Key skills	Experience
RPA Developer	2.6 Years
Blueprism	2.6 Years

Profile

With 2.5 years of experience in the IT field, I have specialized in the development of Robotic Process Automation (RPA). My particular expertise lies in creating automation solutions using Blue Prism and UiPath. Additionally, I have demonstrated proficiency in integrating automation with web applications, Excel files, and Outlook.

Professional Experience

RPA Developer

2022/01 – 06/2024

Unosis IT Solutions Pvt Ltd

- Work with business and technology teams to understand business processes, assess automation feasibility, develop solutions, and monitor the rollout of these solutions including RPA proof of concepts

- Approaches development from a modular point of view, ensuring reusability and ease of maintenance
- Perform testing of the solution following standardized test practices
- Support teams during UAT and Production/Pilot phases
- Identifying and communicating the technical infrastructure requirements to deploy automation solutions
- Proactively manage changes in project scope, identify potential crises, and devise contingency plans
- Working on Excel, Outlook, Web Portals, Windows-based applications, etc.,
- Work within project planning constraints, communicating any identified project risks and issues to the delivery/project manager accordingly and providing inputs to the change control process
- Maintain documentation according to firm standards, best practices, and standard operating procedures
- Provide early visibility and mitigation of technical challenges throughout the journey

Projects

Material Management Pakistan

Project Description: Download three reports from SAP, perform VLOOKUP operation in Excel, generate the report, and send an email to Business. This bot should run for 10 different plants and the business rule is the same for all the bots. So, we have designed a single process and made the Plant name a startup parameter. Used multiple sessions concept in SAP while extracting the data.

Extracting Cloud reports for Various Clients

Project Description: The project overview involves Accessing the Client web server with their Credentials and extracting their report. The Bot will get triggered Once the mail is received with the particular Codes, and the User Credentials for a particular client for Login will be accessed, Fill in the Respective client details received via mail. A detailed report from the Web will be extracted and Bot will send the report as an attachment to the particular Client Id's through Mail.

Central GRN

Project Description: The business will trigger the mail with Excel to the bot. The bot will create the GR for all the POs which is shared and send the RC Number back to the requester. Stored all the processed data in data base for future reference.

Education

B.E - Civil Engineering

Alva's Institute of Engineering & technology, VTU

Skills

Tools

Blueprism 7.1.1, UiPath, VB, C#, Visual Studio,

Web Development

HTML5 & CSS3, Python(Basics)

Application Suite

Microsoft office tools, Primavera

Soft Skills

Problem-solving, Time Management, Attention to detail, Self-Motivation, Analytical Thinking, Creativity.

Certificates

UiPath Academy Automation Developer Associate Training

Adobe Experience Manager Training- Udemy 
AEM 6.5

Blue prism certified Developer – AD01
