

To secure a challenging Site Reliability Engineer position within a leading Information Technology organization where extensive experience in incident management, monitoring and observability, and infrastructure and application performance monitoring can contribute to ensuring high system availability, reliability, and performance.

Professional Summary

- Managed high-priority incidents and participated in root cause analysis, implementing preventative measures for improved system stability.
- Developed and implemented monitoring and alerting solutions using industry-standard tools like Dynatrace, Grafana, Prometheus, and PagerDuty to ensure system health and performance.
- Automated operational tasks and workflows, optimizing system performance and resource utilization.
- Collaborated with development teams to troubleshoot and resolve complex technical issues impacting application and infrastructure performance.
- Configured and maintained cloud infrastructure, ensuring high availability and security.

Work Experience

- Sep 2024-Aprl2025

Site Reliability Engineer

Trigent Software

Site Reliability Engineer

 - Spearheaded the monitoring of error codes and error messages, leveraging Grafana dashboards to ensure seamless system operations and rapid issue identification within the JPMC project.
 - Proactively handled P0 and P1 incidents, showcasing adeptness in swiftly resolving critical issues and minimizing system downtime.
 - Demonstrated expertise in troubleshooting and resolving intricate workflow errors within vROs and VCs, enhancing operational efficiency and workflow stability.
 - Utilized deep knowledge of the Linux environment to conduct effective troubleshooting, ensuring system stability and reliability.
 - Took ownership of managing Statuspage notifications for both internal and external customers, ensuring transparent and timely communication regarding system health and incidents.
 - Played a crucial role in analyzing health check reports for vROs, enabling proactive identification of potential issues and ensuring system stability.
 - Streamlined system administration tasks by proficiently updating the VCSA backup in JSON files, ensuring efficient backup management and system restoration capabilities.
 - Maintained robust security practices by creating and executing Change Requests, diligently managing roles, and permissions to safeguard system integrity.
 - Leveraged version control best practices by diligently updating backups in Bitbucket and Jumphost, ensuring codebase integrity and enabling seamless rollback capabilities.

Achievements:
Enhanced existing service monitoring tools through strategic integrations, automation enhancements, and cross-functional collaboration, resulting in improved system visibility and reduced incident resolution times.
- Feb 2022 - Apr 2024

SRE Engineer

VMware Software India Pvt Ltd

SRE Engineer

 - Successfully resolved P0 and P1 incidents as part of the VMware Command Center (VCC) team, minimizing service disruptions and ensuring a seamless experience for VMware customers.
 - Utilized Dynatrace and Grafana to meticulously troubleshoot and resolve alerts, effectively collecting and analyzing logs from vROs and VCs to identify root causes and implement permanent solutions.
 - Maintained system stability through effective troubleshooting within the Linux environment, swiftly resolving issues and minimizing downtime.
 - Developed comprehensive troubleshooting runbooks, enabling efficient knowledge sharing and rapid incident resolution within the team.
 - Proactively managed Statuspage notifications for both internal and external customers, ensuring transparent and timely communication regarding system status and incident updates

- Created detailed documentation, runbooks, and standard operating procedures for crucial infrastructure and operational processes, enhancing team efficiency and fostering consistency in operational tasks.
- Played a key role in ensuring the uninterrupted continuity of VMware SaaS services, minimizing the impact of disruptions through proactive monitoring, incident response, and participation in on-call rotations.

Achievements:

- Streamlined incident response workflows by actively participating in incident analysis, identifying root causes, and implementing preventative measures to minimize recurring issues.
- Leveraged expertise in Jira and Confluence to enhance team collaboration and knowledge sharing, ensuring efficient bug tracking, project management, and documentation practices.

May 2021 - Oct 2021

Software Engineer

Incedo inc (Pune)

Software Engineer

- Ensured seamless software development lifecycles by effectively resolving VersionOne issues, prioritizing and addressing requests based on urgency and impact.
- Managed Git repositories, ensuring smooth collaboration and version control by providing access to the development team, creating new repositories, and diligently maintaining existing ones.
- Administered Artifactory, efficiently handling administrative tasks such as repository creation, deletion, renaming, tagging, and data management to optimize artifact storage and retrieval processes.
- Successfully upgraded and maintained SCM tools, ensuring optimal performance and functionality. Installed new build agents and servers to enhance the efficiency and scalability of the build and deployment pipeline.
- Maintained the stability and reliability of the CI/CD pipeline by proactively troubleshooting build failures in TeamCity, minimizing disruptions, and ensuring timely software delivery.

Achievements:

Successfully implemented efficient monitoring practices to ensure the optimal performance and health of applications and underlying infrastructure, ensuring high availability and minimizing downtime.

Nov 2015 - Sep 2019

Software Engineer

Amazon Development Centre (India) Pvt. Ltd.

Software Engineer

- Managed and monitored application health, performance, and availability, ensuring optimal operational efficiency and minimal downtime.
- Leveraged Jenkins to flawlessly manage continuous integration for various projects, enabling automated builds, tests, and deployments to streamline the software development lifecycle.
- Maintained the integrity and organization of source code repositories through regular updates, ensuring a reliable and well-structured codebase for collaboration and version control.
- Implemented and managed JIRA workflows, including project-specific workflows, to streamline task management, bug tracking, and project progress monitoring. Carefully administered user permissions for various tools based on project needs and team roles.
- Supported parallel development efforts by implementing branching strategies in TFS (Team Foundation Server), enabling multiple teams to work efficiently on the same codebase without conflicts.
- Utilized Maven to automate the build process for new projects, creating POMs (Project Object Models) to define project builds and dependencies, streamlining and standardizing the build process across projects.

Achievements:

- Successfully integrated SonarQube into the CI/CD pipeline with Jenkins to enable continuous code quality inspection, resulting in improved code quality, reduced technical debt, and increased maintainability of software projects.
- Proactively verified application logs and collaborated with various teams to effectively troubleshoot and resolve issues, minimizing service disruptions and ensuring a stable and reliable application environment.
- Successfully provisioned and maintained AWS EC2 instances, managing storage resources to meet project requirements, while ensuring optimal resource utilization and cost-efficiency.
- Collaborated effectively with the development team to resolve software configuration management issues, ensuring smooth and error-free software builds, releases, and deployments.

Education

BE Computer Science- 2012

AIT, Chickmagaluru

Skills

Core Competencies: Monitoring & Observability, Incident Response & Management, Cloud Infrastructure, Automation & Scripting,

Performance Optimization

Soft Skills: Problem Solving, Communication, Collaboration, Adaptability, Teamwork, Time Management, Analytical Skills, Attention to Detail, Proactive, Troubleshooting

Hobbies

Tech Blogs, Open Source, Cloud Computing, Problem Solving
