

Anisha Singh P

Phone: 9019996271 | Email: anishasinghp.rajput@gmail.com

Professional Summary

- Having 4.1+ Years of work experience in software design, development and implementation of various Web Based Applications using **Python, Django, and PostgreSQL**.
- Through knowledge of **Object-Oriented Analysis and Design**.
- Having incredibly good implementation knowledge of **OOPS concepts, Exception handling etc.**
- Good experience on multiple frameworks like **Django, Flask**
- Developing applications in **MVC(MVT) architecture** using **Flask and Django** framework.
- Hands on experience in working with **Python ORM** libraries including **Django ORM** and **SQLAlchemy**.
- Experienced in working with databases such as **MySQL, PostgreSQL, and Mongo DB**.
- Hands on Experience in using **PyCharm IDE**, for developing software applications.
- Ability to manage and deliver results on multiple tasks both in **development and testing**.
- Proficient knowledge in code on version control like **GitHub**.
- Strong analytical and problem-solving skills with timely decision-making abilities.
- Good analytical abilities, quick learning, and a continuing pursuit for increased knowledge of new technologies.
- Ability to handle multiple tasks and work independently as well as in a team.
- Flexible and versatile to adapt to any new environment and work on any project.
- A dedicated team player with excellent organizational and Interpersonal skills.

Professional Experience

- Previously worked as a Senior Data Engineer in **LTIMindtree**, Bangalore from May 2022 to June 2024
- Previously worked as Software Engineer in **Tavant**, Bangalore from April 2020 to April 2022

Projects

Project 2:

Project : Paramount

Environment : Python, Django, RESTAPI, PostgreSQL, Pandas, NumPy, Jenkins, Docker, GIT, Jira

Project description:

Contributed to the development of the Paramount Essence Identification Platform, a cutting-edge tool designed to extract and analyze critical information from large datasets to support data-driven decision-making. It is specialized in watermarking fingerprints to prevent copyright infringement in media and entertainment. Responsibilities involved Python coding, database management, testing, and collaborating with the team for project success.

Roles & Responsibilities:

- Designed and developed different web-based applications by following principles of Agile Methodology.
- Working on mapping between objects and the database tables using ORM.
- Build all database mapping classes using Django models and used Python scripts to update content in the database and manipulate files.
- Wrote and executed various PostgreSQL database and Imported/Exported data between different data sources.
- Participating in unit testing by using the Python Unit Test framework.
- Involving in debugging the applications monitored on JIRA.
- Collaborated with other developers to handle complicated issues related to deployment of Django based applications.

Project 1:

Project : Jio, Reliance

Environment : Python, Django, REST API, PostgreSQL, GIT, Jira, unittest

Project description:

Jio Broadband is a web-based application of Jio Group, designed for client customers. It facilitates the client customers to choose their broadband deals, products, packages and provide service for business and public sector. This project is more secure means unauthorized user cannot access to the information. This application helps to track call status, dropped calls, short message service, email and one time password functionalities.

Roles & Responsibilities:

- Design the web Application using Python on Django web framework pattern to make it extensible and flexible.
- Designing and analyzing the sitemap for the Web portal to be developed.
- Involving in client interactions and status meetings
- Interacting with clients to discuss requirements and involved in technical, functional analysis
- Involving implementing RESTful API from server side
- Participate in code reviews to ensure high-quality, maintainable code.
- Implement unit tests and integration tests to ensure the quality of the code.
- Participate in project planning and provide estimations for project tasks.

Technical Summary

Languages	Python
Databases	PostgreSQL, MongoDB, MySQL
Frameworks	Django, Flask, REST API
Versioning	Git, Bitbucket
SDLC	Agile & Scrum
IDE'S	PyCharm, Visual Studio Code
Tools	Docker
Operating Systems	Windows, Linux

Professional Qualification

B.Tech in Computer Science

Dayananda Sagar Academy of Technology and Management, Bangalore

Activities and Interests

- Committed to ongoing learning through participation in industry webinars, workshops, and relevant professional associations.
- Enjoy activities like photography, fitness enthusiast, cooking, and gardening.

Declaration

I hereby declare that all the information stated above are genuine and updated to best of my knowledge.
