SUMMARY

- Overall 4 years of experience in IT and 2.6 years of experience as an AEM Developer. Designing, Developing, Integrating, Supporting and Testing applications based on AEM, Web and Application server technologies.
- Have a solid understanding of Apache Sling, OSGI, JCR, OAK repository and leveraging web content management components for customization and porting of websites.
- Experience in developing AEM Dynamic Templates, Custom Components, Content Fragments, Experience Fragments using AEM APIs for Servlet and HTL.
- I worked extensively with front-end technologies like HTML5, CSS3, JavaScript, jQuery, AJAX and JSON.
- Strong knowledge on DAM (Digital Asset Management) features of AEM, writing & customizing DAM asset workflows, custom DAM assets finder, editor interfaces, etc
- Good knowledge of AEM front-end implementations Sightly, Granite UI and involved in customization on Granite UI.
- Implementation knowledge of i18n on Components and Dialogs.
- Experience in Sling Model and OSGI annotations implementations
- Experience in using Digital Asset Management (DAM), Multi Site Manager (MSM) and Tag Manager API.
- Experience in using IDEs for development such as Eclipse, IntelliJ and Maven as build tools.
- Experience in version control software such as GIT and in tracking tools such as JIRA.
- Adaptable to changing requirements and environments. Team-player with strong work ethic

SKILLS

Enterprise Web Products	AEM 6.5, Cloud
Operating systems	Windows 7/10/11
Programming Languages	JAVA

Web Technologies & Scripting	XML, HTML, JavaScript, CSS, JSON, jQuery, Bootstrap
Build Tools	Maven, Jenkins
Version Control System	SVN, Git and Bitbucket
IDE	Eclipse, and CRXDE
WCM	Apache Sling, HTL(Sightly), Jackrabbit, JCR 2.0, OSGI, Felix

Project Details:

Project# 01: -

Client: Three.ie

AEM Developer

Feb 2023 to Sep

Description: Three is Ireland's largest mobile telecommunications provider with 43.5% market share and 3.9 million customers. At Three we strive to provide our customers with a better-connected life through meaningful products, best-in-class service and a connected network experience.

Responsibilities:

- Role involves designing, developing, debugging and maintaining user interface for websites based on functional requirements and scope of work.
- Designing and implementing custom components for website pages through Adobe AEM.
- Custom workflows creation for DAM asset upload for multiple locations.
- Involved in MSM and Workflow and RTE customizations.
- Responsible for all AEM Console (sites, assets, Inbox, workflow, tagging) customizations based on client requirements.
- Implemented templates to be used by various pages.
- Implemented Sling servlets to provide AJAX handling.
- Performed administration tasks to activate, replicate and package the changes to publish.
- Involved in content packaging and deploying into different environments.
- Implemented client libraries useful at global and component level using CSS and JavaScript files.

Environment: Java, AEM 6.5, AEM Assets, DAM, Apache Sling, Apache Felix, Sightly (HTL), CRXDE Lite, JCR, WCM, HTML, JavaScript, jQuery

Project#02:-

Juice Plus+: The Juice Plus+ Company has a more than 20-year history in developing partnerships with leading academic experts to fund research that supports the healthful benefits of our fruit, vegetable, and berry blend capsules.

Responsibilities:

- Involved in developing AEM custom components and Templates.
- Worked on getting the product data through JSON response • Configured custom log files for some services using web console.
- Worked on HTML template language Sightly.
- Testing support during UAT and production.
- Worked on custom OSGi services, sling servlets, and scheduler jobs.
- I wrote java classes with OSGi annotations to define OSGi services and programmatically access the Jcr nodes.
- Developed and designed the front-end using HTML, JavaScript and CSS.

Environment: Java, AEM 6.5, AEM Assets, DAM, Apache Sling, Apache Felix, Sightly (HTL), CRXDE Lite, JCR, WCM, HTML, JavaScript, jQuery

Project#03:-

Role: Jr. Java Developer

Description: Eskom Holdings generates transports and distributes approximately 95% of South Africa's electricity making up 60% of the total electricity consumed on the African continent. Eskom is the world's eleventh largest power utility in terms of generating capacity, ranks ninth in terms of sales, and boasts the world's largest dry-cooling power station.

Responsibilities:

- Involved in all phases of the Software development life cycle (SDLC)
- Followed agile methodologies to execute project
- Developed various end user's screens using JSP, Servlet technologies and UI technologies like HTML, CSS and JavaScript.
- Used Test driven methods to improve the code and find defects in the code.
- Deployed application on Apache Tomcat Server.
- Used Jenkins to deploy the application in testing environment.
- Used version control repository GIT and JIRA for issue tracking.
- Monitored the error logs using Log4J and fixing the problems.
- Delivered presentations to customers on the progress of the project.

Environment: Java, JSP, Struts, Hibernate, AJAX

EDUCATION:

- B.Tech from Giet College of Engineering (2019), Rajamahendravaram, Andhra Pradesh.
- Diploma from Sraddaha College of Diploma in Engg & Tech (2015), Gokavaram, Andhra Pradesh.
- 10th from ZPP High School (2012), Prathipadu, Andhra Pradesh.

PERSONAL DETAILS:

Date of birth : 11-06-1997
Father's Name : E. Seetharamayya
Marital Status : Single
