SUMMARY

Total 7+ Years of experience in IT and 5 Years in AWS Data Engineer with a strong background in dataarchitecture,ETL processes, and data warehousing. Skilled in designing and implementing data solutions using AWS cloud services. Worked at optimizing data pipelines and ensuring data quality and security for analysis and reporting.

SKILLSET SUMMARY

Core Skills	Technologies
AWS Services	AWS Glue, Redshift, Athena, AmazonS3, Ec2, EMR, AWS Lambda, Kinesis, AWS Data Pipeline, Route 53
ETL Processes	Data ingestion techniques, Data transformation, Data cleaning
Programming Languages	Python, Pyspark, SQL
Data Warehousing Concepts	Star and snowflake schemas, Data modeling
Data Privacy/Compliance	GDPR, HIPAA
Data Security	Data encryption, IAM roles and policies
Business Intelligence	Amazon QuickSight, AWS Data Lake Formation

PROFESSIONAL EXPERIENCE

SPONTACT GLOBAL IT SOLUTIONS PRIVATE LIMITED

AWS Data Engineer

Mar 2024 - Nov 2024

- ❖ Developed robust ETL pipelines using AWS Glue and Lambda, handling data ingestion from a variety of sources and preparing data for analytics and reporting.
- ❖ Enhanced data processing and storage workflows by setting up and managing Amazon S3 data lakes and Redshift warehouses.
- ❖ Applied best practices in data security, including IAM policies, encryption, and role-based access control, to meet compliance standards.
- ❖ Collaborated closely with business intelligence and analytics teams to

implement scalable data models and create efficient reporting frameworks.

- ❖ Streamlined pipeline performance monitoring and logging using AWS CloudWatch and optimized resource usage to reduce costs.

KANSAS OVERSEAS PRIVATE LIMITED

Data Immigration Consultant

NOV 2022 - Feb 2024

- ❖ Developed and implemented end-to-end data migration strategies for transitioning legacy systems to modern cloud platforms, ensuring minimal downtime and data consistency.
- ❖ Conducted data mapping, profiling, and cleansing processes to prepare data for migration, improving data accuracy by over 30% in multiple projects.
- ❖ Collaborated with cross-functional teams to identify data dependencies and establish migration best practices aligned with industry standards.
- ❖ Built and optimized ETL pipelines to facilitate the secure and efficient transfer of data from on-premises systems to cloud data lakes, including AWS S3 and Azure Data Lake.
- ❖ Utilized tools like AWS Glue, Azure Data Factory, and Python to automate data ingestion, transformation, and loading (ETL), reducing manual intervention and accelerating migration timelines.
- ❖ Developed reusable pipeline components to streamline the migration process for future projects, enhancing the team's productivity

INAT TECHNOLOGIES PRIVATE LIMITED

Data Engineer

NOV 2018 - SEPT 2022

- ❖ Assisted in setting up data workflows in Amazon Redshift and S3 for centralized storage and analysis.
- ❖ Supported data quality assurance by performing data cleaning, validation, and consistency checks.
- ❖ Implemented Python scripts for automating data extraction and transformation tasks from internal databases.

INTELENET GLOBAL SERVICE PRIVATE LIMITED

EBusiness Executive

SEPT 2017 - OCT 2018

- ❖ Set up Google Forms to capture business data from small, medium, and large enterprises. Include sections such as:
- ❖ Business Details: Name, Type, Location, Revenue Bracket, etc.
- ❖ Operational Metrics: Monthly/Quarterly Sales, Number of Employees, Operating Expenses.
- ❖ Customer Data: Customer Demographics, Retention Rates, Customer Feedback.
- ❖ Growth Metrics: Year-over-Year Growth, Expansion Plans, Investment Needs
- ❖ Link Google Forms to Google Sheets: Each form submission automatically populates rows in a Google Sheet for centralized data storage.
- ❖ Worked on Data Segmentation, data cleaning, data transformation and create mis reports

PROJECTS

Cloud-Based Data Pipeline for Sales Analytics

Technologies Used: AWS Glue, Amazon Redshift, S3, Lambda, QuickSight

- ❖ Developed a data pipeline to collect, transform, and store real-time sales data in Redshift for reporting and analysis.
- ❖ Automated data ingestion from external APIs using AWS Glue and Lambda, ensuring fresh data availability every hour.
- ❖ Created QuickSight dashboards for key performance indicators (KPIs), providing stakeholders with data-driven insights.
- ❖ Established data validation and error-handling procedures, improving data reliability and reducing troubleshooting time by 30%.

Data Lake Implementation for Customer Analytics

Technologies Used: Amazon S3, Athena, Redshift, CloudWatch

- ❖ Set up a data lake in Amazon S3, organizing raw, processed, and curated data for customer analytics.
- ❖ Configured Athena queries to enable ad-hoc analysis on large datasets stored in S3, reducing Redshift load.
- ❖ Created CloudWatch alarms to monitor data pipeline health and storage usage, proactively addressing performance issues.

EDUCATION

Qualification	Institution	Location	Period
BE - Information Technology	Annamalai University	Chidambaram	June 2011 - May 2015
Higher Secondary	Government higher secondary school	Chidambaram	Mar 2011
Secondary School Certificate	Government higher secondary school	Chidambaram	Mar 2009
