

## PROFESSIONAL SUMMARY

- A dedicated and results-driven Backend Developer with 3 years of experience in building scalable and secure server-side applications. Proficient in Node.js, Express.js and NestJS, with a strong background in developing RESTful and GraphQL APIs.
- Experienced in front-end development with HTML, CSS, and Bootstrap, and skilled in database design and optimization (PostgreSQL, MySQL, MongoDB).
- Expertise in securing applications with JWT and OAuth, and proficient in cloud platforms like AWS and Azure, with hands-on experience in Docker, Kubernetes, and CI/CD workflows.
- Passionate about collaborating with cross-functional teams to deliver high-performance solutions.
- Expert in Node.js, Javascript, TypeScript, NestJs and HTML/CSS.
- Expertise in designing and building scalable, high-performance systems using Node.js, TypeScript, and microservices architecture. Proficient in MySQL, RESTful APIs, and cloud-based deployments.

## TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML & CSS
- **Backend Frameworks:** Node.js, Express.js, NestJS
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **APIs:** RESTful, GraphQL
- **Authentication & Security:** JWT, OAuth, Role-based Access Control (RBAC)
- **Version Control:** Git, GitHub, GitLab
- **Cloud Platforms:** AWS (EC2, S3, Lambda), Azure
- **Tools:** Docker, Kubernetes, Jenkins, Postman
- **Testing:** Mocha, Chai, Jest
- **Agile Practices:** Scrum, Jira

## PROFESSIONAL EXPERIENCE

### Techouts Solution Pvt Ltd

#### Software Developer

March 2022 – Present

#### Responsibilities:

- Developed scalable APIs using Node.js, Express.js, and NestJS, ensuring high performance and reliability for client-facing and internal applications.
- Designed and optimized relational databases (PostgreSQL, MySQL) and NoSQL databases (MongoDB) for efficient data retrieval.
- Implemented secure authentication mechanisms, including OAuth and JWT, while adhering to best security practices.
- Streamlined application deployment using Docker and automated workflows with CI/CD pipelines.
- Collaborated with cross-functional teams—frontend developers, QA engineers, and product managers—to deliver robust solutions within tight deadlines.

## PROJECTS

### **1) SSBeauty Microservices System**

- Implemented and developed a dynamic serviceability logic to calculate Estimated Delivery Date based on store opening and closing times, including store acceptance and processing Turnaround Time (TAT).
- Integrated Qwiksilver APIs using GraphQL for publishing gift cards and adding amounts to user wallets and implemented loyalty APIs integration for first citizen enrollment.

### **2) Shoppers Stop Marketplace Order Management System**

- Developed and managed a marketplace platform to handle orders received from AWS SQS queues and improved order handling efficiency, enabling seamless order flow and inventory synchronization
- Processed order creation, managed real-time inventory updates, and implemented order status updates.

### **3) e-Campus**

- Developed responsive web pages using HTML, CSS, and Bootstrap, ensuring a user-friendly interface and optimized layout across various devices for seamless user experience.
- Designed and implemented interactive UI elements, including product listings, filters, and book details pages, while maintaining consistent styling and enhancing overall platform usability.

### **EDUCATION**

- B. Tech in Electrical and Electronics Engineering at Sri Ramakrishna Institute of Technology, Coimbatore, April 2021 with 75%.
