

PRIYA

Software Test Engineer

Email: priyahk8747@gmail.com | Phone: 7483243495

ABOUT ME:

Throughout my career, I have developed a passion for working with cutting-edge technologies, particularly in the realm of server storage systems and various Dell Wyse thin clients. My experience has enabled me to acquire a comprehensive understanding of the intricacies involved in testing and ensuring the performance, reliability, and security of storage solutions.

As a highly analytical individual, I possess a keen eye for detail and a dedication to delivering top-notch results. I am adept at designing and executing comprehensive test plans, identifying potential issues, and collaborating with cross-functional teams to implement effective solutions. My proficiency in creating various virtualization environments for storage systems and troubleshooting modern server architectures further bolsters my capabilities in ensuring seamless server storage operations.

Having closely followed industry-leading innovations, I am excited about the prospect of contributing my skills and knowledge to your esteemed organization. I believe that my technical acumen, coupled with my collaborative nature, aligns perfectly with the vision and mission of your organization.

CORE COMPETENCIES:

- Manual Testing / JIRA
- SDLC / STLC / Bug Life Cycle
- FC / iSCSI / SATA / SAS
- Python, Selenium, VMware vSphere
- Firmware / BIOS, UEFI, BMC, PCIe, Memory and CPU
- RAID technologies
- Operating systems - Linux, Windows and VMware ESXi

PROFESSIONAL EXPERIENCE:

Dell Technologies | Test Engineer | Bangalore | November 2021 - Present

- Executed the developed automation test content and monitoring the results by analysing the logs and identifying/noticing the script failure through Python programming.
- Maintained server environments and performed systems administration for Linux and Windows.
- Collaborated with cross-functional teams to provide technical support.
- Managed virtualization environments, including VMware and Hyper-V.
- Conducted comprehensive testing of various firmware, BIOS, and device drivers.
- Performed functional, regression, system, and non-functional testing.
- Administered RAID levels and managed storage protocols like SCSI, iSCSI, SAS, SATA, NVMe, and SSD.

AGIMUS Technologies Pvt Ltd | Software Test Engineer | Sep 2020 - Oct 2021

- Conducted functionality, system, regression, and stress testing.
- Identified, reported, and tracked bugs.
- Updated BIOS, firmware, and device drivers across various operating systems.
- Implemented and validated RAID technology.

EDUCATION:

Bachelor of Engineering (2015-2019)

STJ Institute of Technology (VTU Belgaum)

PROJECTS:

End-to-End Validation on DELL Wyse Thin OS Platforms

- Performed feature, sanity, and regression validation on various Thin OS Platforms.
- Developed and executed test plans and scripts for BIOS functionality.
- Conducted regression testing and documented test results.
- Provided hardware-related insights and technical documentation to support BIOS validation.
- Collaborated with the development team to clarify and resolve project-related issues.

Validation of NVMe RAID/HBA/BIOS/Firmware

- Validated NVMe RAID/HBA Controller Card/BIOS across supported server platforms and protocols.
- Validated RAID technologies with extensive features on different Operating systems.
- Conducted extensive testing, including stress scenarios.
- Reported and tracked defects using JIRA and provided necessary logs for resolution.

ACHIEVEMENTS:

- Received appreciation from the client for timely project completion.
-

TECHNICAL SKILLS:

- Programming Languages: Python
 - Operating Systems: Linux (RHEL, SLES), Windows, ESXI
 - Virtualization: VMware, Citrix, RDSH, Hyper-V
 - Storage Protocols: SCSI, iSCSI, SAS, SATA, NVMe, SSD
 - Tools: JIRA, TestRail, IO Meter
-

ADDITIONAL SKILLS:

- Installation and maintenance of packages using RPM and YUM.
 - OS hardening and vulnerability assessment.
 - Network protocols including DHCP, DNS, FTP, NFS, and proxy server.
 - Hands-on experience with Zoning, LUN mapping, LUN masking, and Multipathing.
-

I am eager to further discuss how my qualifications make me an asset to your team. Thank you for considering my application. I look forward to the opportunity for an interview to explore how I can contribute to the continued success of your organization.

Place: Bangalore
