PROFESSIONAL SUMMARY

- Around 5.6+ years of IT experience in developing, implementing, and maintaining software applications.
- Proficient in Object-Oriented Programming Structure (OOPS) concepts.
- Expertise in .NET Core, ASP.NET MVC, C#, ADO.NET, LINQ, and Entity Framework.
- Experienced in working with web servers like IIS.
- Strong hands-on experience with SQL Server and MongoDB.
- Skilled in designing and developing web-based client-server applications using ASP.NET, MVC 5.0, JavaScript, AJAX, jQuery, HTML, CSS, and SQL Server.
- Proficient in developing applications with MVC architecture and .NET Framework (3.5, 4.0, 4.5, 4.7, 4.8) and .NET Core (5, 7,8,9).
- Experience with Azure cloud services, Azure Functions, and application deployment and monitoring.
- Demonstrated ability to work both individually and in team environments, recognized for professionalism, thoroughness, and commitment to quality.

PROFESSIONALS EXPERIENCE

- Working as a Software Developer at Tatwa Technologies Ltd, Bhubaneswar from October 2021 to present.
- Previously worked as a Software Developer at Appman Technologies Pvt. Ltd, Bhubaneswar from Mar 2020 to Oct 2021.
- Previously worked as a Software Intern at Appman Technologies Pvt. Ltd, Bhubaneswar from June 2019 to Mar 2020.

ACHIEVEMENTS

- 2-time Best Performer of the Technology Team (2024, 2025).

EDUCATION:

Level of Examination	Exam Passed	Board / University Institution	Duration	Year of Passing	Division / Grade
H.S.C	10th	B.S.E Odisha	Mar - 2012 to Apr - 2013	2013	2nd
C.H.S.C	+2Commerce	C.H.S.E, Odisha	Aug - 2013 to Jun - 2016	2016	3rd
Graduation	BCA	Utkal University, Odisha	Jul - 2016 to May - 2019	2019	1st

TECHNICAL SKILLS

- **Web Skills:** ASP.NET, .NET Core, Blazor Web Assembly, React
- **Frameworks:** .NET Framework (3.5, 4.0, 4.5, 4.7, 4.8), .NET Core (5, 7,8,9)
- **Languages:** C#, JavaScript, HTML, XML, jQuery, CSS
- **Databases:** SQL Server, Oracle, MongoDB
- **Cloud Platform:** Microsoft Azure, Azure Functions, Azure Services
- **Methodologies:** MVC, RESTful APIs, Dependency Injection
- **Web Servers:** IIS

PROJECT DETAILS

School Management System (Blazor WebAssembly,, .NET Core, MongoDB, Azure)

- **Technologies Used:** Blazor WebAssembly, .NET 9, RESTful APIs, OOPS, MongoDB, Azure Services
Duration: Ongoing
- **Description:**
Designed a School Management System (SMS) using Blazor WebAssembly for a dynamic and modern front-end experience. Integrated with .NET Core APIs and MongoDB for efficient, scalable backend management. Hosted on Azure to ensure high availability, monitoring, and seamless deployments.
- **Responsibilities:**
 - Developed rich and interactive UI components using Blazor WebAssembly for client-side rendering.
 - Consumed RESTful APIs built in .NET Core to manage application logic and business operations.
 - Implemented secure API communication between the Blazor frontend and .NET Core backend.
 - Integrated MongoDB for flexible schema design and high-performance data handling.
 - Deployed the solution using **Azure App Services** with CI/CD integration and monitoring.

HRMS Web API (Dotnet 9, MS SQL, Dapper, React, Azure)

- **Technologies Used:** .NET 9, MS SQL Server, RESTful APIs, OOPS, Dapper, React
- **Duration:** Ongoing
- **Description:** Developed a robust Human Resource Management System (HRMS) Web API with a React front-end to facilitate efficient employee management and data retrieval. The integration of React enhanced the user experience with a dynamic and responsive interface.
- **Responsibilities:**
 - Spearheaded the API development, ensuring seamless HR data access and integration with the React front-end.
 - Focused on continuous improvement and maintenance throughout the project lifecycle.
 - Deployed the application on Azure App Services.

OMC Requirement Portal (Dotnet Core, MongoDB, Azure Services)

- **Technologies Used:** .NET Core, OOPS, MongoDB, Azure Services
- **Duration:** 9 Months
- **Description:** Developed a dynamic OMC Requirement Portal to streamline the process of managing and tracking project requirements. Leveraging MongoDB for scalable and efficient data storage, and Azure Services for enhanced deployment and monitoring, the portal facilitates real-time updates and efficient data management, ensuring that project requirements are met with precision and timeliness.
- **Responsibilities:**
 - Designed and implemented the architecture using .NET Core with MongoDB for backend services.
 - Integrated the system with MongoDB for scalable and efficient data management.
 - Deployed the application on Azure Services, ensuring scalability and high availability.
 - Collaborated with stakeholders to refine project requirements and ensure optimal performance.

EnsafeNxtApiApp (Dotnet Core 7, Oracle, Azure Services)

- **Technologies Used:** .NET Core 7, OOPS, Oracle, RESTful APIs, Azure Services
- **Duration:** 6 months
- **Description:** Developed a sophisticated Employee Safety Management API to enhance workplace safety through incident reporting, hazard recognition, and compliance monitoring. Deployed the application on Azure Services for scalability and performance.
- **Responsibilities:**
 - Directed the overall architecture and development of the EnsafeNxtApiApp.
 - Deployed the application on Azure App Services, ensuring scalability and availability.
 - Integrated Azure Monitor and Application Insights for performance monitoring.
 - Implemented Azure Functions for serverless execution of tasks.
 - Collaborated with safety experts to ensure compliance.

New Tech Portal (ASP.NET, Oracle)

- **Technologies Used:** ASP.NET, Oracle, MVC Framework
- **Duration:** 6 months
- **Description:** Developed an innovative portal to streamline work approval processes and structural advancements in the workplace.
- **Responsibilities:**
 - Oversaw maintenance and iterative improvements.
 - Troubleshoot and refined the system for optimal performance.

Asset Management System (ERP Model Web Application)

- **Technologies Used:** ASP.NET, OOPS, SQL Server, ADO.NET, Stored Procedures
- **Duration:** 14 Months
- **Description:** Designed and developed an ERP model web application for comprehensive asset tracking, with modules for Allocation, Asset, Employee, Engineer, Helpdesk, and more.
- **Responsibilities:**
 - Played a significant role in coding, deployment, and ongoing module development.
 - Created a robust asset management system for efficient tracking and management.

OSFDC (ERP Model Web Application)

- **Technologies Used:** ASP.NET MVC, OOPS, SQL Server, ADO.NET, ERP Modules
- **Duration:** 12 Months
- **Description:** Created a comprehensive ERP model web application with modules for HRMS, Finance, BIGS (Business Information and Growth Strategy), and Skill MIS (Management Information System).
- **Responsibilities:**
 - Contributed significantly to the coding and deployment phases.
 - Maintained interlinked modules for seamless operation.
 - Oversaw report generation to provide a holistic ERP solution.

OCCL (Employee Details Tracking)

- **Technologies Used:** C#, ASP.NET, SQL Server, Web Forms
- **Duration:** 8 Months
- **Description:** Developed a comprehensive employee detail tracking system for OCCL, enhancing data management and accessibility.
- **Responsibilities:**
 - Actively contributed to coding, web form design, and deployment processes.
 - Created a robust employee tracking system to improve operational efficiency.

Declaration

I hereby declare that the information furnished above is true to the best of my beliefs and knowledge.
