Snowflake Developer

Professional Summary:

- Around 8.10 years of professional experience in Information Technology with progressive development and implementation of various Data Warehousing projects.
- **Snowflake:** Hands-on experience in Snowsight, SnowSQL, File Ingestion, Different Stages and Tables, Loading the data from AWS and Azure Cloud, Multi-Cluster warehouse, Copy Into command, SnowPipe, Resource Monitor, Micro-Partition, Cache, Time Travel, Stream (CDC), Task, Zero Copy Cloning, Secured View, Materialized View, Data Masking, Data Sharing, External Table, Sequences, Stored Procedure with JavaScript, UDFs.
- **SQL:** Strong Proficient in SQL and creation / modification of database objects like different clauses, Operators, Scalar Functions, Group Functions, Windows Functions, Context Functions, Table Functions – Validation, Validation Mode, Validation Pipe Load, Common Table Expression, Joins and Subqueries.
- **AWS:** Good Knowledge on Amazon Web Services (AWS), Integration between the AWS and Snowflake, Hands-on experience in storing the data to S3 location, Providing the access to other roles using IAM.
- **Azure:** Good Knowledge on Azure Integration with Snowflake, Blob Storage, Notification Event creation.
- Having Good experience on external tables, altered tables to add columns, properties, Constrains, Sequences as per requirement.
- Worked in multiple environments like DEV, QA, PROD.
- Extensive experience in Querying using Joins, Sub queries and correlated sub queries, Analytical functions to retrieve data from database.

Technical Skills:

- **Database:** Snowflake, Oracle, Data Warehouse, SQL
- **Cloud:** AWS, Azure
- **Microsoft:** Word, Excel, PowerPoint
- **OS:** Windows,
- **Scheduler:** Task, Tidal
- **Tools:** ServiceNow
- **Methodology:** Agile

Professional Experience:

- **Company: LTIMindtree.**
- Period: Mar 2024 to Till
- Project Name: Network Data Enabler
- Designation: Specialist Data Engineer
- Project Description:
 - Migrating data from multiple SAP legacy system and some different snowflake system (which are managed on different server) to CDH Snowflake.
 - It was taking months to extract local site data from these source systems to load and build the model & reporting layers in reporting system. So, this was all time consuming and lot of manual efforts for business client.
 - NDE project plan to centralize different source system to Central data repository CDH. It is reducing the manual efforts in building network models with in reporting system by automating the data ingestion & curation process from different cloud(Azure Data Factory) and ON-PREM data platform.
- **Company: Hexaware Technologies.**
- Period: Jan 2022 to Mar 2023
- Project Name: Banking Operation
- Designation: Subject Matter Expert
- Project Description:
 - Responsible for Migrating Marketing Data Mart from Oracle to Snowflake cloud
 - Good experience in integrations between Azure or AWS with Snowflake.
 - Strong experience in writing complex SQL queries using analytical functions.
 - Good knowledge of Data Sharing in Snowflake.
 - Strong Understanding of Snowflake Architecture and experience in Snowflake features like Clone, Time Travel, Stages, fail safe Multi-Clustered Warehouse, Streams and Tasks, Role based Access Management, UDF's.
 - In-depth understanding of different kinds on caching in Snowflake
 - Strong working experience in Snowsql.
 - Applied optimization techniques on each query wherever possible.
- **Company: Standard Chartered bank**
- Period: Aug 2017 to Jan 2022
- Project Name: Banking Reconciliation process
- Designation: Senior Officer
- Project Description:
 - Developed a data pipeline using Snowflake and AWS, resulting in a 40% reduction in data processing time
 - Optimized Snowflake data warehouse query performance by 30% through the implementation of materialized views and strategic clustering.
 - Automated ETL processes using Snowflake Procedure and Tasks, leading to a 25% increase in data refresh frequency.
 - Supported Oracle production and deployment at customer site.
 - Provided helpdesk services to include resolving issues and elevating defects.

- **Company: Vanguard Global logistics**
- Period: June 2013 to Dec 2014
- Designation: Data Analyst
 - Developed and maintained SQL queries to extract and manipulate data from large-scale data warehouses
 - Conducted thorough data analysis to identify trends, patterns, and anomalies
 - Created interactive dashboards and reports using Excel.
 - Collaborated with cross-functional teams to understand business requirements and translate them into data-driven solutions
 - Presented findings and insights to stakeholders, including executives, to support strategic decision-making

- **Company: Sworks Technology solution pvt ltd**
- Period: July 2012 to Apr 2013
- Designation: Web application Developer
 - Good exposure in PHP, My SQL, Magneto and Open kart
 - Experience in software life-cycle
 - Better experience in on time project delivery

Awards & Achievements:

- Received appreciation from client for on-time completion of Release 1.
LTIMindtree
- Received Star performer award on June 2022
Hexaware Technologies
- Received quarterly minimum 2 appreciation from the manager
Hexaware Technologies

Educational Qualifications:

- B.E (CSE) from St. Joseph's college of Engg & Tech 2007-2011 With 68%
- HSC from Our Lady of Lourdes Girls HSS during 2005-2007 with 76%
- SSLC from Our Lady of Lourdes Girls HSS during 2004-2005 with 81%

Personal Detail:

- **Nationality:** Indian
- **Address:** Mugalivakkam, Chennai
- **Languages known:** English, Tamil
