

DevOps Engineer

Anilkumar M

Mobile: +91 7795465013

Email: anilanilth1996@gmail.com

Summary:

IT Professional with 4.9 years of Experience in Software Development Skilled at Operating in a wide range of Platforms like DevOps, AWS and Linux. Having experience in DevOps/AWS Software Configuration Management which includes Build Automation, Continuous Integration, Continuous Deployment, and Continuous monitoring using Automation Tools.

Professional Summary:

- Expertise in DevOps, Configuration Management, Cloud Infrastructure, Automation it includes Amazon Web Service (AWS), Git, Jenkins, Maven, Ansible, Docker and Kubernetes etc.
- Used Security groups Network ACLs, Internet Gateways,
- NAT Instances and Route tables to build a secure zone environment for organizations in AWS public cloud.
- Created Users and Groups using IAM and assigned individual policies to each group.
- Managing various environments like QA, Staging and Production. Building and Releasing the source code to these environments.
- Managing source code repositories like GIT, GITHUB, Bit bucket. Automation of build process (Build Automation) using the Git, Jenkins and Bamboo.
- Created Multi Factor Authentication for Aws Users in the organization.
- Created alarms in Cloud Watch service for monitoring the server performance.
- Experience with code review tool SonarQube checking code standards, quality and duplication of codes by using Sonar.
- Experience in containerization technologies such as Docker and Kubernetes.
- Used shell script in daily based works like to get information about AWS resources, big files and to know about disk usages. Executed some Cron jobs using shell script.
- Excellent analytical, coordination, and communication skills.

Educational Qualifications:

- Bachelor of Engineering from Visvesvaraya Technological University, Aug 2019.

Work Experience:

- Working as an AWS DevOps Engineer in Tech Mahindra (C2H), from Sep 2020 to Oct 2023
- Working as an AWS DevOps Engineer in Genpact (C2H), from Oct 2023 to till date

Technical Skills:

Version Control Tools	Git, GitHub
Build Tools	Maven
Continuous Integration	Jenkins
Containerization	Docker, Kubernetes & EKS
Configuration Management	Ansible
ISAC	Terraform
Scripting Languages	Shell Scripting, Groovy, Python
Operating System	Linux, Ubuntu
Cloud Technologies	Amazon Web Services
Monitoring	CloudWatch, Zabbix, Prometheus & Grafana
Ticketing tools	Service now, JIRA.

Projects:

Project 1 : Ortele Telehealth
Company : Genpact
Duration : Oct 2023 to till date
Technology : Ansible, AWS, Kubernetes, Terraform, Groovy Script
Role : Aws DevOps Engineer

Roles & Responsibilities:

- Software Configuration Management (Using Ansible, Git, Maven, Jenkins, Linux)
- Creating branches and tags using GIT.
- Creating and maintaining the Jenkins Jobs.
- Automate the build process using Jenkins jobs.
- Responsible for creating the new build setup and new projects using Jenkins and resolving Build issues.
- Responsible for Creating Daily builds, Continuous build, Deploying and Posting Patches, Automating Patch Build Process.
- Monitoring daily builds using CI tool Jenkins.
- Deployed and monitored scalable infrastructure on Amazon web services specifically on AWS EC2.
- Creating Docker images and managing docker registry.
- Monitoring and maintaining nodes using Nagios.
- Verify Deployment logs to check for successful deployments.
- Performing deployments to multiple environments like DEV, QA, and UAT.
- Interact with developers and Enterprise Configuration Management Team for changes to best practices and tools to eliminate non-efficient practices and bottlenecks.
- Utilized tools such as Bit bucket, GitHub for all the project tasks.
- Performed and deployed Builds for various environments QA, Integration, UAT and Productions. Debugging compilation and run time issues in build failures.
- Configured inbound and outbound firewall rules to secure the traffic flow.
- Improved site performance, monitored and ensured overall stability of our platform.
- Resolve build, deployment failures and other environmental issues.
- Involved in POC for existing application to maintained Kubernetes.

Project2 : Liberty Mutual Insurance

Company : Tech Mahindra

Technology: Jenkins Git, Maven, SonarQube, Docker, Nexus,Shell Scripts, AWS,Python

Role : DevOps Engineer.

Roles and Responsibilities:

- Driving industry best practice implementation around CI/CD and infrastructure management.
- Manage the configurations of multiple servers using Ansible.
- Having good exposure in Jenkins for CI (Continuous Integration).
- Administered version control system that included branching and merging.
- Hands on experience in Amazon Web Services (AWS) provisioning and good knowledge of AWS services like EC2, Elastic Load-balancers, S3, RDS, Route53, IAM.
- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux/ Ubuntu) and Configuring launched instances with respect to specific applications.
- Defined AWS Security Groups which acted as virtual firewalls that controlled the traffic allowed reaching one or more AWS EC2 instances.
- Hands-on in writing the Docker files for building images.
- Responsible for managing the **Docker** private registry.
- Developing build and deployment pipelines using Jenkins, Maven for Java applications
- Deploying application in **EKS** cluster using helm charts.
- Interact with developers and Enterprise Configuration Management Team for changes to best practices and tools to eliminate non-efficient practices and bottlenecks.

Declaration:

I hereby declare that above mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of above-mentioned particulars.
