

Praveen Kumar V

Java Full Stack Developer

Address Bengaluru, KA 560049

Phone +91 9632229900

E-mail praveenkumarv147@gmail.com

A Dynamic Professional with 7.2 Years of Rich Experience in Software Development, strong problem solving & Technical skills. Personable Software Developer accustomed to heading up successful development teams through Agile Direction and careful delegation. Brings both cutting-edge programming expertise and Exceptional interpersonal skills to leadership roles. Well-Qualified Full Stack Developer familiar with wide range of programming utilities and languages.

Work Experience

Over 7.2 Years of Full Stack Software Designing , Development and Engineering Experience for Enterprise and Hybrid Mobile platforms.

- Working for **Mphasis limited, Bangalore** as a **Senior Software Engineer** from August 2024 to Till Date .
- Worked for **Mphasis limited, Bangalore** as a **Software Engineer** from Feb 2020 to July 2024.
- Worked for **Unit Force Technologies, Bangalore** as a **Trainee Software Engineer** from Nov 2019 to Feb 2020.
- Worked for **InKnow Tech Pvt Ltd Bangalore** as a **Support Engineer** from May 2018 to Oct 2019.

Education

2017-06 **BE in Electronics And Communication Engineering: Electrical, Electronics And Communications Engineering**

K S School of Engineering And Management - Bengaluru, India

Work History

2020-02 - **Senior Software Engineer**

Current Mphasis Limited, Bangalore, India

- Designed and Developed UI Screens for multiple enterprise products with high quality and User Experience.
- Identified value opportunities to exploit product for maximum business effectiveness.

- Investigated system issues and implemented resolutions to reduce downtime.
- Guided teams during continuous integration / continuous delivery (CI/CD) processes.
- Supervised architecture, design and implementation of company-wide platforms and applications.
- Defined parameters for API and data acquisitions.
- Led several DevOps teams engaged in software development for enterprise applications.
- Improved systems with addition of new features and infrastructure.
- Enhanced interfaces to promote better functionality for users.

2019-11 -
2020-02

Trainee Software Engineer

Unit Force Technologies, Bangalore, India

- Worked with project managers, developers, quality assurance and customers to resolve technical issues.
- Trained and mentored junior developers and engineers, teaching skills in Java and Javascript Technologies and working to improve overall team performance.
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.
- Managed over 3 Teams and Coordinating other teams for Technical and other issue resolutions.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Worked with development teams to correct problems and run test scenarios.
- Practiced and encouraged respectful and transparent communication in interactions.
- Developed robust, scalable, modular and API-centric infrastructures.
- Provided direction and guidance to process improvements and established policies.
- Coordinated efficient large-scale software deployments.
- Participated in architecture, design and implementation of back-end features using Java and Javascript Technologies

2018-05 -
2019-10

Support Engineer

InKnowTech Pvt Ltd, Bangalore, India

- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Updated old code bases to modern development standards, improving functionality.
- Architected data engineering pipelines to support machine learning performance.
- Developed software for desktop and mobile operating systems.
- Designed intuitive graphical user interfaces to improve user experience.
- Designed customized solutions for proposals to potential customers.
- Led version control efforts for organization, employing public and open source repositories.

Skills

Javascript		Very Good
Angular		Very Good
Java		Very Good
Spring boot		Very Good
Agile Methodology		Excellent
Product development		Very Good
Technical Analysis		Very Good

Technology Exposure

Languages: C, Java, Typescript, Javascript

J2EE Technologies: Servlets, JSP

Web Technologies: HTML, CSS, Handlebars, Webservices, Websockets

RDBMS: Oracle, MySQL, PostgreSQL

J2EE Frameworks: Struts, Spring, Spring Boot

Database Connectivity: JDBC, JPA, Hibernate

Unit Testing: JUnit, Mockito, Karma-jasmine, qunit

Test Automation: Cypress, Selenium

Web Server: Apache Tomcat Server, JBoss, ESB Fuse source, ESB (Service mix).

IDE: Eclipse Juno, NetBeans, IntelliJ, Visual Code, Sublime text, Atom, and WEB-STORM

Build Tools: Ant, Maven, Gradle, Gulp, Grunt Yeoman

ArtifactManagement: jFrog Artifactory

CI/CD Tools: Jenkins, Hudson

WEB Ui Frameworks: JQuery, DOJO, GWT, Angularjs, Angular, Reactjs, VueJs, Emberjs

Hybrid Development: Cordova, Ionic, Redux

NO-SQL: MongoDB, Couch db

CLOUD Infra: AWS, Microsoft Azure, VMWare VCloud, GODADDY, Interserver Cloud VPS

Languages

English		Very Good

Projects Handled

Contributed on various software product developments by collaborating with marketing, technical and business analysis specialists throughout the product-development process, And combines design, business and engineering skills to create products that meet both market and production requirements. the Major Products detailed below product by product:

Product-1 Studio 2.0 (Wipro HOLMES)

Name: Studio 2.0 (Holmes Automation Studio)

Client: Wipro Holmes

Duration: Feb 2020 to Till date

Team Size: 17

Role: Senior Software Engineer.

Product summary: Wipro HOLMESTM Platform is a one stop applied Artificial Intelligence (AI) and Automation platform which empowers enterprises to easily and quickly build and deploy intelligent solutions for their digital and automation journey. The platform offers robust, carefully curated frameworks like Cognitive Search, Cognitive Image Processing, Deep Text Extraction, Mimictron- Intelligent Process Automation, Wipro HOLMES Chat along with Cognitive Services from its ecosystem partners. Its Automation Marketplace enables easy and efficient consumption of these services in customer's hyper automation journey. The platform is offered with Automation Studio, an integrated development environment that helps digital and automation experts to build quick end to end process automation solutions and use them in their day to day applications. An inbuilt metering and governance framework is also an integral part of the platform, to ensure transparency of usage, efficiency and productivity, while maintaining compliance to appropriate and relevant corporate and regulatory policies and guidelines.

Technical Specs:

Frameworks – Spring Boot Micro Services, Python Django, Python Flask

UI Framework - Angular,

Backend - java, python

Database – postgresSQL

Responsibilities:

- Involved on user behavior designed to improve the visible design of an application.
- Design, build, and maintain highly reusable JavaScript, Angular, HTML and CSS code.
- Participating design and code reviews and make sure the code quality up to the mark.

- Organizing Technical discussions for team to up skilling and improve best practices
- Developing Web pages with Angular and Redux
- Involved integrating Spring boot web services, web sockets and python based services
- Configuring and maintaining NGINX server for Micro services
- Writing Selector, Reducer, Integration and Unit testing
- Maintaining staging and release versions
- Create and maintain digital assets, such as interface design files, wireframes, and interactive mockups
- Participating on strategic agile planning for creating road maps and backlog estimations
- Delegating the work with team and monitoring and mentoring to achieve the targets.
- Worked on angular version migrations and end to end regression test goals

Product -2 Netwitness Endpoint (RSA)

Name: RSA Netwitness Endpoint

Client: RSA Security

Duration: Nov 2019 - Feb 2020

Team Size: 25

Role: Software Engineer

Product summary:

RSA NetWitness Endpoint is an endpoint detection and response solution that employs a combination of live memory analysis, continuous behavioral monitoring, and advanced machine learning to detect known, new, unknown, and non-malware threats that other solutions miss entirely. RSA NetWitness Endpoint helps focus investigations amid thousands of alerts and offers 3X the impact for security teams by considerably reducing attacker dwell time and accelerating threat response.

Technical Specs:

Frameworks – RSA Launch, Web Services, Spring boot micro services.

UI Framework - Emberjs

Language - java. Database – Mongo dB

Responsibilities:

- Involved Designing and Coding.
- Developing Web pages with Emberjs and Redux.
- Involved integrating Spring boot web services and web sockets.
- Configuring NGINX server for Micro services.
- Developing UI Screens to the UI Wireframes.
- Writing Selector, Reducer, Integration and Unit testing.
- Maintaining staging and release versions.

Product - 3 Supply Chain Management (Causeway)

Name: Supply Chain Management (Exchange)

Client: Causeway Technologies Pvt Ltd.

Duration: May 2018 - Oct 2019

Team Size: 15

Role: Software Engineer

Product summary:

MyRegister is an online supply chain management software system for managing suppliers and sub-contractors in the construction industry. As such, it improves the efficiency of vendor management and PQQ management while reducing the risk of accrediting and managing your supply chain.

Used by some of the largest companies in the construction sector, MyRegister goes beyond traditional supplier portals and PQQ management software. It provides a comprehensive supply chain management solution that captures and shares performance information, improves execution of contracts and helps form closer working relationships with the right partners.

Technical Specs:

Frameworks - Struts, Web Services.

UI Framework -jQuery

Language - java.

Database – Oracle, Mongo dB

Responsibilities:

- Involved Designing and Coding.
- Developing Tradex framework on top of Struts
- Involved integrating with workflow jbpmm
- Involved 10DUKE integration for license management
- Involved on migration of product from struts 1 to struts 2
- Developing JSP according to the UI Wireframes
- Unit testing
- Maintaining staging and release versions
- Scrum master in the agile team.
