

PRAVEEN T

SUMMARY

Skilled mobile application development experience with 4.7 years of multiple programming languages such as Objective-C, Swift, and design frameworks. Brings knowledge to contribute and skills to produce quality applications with consistent on-time deliveries. Offers an eye for design details and analytical abilities to identify and prevent missteps.

EDUCATION

Bachelor of Engineering: Electronics And Communications, 01/2018

Sri Krishna College of Technology

CGPA: 6.5

Certificate of Higher Education: Bio-Maths, 01/2014

Sri Gopal Naidu Higher Secondary School - Coimbatore, TN

Percentage: 79.4

EXPERIENCE

iOS Developer – Software Engineer, 05/2019 - 01/2024

Clarivate Analytics - Bengaluru

- The Publisher application is a pivotal tool used by customers to dynamically generate templates based on specific criteria selection
- These criteria primarily encompass Region, Custom Headers, Health Plans, Payers, and other pertinent parameters
- The resultant PDF templates serve as crucial resources utilized by Medical Representatives from Insurance Companies to outline marketing plans and coverage strategies for selected drugs across different regions
- Developed various screens within the Publisher application using Swift, ensuring intuitive user interfaces and seamless navigation
- Implemented functionality to consume RESTful APIs, enabling communication between the iOS app and backend services
- Leveraged Swift's modern features and design patterns to build robust and efficient code for the mobile application
- Collaborated closely with designers to translate UI/UX designs into functional app interfaces, maintaining consistency and user experience standards
- Conducted thorough testing and debugging to identify and resolve issues related to screen layout, data presentation, and API integration
- Maintained awareness of the latest iOS development trends and best practices to incorporate cutting-edge features and optimizations into the app
- Actively contributed to architectural discussions and decision-making processes to ensure scalability and maintainability of the iOS application
- Provided support and guidance to junior developers, facilitating knowledge sharing and skill development within the team
- Participated in regular code reviews and refactoring efforts to improve code quality, performance, and maintainability of the app.

HOBBIES AND INTERESTS

- Watching and Playing Cricket
- Interest in India local politics

- Organised sample data tests to measure compliance of programme outputs with design objectives.
- Used Agile development methodologies as part of continual software evolution and innovation.
- Supervised and mentored junior programmers and developers, enhancing overall team capabilities and competencies.
- Simplified client specifications into logical steps for project plans to achieve timely deliveries and meet requirements.

ACCOMPLISHMENTS AND AWARDS

- Recognized by management for Incyte projects delivering outstanding in my ownership.
- Successfully migrated Publisher App Objective-C code base into Swift Codebase.
- Updated and implemented Swift Package Manager (SPM) for Publisher App.
- Accived CI-CD for Publisher Application.

CERTIFICATIONS

- iOS & Swift - The Complete iOS App Development Bootcamp certified

PROJECTS

Fingertip Drug Coverage Application

The Drug App project aimed to revolutionize pharmaceutical marketing strategies by leveraging mobile technology. Built using Flutter, the application targeted Android, iPhone, and iPad platforms, offering a unified solution for showcasing drug information and coverage details to potential customers. Its primary objective was to provide a comprehensive and engaging demo app that effectively highlighted the features and benefits of various pharmaceutical products. The app aimed to enhance customer engagement and facilitate informed decision-making in the pharmaceutical industry by integrating real-time data and intuitive user interfaces.

Responsibilities:

- Spearheaded the development of the Drug App using Flutter, ensuring cross-platform compatibility and consistent user experience across Android, iPhone, and iPad devices.
- Designed and implemented features to create a demo app showcasing drug information and coverage details for targeted customers.
- Collaborated closely with designers to create visually appealing and intuitive user interfaces that effectively communicated drug features and benefits.
- Integrated APIs and backend services to fetch real-time data for drug information and coverage details, ensuring accuracy and relevance
