

PROFESSIONAL SUMMARY

Versatile Data Analyst & Engineer with 4 years of experience in building real-time data pipelines, interactive dashboards, and automating data workflows. Strong command over Power BI, Apache NiFi, SQL, Python, and RabbitMQ. Known for delivering insights that improve business operations, compliance, and cost efficiency. Open to diverse industry roles that require data-centric decision-making and technical expertise. I have worked on elasticseach for last 3.6 year for creating index and managing the data on Elasticseach. And I have worked on Kibana dashboard for last 3.6 year and managing dashboard and performance.

Technical Skills

Data Modeling & Data Visualization: Power BI Desktop, Power BI Service, Query (M Query), DAX
Programming & Databases: Python, SQL & Server, MySQL, PostgreSQL
ETL & Data Pipelining: Apache NiFi, RabbitMQ, ActiveMQ, Elasticsearch
Microsoft Tools: Advanced Excel, PowerPoint, SharePoint, Power Apps
Scheduling: Windows Task Scheduler

Experience

Onward Technologies (Software Engineer)

Feb 2022 – Present

Data analyst and Data Engineer

Chennai, India

- Built interactive dashboards to track KPIs such as cycle time, defect rates, compliance status, operational efficiency, and financial indicators using Power BI.
- Designed and maintained robust ETL pipelines with Apache NiFi and RabbitMQ to process real-time and batch datasets from diverse data sources.
- Automated end-to-end data workflows using Python scripts, enabling efficient data transformation, cleansing, and loading processes.
- Conducted root cause analysis and implemented forecasting solutions that supported strategic decision-making and risk management.
- Collaborated with stakeholders from operations, QA, compliance, and finance teams to gather requirements and deliver tailored reports.
- Optimized SQL queries in PostgreSQL and SQL Server environments, reducing dashboard load time by over 40%.
- Built data quality validation layers and implemented automated anomaly detection techniques to ensure the accuracy and integrity of reports.
- Developed performance monitoring reports with drill-through and slicer functionalities, allowing dynamic insights at department and team levels.
- Created audit-ready reporting templates and documentation to support internal reviews and external compliance audits.
- Mentored junior team members on Power BI dashboard development and best practices in data modeling and DAX optimization.
- Worked on elasticseach for creating index and manage the data on Elasticseach.
- Worked on kibana dashboard managing dashboard and its performance.
- Developed dynamic Power BI dashboards for plant supervisors and managers to monitor KPIs including defect rates, cycle times and downtime.

WealthPro Technologies Pvt Ltd

Jan 2021 – Aug 2021

Jr. Web developer

Bangalore, India

- Assisted in the development and maintenance of 3+ responsive websites using HTML, CSS, and JavaScript.
- Collaborated with senior developers to implement UI/UX designs and improve website performance.
- Integrated third-party APIs for dynamic content rendering.
- Participated in daily stand-up meetings and Agile sprint planning.
- Used Git and Git Hub for version control and team collaboration.

Education

Sambhram Institute of Technology

2016 – 2020

B.Tech (Computer science & engineering)

Bangalore, Karnataka

Certifications

Full Stack Development - KodNest Private Ltd
