tuning.

Project : 02

COMPANY : CAPGEMINI

PROJECT : GE OIL & GAS

TYPE OF PROJECT : IMPLEMENTATION And Support

DURATION : SEP 2022 To NOV 2023

Description:

GE Oil & Gas was the division of General Electric that owned its investments in the petroleum industry. In July 2017, this division was merged with Baker Hughes. The division supplied equipment for the petroleum industry including drilling, subsea and offshore, onshore, LNG, distributed gas, oil pipeline and oil storage, oil refinery and petrochemical. GE Oil & Gas also designed and manufactured surface and subsea drilling and production systems, equipment for floating production platforms, gas compressors, gas turbines, turbo expanders, high pressure reactors, industrial electricity generation. GE Oil & Gas also provided pipeline integrity solutions, sensor-based measurement, inspection, and condition monitoring, controls and radiation measurement solutions

Responsibilities:

- Understanding the feasibility of the requirement specified in the Functional Specification and interacting with functional on the same.
- Preparing the Technical Specification (TS).
- Developing Objects and Performing Unit Tests on all objects prior to formal Delivery.
- Directly handled the client's w.r.t requirement gathering.

Objects:

- Worked on Classical reporting, Interactive Reporting and reporting tools like ALVs and OOPs ALVs
- Validation done for Email triggering for the specific plants in the program.
- Developed Debit note and credit note forms using adobe forms.
- Enhancement in report ME4N for adding few fields in output.
- Developed FDM overdue report to display the entity values.
- Implementation of SNOTE 696362 - Exit: Availability control for valuated goods receipts.
- Postproduction and support work and New Developments.

Declaration

- I hereby declare that the above details mentioned are correct upto my knowledge
