MS SQL	3+ Years of experience
AWS RDS	2+ Year of experience

Anitha Dasari

MSSQL Server DBA

E-mail: dasarianitha.kk@gmail.com

Mobile: +9014677353

Skill Set Summary:

- Having around 3+ years of experience in MSSQL Server DBA, PostgreSQL like Database migration from on-premises to Azure/AWS cloud (SQL server 2008 to 2019).
- Applying service packs and Troubleshooting patching issues on Standalone Database and HADatabases.
- Very good experience in Upgrading instances and Migrating Databases from one version to another version.
- Participated in Disaster Recovery testing for different datacenters.
- **Create, maintain, and administer MSSQL Server databases.**
- Ensure the databases are highly secure, available, and recoverable.
- Proactively monitor and tune the databases for maximum performance.
- Creating Maintenance plans and jobs for automation of the repetitive task.
- Experience index tuning, Rebuilding and reorganizing strategies.
- Good experience configuring SQL Server objects like Linked Servers, Database Mails.
- Regular checking of the database consistency using DBCC commands.
- Experience on performance issues like Blocking, Deadlocking.
- Implementing, maintaining, and troubleshooting Log-Shipping, Database Mirroring.
- Moving System and user database on location to another location.
- Implementing, monitoring, and troubleshooting Transaction Replication.
- Experience in troubleshooting and maintaining SQL Server Clustering.
- Experience in troubleshooting CPU, Memory, and disk related issues.
- Good experience in configuring, maintaining, and troubleshooting SQL Always On.
- **Worked on AWS services EC2, s3, VPC, IAM, Cloud watch.**
- Monitoring the database activities on FogLight monitor and perform necessary action on issues.
- Hands on experience in tools like Foglight, Data Studio, SSMS, SQL profiler, SQL PLUS and SQLDeveloper.
- Provided 24x7 production support for SQL Server database sizes ranging from 100s of GB to 3+ TB to achieve maximum performance and uptime in production environment.

Professional Experience:

- Working as an Analyst I Infrastructure in DXC TECHNOLOGY LTD from July' 21 to till date.

Technical Qualification:

- Bachelors in Electronics and communication Engineering.

Certifications:

- Certified in AZURE fundamentals (AZ-900).
- AWS Certified Solutions Architect – Associate.

Technical Skills:

- Azure SQL database
- Basics of NoSQL- Mango DB
- PostgreSQL

- AWS RDS

- SQL Server 2019,17,16,14,12
- Foglight Monitor 6.1
- ServiceNow

Project Summary:

Project : Point IN J

Customer : Safety Insurance U.S.A.

Project Description:

POINT IN files store the policy information spread across different levels – policy level, unit level, coverage level, etc. The entire file information is read/written/changed via POINT IN browser. Tables in POINT IN signify static values which are independent of policy data. They are needed to store various rating options, classes and modifiers, etc. Data areas store static information like IP address, date and time, etc. They are generally used in POINT IN as on-off “switch” to drive a functionality.

Responsibilities:

- Design, development, implementation and support of MSSQL databases both in physical and virtual environments.
- Manage SQL Server databases through multiple product lifecycle environments, from development to mission-critical production systems.
- Database Administration in MS SQL Server (2016/2014/2012/2008R2/2008)
- Upgrade/ migration of databases from lower versions to latest SQL Server version.
- High Availability and Disaster Recovery solutions (Log shipping, Fail Over-clustering, Mirroring)
- Capacity planning and implementing disaster recovery solutions, Backup, Restore, Point-in-Time Recovery
- Database Performance Tuning using SQL Server Profile

Environment:

Platforms: Windows Server 2012, 2016, 2019

RDBMS: SQL Server 2017, 2019

Tools: Microsoft Power BI, Foglight, AWS Console

Project : Mosaic

Customer : Mosiac Insurance U.S.A.

Project Description:

Mosaic is a next-generation, global specialty insurer harnessing visionary leadership, exceptional underwriting talent, a focus on complex product lines, and a digitized operating model. Mosaic system constitutes subsystems like Boards, Claims, Bills, rating, Disbursements, Client, Contracts & Commissions etc. All subsystems are designed in such a way that they can be used as standalone systems or can be implemented as a total integrated solution. I have worked for Policy and rating modules.

Responsibilities:

- Configure Foglight to monitor database servers.
- Enforce SOC1 Audit requirements.
- Setup and resolve Replication issues.
- Backup and restore on SQL databases.
- Support for AWS RDS databases
- Install, configure, and support SQL Server
- Maintain SQL infrastructure by checking logs and alerts.
- Manage security, access, and authentication to SQL databases.
- Manage maintenance plans (backing up, tuning indexes, shrinking DBs etc)
- Perform database restores, rebuilds and migrations.
- Performance tuning and profiling to improve performance.
- Supporting PostgreSQL databases by loading data into it and monitoring the same through performance insights from AWS console.

Environment:

Platforms: Windows Server 2016, 2019

RDBMS: SQL Server 2017, 2019

Tools: Microsoft Power BI, Foglight, AWS Console
