

CURRICULUM VITAE

NAME: ANKUR KUMAR ROY

ADDRESS: Noida, India

TELEPHONE: 8285974113

EMAIL: ankur.roy10@gmail.com

LinkedIn: <https://www.linkedin.com/in/ankur-roy-b19041162>

Personal Overview

A conscientious and professional with 10years' experience in the telecommunications industry in improving processes and complex product deliveries by implementing a scaled Agile environment. Diversified experience in layer 2 & layer3 Network with expertise in Operations Management, Technical Support, Troubleshooting and Project Delivery –Rollouts and Transformations.

Skills

- Acquainted with Incident, Change and Problem Management process in ITIL framework.
- Understanding of cloud computing principles, architectures, and deployment models.
- Knowledge of cloud-native development practices and microservices architecture.
- In-depth understanding of OpenStack components such as Nova, Neutron, Cinder, Swift, Keystone, Glance, and Horizon.
- Experience in configuring and maintaining OpenStack services to ensure high availability and performance.
- Knowledge of OpenStack networking concepts, including SDN solutions like Neutron networking.
- Experience in capacity planning, scaling, and optimizing OpenStack resources.
- Strong understanding of Kubernetes architecture and concepts, hands on with OpenShift.
- Experience with managing containerized applications on OpenShift platform.
- Skill in troubleshooting issues related to OpenShift deployments and applications.
- Strong understanding of Ceph administration tasks, including cluster management, node provisioning, and performance tuning.
- Proficiency in Linux system administration and troubleshooting.
- Hands on with scripting skills in languages like Python, Bash.

Employment History

Present: Senior Engineer (MS Core & Cloud Specialist)

Ericsson:

- Managing diverse cloud environments leveraging OpenStack technology which includes (Redhat OpenStack v13 & v16, Cisco CVIM, Ericsson CEE, Nokia CBIS).
- Provide expert-level operational support for OpenStack-based cloud environments, ensuring high availability and reliability of services.
- Proficiency in deploying, managing, and scaling OpenShift container platform clusters.
- Experience with managing containerized applications on OpenShift.
- Proficient in diagnosing and resolving issues related to OpenStack services, including compute, storage, and networking components.
- Monitor, troubleshoot, and resolve incidents and service outages in a timely manner to minimize impact on business operations.
- Collaborate with cross-functional teams to implement best practices for system monitoring, alerting, and incident response.
- Conduct regular health checks and performance tuning exercises to optimize resource utilization and enhance system performance.
- Lead root cause analysis (RCA) investigations for critical incidents and implement preventive measures to mitigate future occurrences.
- Act as a subject matter expert (SME) for OpenStack components and provide technical guidance to junior support engineers.
- Participate in the planning and execution of upgrade and patch management activities for OpenStack services and infrastructure.
- Ability to monitor and maintain Ceph clusters to ensure high availability, performance, and data integrity.
- Experience in integrating Ceph storage with other cloud platforms and services, such as OpenStack, Kubernetes, or OpenShift.
- Document standard operating procedures (SOPs), troubleshooting guides, and knowledge base articles for internal reference and training purposes.
- Implemented and maintained backup and disaster recovery solutions to safeguard data integrity and ensure business continuity.
- Participated in on-call rotations to provide 24/7 support for production environments and respond to emergency incidents in a timely manner.
- Stayed abreast of emerging trends and best practices in cloud computing and infrastructure automation, continually enhancing skills and knowledge.

2017-2021: Engineer

Ericsson:

- Noc Domain Lead of 4 Circles ensuring smooth operational activities related to transmission Servers.
- Working as an support engineer Responsible for deployment of automation in Bharti Network TXN & Cloud Domain.
- Following Agile Scrum Framework for ensuring on time delivery of the automations.
- End to End driving from identifying & analysing automation opportunity to LCM Handover.
- Managing ongoing pipelines, project timelines, priorities, and Handling AMB call.
- Preparing and managing Governance/Scrum/Automation feasibility discussion with customers/developer/Architect.
- Co-ordinating with development team for building robust automation & gap analysis.
- Identifying & leveraging the solution offered by the different automation tools such as RPA (UI-PATH & BLUE PRISM), ACE, MATE, ENABLE platforms to automate cloud core network.
- Delivered FTE based automation ensuring cost reduction & increasing the efficiency of the NOC team.
- Major Incident RCA analysis & MAL (major action list) tracking implementation to make network healthy.
- Chronic issue identification & closure with support of different circle team.
- Ensuring smooth implementation of transmission CR with minimum failures in one go.
- Proactive problem analysis and implementation of corrective actions which may result Single Point of Failure.
- Performs daily MAC's (moves/adds/changes) and designs, installs, and implements new telecommunications systems/networks and solutions with direction from senior level staff.
- Assists with provisioning and troubleshooting of Microwave network of more than 0.2 million nodes.
- Assists with escalating and handing off problems when necessary and assists in providing proper documentation and communication at handoff points.
- Assists with coordinating technical staff support (internal and external) for escalated problems.
- Assists with logging, documenting, and communicating problems and resolutions.
- Assists with creating and implementing problem incident response procedure.
- Works with vendors as necessary to identify and resolve issues.
- Handling trouble tickets related to different network KPI.

2014 – 2017: Graduate Engineer Trainee

Huawei Telecommunications:

- Project Handled : Bharti Microwave rollout for 3G &4G in Phase-3 & Phase-4 (Rajasthan)
: MTN Nigeria RTN Network rollout (GSC Bangalore)
: Vodafone Hybrid Network Rollout Punjab Circle (Vodafone SNOG Pune)
- Prepared detailed plans for installations or comprehensive upgrades.
- Supervised team of engineers and technicians throughout projects.
- Generated and maintained service documentation.

- Created instructional materials for operation and maintenance of equipment.
- Maintained optimal function via planned upgrades.
- Providing support to field engineers to complete network rollout of new sites & swap of Ericsson MLE to Huawei RTN links for 2G/3G/4G sites integration.
- Supervised subcontractors or service partners technically and provided on job training.
- Technical support service to customer independently or jointly with other technical teams

Education

2008-2012: B-TECH from Naraina College of Engineering & Technology in First Class.

Additional Training & Accreditations

- PG Certification in **Internet of Things** from **Birla Institute of Technology and Science**, Pilani – Pilani.
- ETCP 2023: **Ericsson Certified Associate - Ericsson Cloud**
- Red Hat Certified System Administrator in **Red Hat OpenStack (id: 220-072-664)**
- **Certified Scrum Master** from Scrum alliance (id: 001462601)
- Ericsson Certified **5G Marshal- Green Belt**.
- Two times **Power Award** Winner for the best performance in GNOC operations.
- **ACE Award** winner for the performance in standard NOC operations.
- **MS-EXCELLENCE Award** for Q4 2021 for supporting IWAN deployment in MP Circle.
