

PRATIK GOHIL

Software Developer

+91 8238284896 pratikgohil64@gmail.com <https://www.linkedin.com/in/pratik-gohil-1a8a6614b> Ahmedabad

EXPERIENCE

Software Developer (C++)

Mantra Softech India Pvt Ltd 06/2022 - Present Ahmedabad

- Design and Developed an end-to-end video streaming platform, handling real-time video capture, processing, and transmission.
- Worked with industrial/IP cameras, optimizing video pipelines using C++, OpenCV, FFmpeg, and GStreamer.
- Implemented video encoding (H.264, H.265), streaming protocols RTP and RTSP for low-latency performance.
- Strong knowledge of Linux environments, including development, debugging and working with MQTT protocol.
- Collaborated with business and UI teams to ensure seamless integration, scalability, and an optimal user experience.
- Proficient in C/C++ and Python, enabling seamless integration of AI/ML-based enhancements such as object detection, face recognition, and motion analysis into the streaming workflow.
- Familiar with fast paced agile environments (Scrum) for Software/Modules Development.

Engineer (C / C++)

Analog and Digital Labs india Pvt Ltd

12/2019 - 05/2022 Ahmedabad

- Developed a real-time traffic signal control system using a dedicated embedded controller, optimizing signal operations based on live traffic data
- Worked on low-level driver development to interface with LED signal controllers, timers, and communication modules.
- Experience In C/C++ to create software solution for embedded domain.
- Utilized version control systems (Git) and CI/CD pipelines to streamline Development Processes.
- Designed data communication protocols for interfacing with central traffic monitoring systems

EDUCATION

BE: Electrical Engineering

A D Patel Institute of Technology

06/2015 - 06/2018

GPA
7.41 / 10

TECH STACK

C++	Python	Docker	Linux
Gstreamer	Cloud Video streaming		Git
Bitbucket	Jira	OpenCV	SQL

PROJECTS

Mikshi - Video streaming

11/2022 - Present Ahmedabad

Summary

- Created a video streaming system on NVIDIA Jetson , Orin NX
- Leveraged OpenCV for real-time video processing and enhancement with RTSP.
- Achieved seamless integration of hardware and software components for optimal streaming performance

BIologon -Advanced Authentication System

01/2022 - 04/2023 Ahmedabad

- Summary

- Developed "BIologon" using PGina and fingerprint authentication.
- Integrated smart card logins for enhanced security
- Collaborated with teams to design, develop, and deploy the solution.

CERTIFICATION

- Machine Learning with Python
Coursera
- Machine Learning Specialization
Coursera
- Face Detection with OpenCV in Python
Great Learning.
- Introduction to Neural Network and Deep Learning
Great Learning
