

Chandrasekhararao Putcha

Targeting to leverage expertise in Site Reliability Engineering (SRE) and Cloud Security to optimize Cloud Infrastructure and drive Operational Excellence in a forward-thinking organization. Committed to continuous professional development and contributing to innovative cloud solutions.

PROFILE SUMMARY

- **Total 6+ years of IT Experience and 4+ years of DevOps experience** with a focus on **Cloud Infrastructure Management** and **Performance Optimization** in the **Technology Sector**.
- Currently serving as an **Azure DevOps Engineer** at **HTC Global Services**, responsible for **architecting scalable, automated solutions** to streamline development workflows and improve **operational efficiency**.
- Expertise in **cloud services, version control systems, and automation tools**, with a specialization in **Azure DevOps, Terraform, and CI/CD pipelines**, driving **seamless integration and delivery**.
- Achieved a **reduction in deployment time** by designing and implementing **automated CI/CD pipelines**, improving **deployment efficiency** and **system reliability**.
- Proficient in **infrastructure as code (IaC)**, utilizing tools like **Terraform** and **ARM templates** to automate **Azure resource provisioning** and management.
- Led an initiative that enhanced **application performance monitoring** by integrating **Azure Monitor** and **Application Insights**, resulting in a **decrease in incident response time**.
- Improved data security by implementing **Azure Key Vault**, safeguarding **sensitive information** and ensuring compliance with **industry standards**.

EDUCATION

- **B.Sc. in Computer Science** from Andhra University, Vamsadhara DG College in **2010**

CERTIFICATION

- **Azure 400**

COMPETENCIES

✓ Cloud Infrastructure Management	
✓ DevOps Methodologies	
✓ Microservices Architecture	
✓ Security Compliance Standards	
✓ Performance Optimization	
✓ Infrastructure as Code (IaC)	
✓ Agile Project Management	
✓ Disaster Recovery Planning	
✓ Network Security Protocols	
✓ Application Lifecycle Management	

IT SKILLS

- **Version Control Tools:** GitHub, Azure Repos
- **Build Tools:** MS Build, Jenkins
- **Container Tools:** Docker, Kubernetes
- **Scripting Languages:** PowerShell, ARM Templates, YAML, JSON, Terraform
- **Monitoring Tools:** Azure Monitor, Application Insights
- **Cloud Services:** Azure (including various Azure services like VMs, App Services, Azure Active Directory, etc.)
- **CI/CD Tools:** Azure DevOps, Jenkins
- **Application Servers:** Apache Tomcat, Node.js, .NET

WORK EXPERIENCE

Azure DevOps Engineer | HTC Global Services | Bangalore | Nov 2022 - Oct 2024

Responsibilities:

- Engineered and automated **CI/CD pipelines** in **Azure DevOps** to ensure smooth integration and deployment of **Azure Function Apps** and **Logic Apps**, enhancing efficiency across the development lifecycle.
- Automated infrastructure provisioning using **Terraform** and **ARM templates**, deploying critical resources such as **Function Apps**, **Logic Apps**, and networking components in **Azure**.
- Developed **event-driven workflows** in **Azure Logic Apps** to integrate external APIs and internal microservices, incorporating robust retry and error-handling mechanisms.
- Built and deployed **Azure Function Apps** to manage event-driven processes, integrating with **Azure Queue Storage** and **HTTP triggers**.
- Secured workflows and serverless functions through **Azure Key Vault**, ensuring safe access to sensitive data.
- Monitored and optimized application performance using **Azure Monitor** and **Application Insights**, establishing alerts for critical failures and bottlenecks, improving performance monitoring.
- Architected and implemented an **automated CI/CD pipeline** for containerized web applications, significantly reducing deployment time and improving code reliability.
- Utilized **Azure Kubernetes Service (AKS)** to manage and scale **microservices**, ensuring efficient and scalable service deployment.
- Enhanced code quality by integrating **SonarQube** static analysis into the CI pipeline, improving code review and reducing errors.
- Led infrastructure provisioning with **Terraform** and **Azure DevOps Pipelines**, automating **IaC** practices for efficient deployment across projects.
- Managed end-to-end infrastructure monitoring and diagnostics, reducing **incident resolution time** through proactive alerts and dashboards in **Azure Monitor**.
- Streamlined **security protocols** by implementing automated patch management and vulnerability scanning, reducing security risks in deployment pipelines.

DevOps Engineer | Encora Innovation Labs | Bangalore | Aug 2022 - Oct 2022

Responsibilities:

- Implemented a comprehensive **CI/CD pipeline** using **Azure DevOps**, automating the deployment and integration of **Azure Function Apps** and **Logic Apps** to enhance process efficiency.
- Automated the deployment of cloud infrastructure with **Terraform**, creating **Function Apps**, **Logic Apps**, and associated networking components in **Azure** to streamline resource management.
- Designed and executed **event-driven workflows** in **Azure Logic Apps** for seamless API integration and internal microservices communication, ensuring error-handling and system reliability.
- Deployed **Azure Function Apps** to support event-driven architecture, integrating triggers from **Azure Queue Storage** and **HTTP requests** for dynamic response handling.
- Ensured secure access to workflows by integrating **Azure Key Vault** for sensitive data encryption and management.
- Monitored and optimized applications using **Azure Monitor** and **Application Insights**, reducing response time to critical performance issues.
- Designed and built **AKS-based microservices** architecture, ensuring scalable deployment and management across production environments.
- Improved **deployment efficiency** through automation, reducing **manual intervention**, ensuring faster turnaround times for feature releases.
- Increased system resilience by implementing **retry and error-handling mechanisms** within **Logic Apps**, reducing failure rates during critical API integrations.

PREVIOUS EXPERIENCE

DevOps Engineer | Datanet Techno Solutions Pvt. Ltd. | Bangalore | Aug 2018 - July 2022

Responsibilities:

- Automated provisioning of **Azure infrastructure** (AKS, Virtual Networks, VMs) using **Terraform**, integrated with **Azure DevOps Pipelines** for seamless **IaC** deployment, reducing manual setup time by **80%**.
- Developed and maintained **CI/CD pipelines** with **Jenkins**, automating build, test, and deployment processes for microservices on **Azure Kubernetes Service (AKS)**, and enhanced container orchestration with **Docker** and **Kubernetes**.
- Strengthened **security protocols** by implementing **RBAC**, integrating **Azure Key Vault** for sensitive data protection, automating patch management, and conducting vulnerability scans in **Jenkins pipelines**, while optimizing **disaster recovery** strategies to reduce downtime and data loss during incidents.

PROJECTS UNDERTAKEN

Meijer (US) Retail and Groceries

Role: Azure DevOps Engineer

- Provisioned Azure resources (VMs, Storage, Virtual Networks, App Services, Kubernetes) using **ARM templates** and **Terraform**.
- Developed **CI/CD pipelines** with **YAML** for automated deployment across environments, sourced from **Azure Repos** and **GitHub**.
- Managed **Docker** container builds and pushed images to **Azure Container Registry**.
- Automated the deployment of **Azure Function Apps** and **Logic Apps** via **Azure DevOps CI/CD pipelines**.
- Created event-driven workflows in **Azure Logic Apps** to integrate external APIs and microservices with error handling.
- Secured workflows using **Azure Key Vault** and monitored performance with **Azure Monitor** and **Application Insights**.

Exostar (US)

Role: Azure DevOps Engineer

- Automated deployment of Azure resources (VMs, Storage, App Services, Kubernetes) using **ARM templates** and **Terraform**.
- Created **CI/CD pipelines** with **YAML** for multi-environment deployment using **Azure Repos** and **GitHub**.
- Built and pushed Docker images to **Azure Container Registry**.
- Implemented **Azure DevOps pipelines** for continuous deployment of **Function Apps** and **Logic Apps**.
- Developed **Logic Apps** workflows for seamless API integrations with error handling.
- Ensured security via **Azure Key Vault** and monitored performance using **Azure Monitor** and **Application Insights**.

Experian US (Credit Bureau)

Role: DevOps Engineer

- **Deployed** and **hosted** enterprise applications on **Microsoft Azure Cloud** using **ARM templates** and **Azure Portal**.
- Managed **Azure VMs** and resources through **PowerShell** and Azure Portal, including **user provisioning** in **Azure AD**.
- Led the **migration** of on-premises **Hyper-V** and **VMware VMs** to Azure, as well as transitioning from **Classic Portal** to **ARM Portal**.
- Handled **IaaS migrations** for key infrastructure components like **virtual networks** and **network interfaces**.
- Executed **disk expansions** and **resource scaling** for services, including **VMs** and **SQL Servers** (DTUs).
- Created and configured **Azure NICs**, **virtual networks**, and VMs, while ensuring appropriate user access management.
