

SUMMARY

Results-driven Java Developer with 3+ years of experience in building scalable web applications using Java, Spring Boot, Hibernate, and RESTful APIs. Skilled in back-end development, database integration, and delivering high-performance solutions. Quick learner with a strong ability to adopt new technologies. Experienced in Agile teams, focused on creating efficient and maintainable systems to solve real-world business challenges.

SKILLS

- Java
- SQL
- JPQL
- Spring Boot
- Hibernate
- Spring Security
- Spring AI
- MySQL
- Azure Open AI
- RESTful APIs
- Postman
- Swagger
- JWT
- Exception Handling
- Validation
- MVC Architecture
- Spring Security
- OTP-based login
- OAuth2
- AWS S3
- Cloudinary
- IntelliJ IDEA
- Spring Tool Suit 4
- Git
- GitHub
- JUnit & Mockito
- Postman
- SonarQube
- Debugging
- Kafka
- Redis
- Microservice
- Agile Methodology
- ER Diagrams
- DTOs
- JSON
- PDF Generation,
- SMS
- Email
- WhatsApp
- Open Ai
- Problem-solving
- Prompt Writing
- AI Function Calls
- Text-to-Vector
- Text-to-Image
- Design Patterns

EXPERIENCE

Java Developer - Amazecodes Solutions Pvt Ltd

3.1 Years (2021 - Present)

- Contributed to the development of Java-based applications, focusing on back-end functionality using Java, Redis, SQL, Spring Boot, and Hibernate.
- Built and tested RESTful APIs for seamless communication between systems.
- Participated in debugging and troubleshooting issues in the application to improve reliability and performance.
- Worked on database integration tasks, including writing queries and optimizing database performance with MySQL.
- Collaborated with senior developers and gained practical exposure to industry best practices and software development lifecycles.
- Gained experience in Agile methodologies, participating in daily stand-ups and sprint planning meetings.
- Took initiative to learn new tools and technologies, showcasing quick learning and adaptability.
- Delivered assigned tasks within deadlines, demonstrating strong problem-solving and teamwork skills.

DEVELOPMENT TOOLS & PRACTICES

- JUnit & Mockito
- Git
- SonarQube / Sonar IDE
- IntelliJ IDEA
- MySQL Workbench
- Postman
- Agile Methodology
- Spring Boot
- Eclipse IDE

PROJECT

Project name : Lastminute – Travel technology

As part of a collaborative team of six, I contributed to the development of LastMinute, a hotel booking platform for client. Focused on delivering a seamless and efficient booking experience. Built using a robust MVC architecture and adhering to monolithic design principles, the platform aimed to enhance user satisfaction and operational efficiency for our client's services.

Technology

- Spring Boot
- Spring Security
- Agile
- AWS S3
- Git
- REST API
- IntelliJ
- Hibernate
- Jwt Token
- MySQL
- Redis
- Json
- Java 8
- Swagger

ROLES ANF RESPONSIBILITY

- Understand ER diagrams and implemented **Hibernate/JPA** entity models with accurate relationships and mappings.
- Providing regular updates and **progress reports** in sprint meetings to keep up with sprint duration.
- Created **repository layers** using **Spring Data JPA** and wrote custom **JPQL** queries for complex database interactions.
- Developed **service-layer** logic to meet business requirements.
- Built **RESTful API** endpoints to enable seamless communication between clients and the backend.
- Designed and used **DTOs/Payload** classes to standardize data exchange for API requests and responses.
- Integrated **Spring Security 6** with **OAuth2, JWT**-based authentication and **OTP**-based login for secure user access.
- Integrated APIs for **SMS, Email, and WhatsApp** notifications to enhance communication features.
- Automated **PDF generation** and managed file storage using **AWS S3** for scalable and reliable document handling.
- **Cloudinary** for image storage.
- Create custom **configuration classes**
- Implemented robust input **Validation** mechanisms to ensure data integrity.
- Developed centralized **exception handling** classes to handle exceptions
- Wrote unit tests with **JUnit and Mockito**
- Performed API testing using **Postman**
- Documented endpoints with **Swagger**
- Test code quality with **SonarQube**.
- Utilized **Java 8** features like **Stream API and Lambda Expressions** to write clean and efficient code
- Collaborating using **Git and GitHub** for version control, branching, and code reviews.

PERSONAL PROJECT

Project name : Adobe AI (Clone) – Text to Image

Text to Image project uses advanced AI models to generate high-quality images from textual descriptions, enabling users to create visuals from simple text prompts. It leverages deep learning algorithms to transform creative ideas into realistic or abstract imagery based on input text.

CERTIFICATIONS

- Microservices with Spring Boot
- Java Programming

ACHIEVEMENT

 **Top Performance Enhancer Award**

Awarded for optimizing software performance and delivering key features that boosted user satisfaction.

DECLARATION

I hereby declare that the details mentioned above are true to the best of my knowledge and take responsibility for their accuracy.
