PROFESSIONAL SUMMARY

Compliance Analyst with 5.3 years of hands-on experience in SOC 2 Type II, ITGC audits, ISO 27001:2022 implementation, and Third-Party Risk Management (TPRM). Experienced in managing end-to-end audit lifecycles, identifying control gaps, and ensuring regulatory compliance across complex IT environments. Proven ability to streamline evidence collection, enhance audit preparedness, and drive timely remediation. Well-versed in tools like Jira, Confluence, and ServiceNow, with a strong focus on delivering actionable insights and fostering a culture of continuous compliance.

Professional Experience

Compliance Analyst - HCL - May 2022 - Till Date

- Led and executed end-to-end SOC 2 Type II audit programs, ensuring compliance with AICPA Trust Services Criteria across multiple business units.
- Developed and maintained SOC 2 compliance documentation, including control narratives, process flows, and evidence artifacts for auditor review.
- Partnered with external auditors to facilitate walkthroughs, provide evidence, and respond to audit queries, ensuring timely and successful audit closure.
- Built and managed a centralized evidence repository, streamlining audit readiness and reducing evidence collection time by 40%.
- Conducted internal SOC 2 readiness assessments, trained teams on control requirements, and improved overall audit preparedness across departments.
- Supported the integration of SOC 2 controls into broader frameworks such as ISO 27001, ITGC, and TPRM for unified compliance reporting.
- Utilized tools such as Jira, Confluence, and ServiceNow to track compliance tasks, manage audit workflows, and ensure consistent documentation.

GRC Analyst - TCS - Feb 2020 - May 2022

- Successfully managed end-to-end audit processes ensuring compliance with AICPA Trust Service Criteria.
- Partnered with external auditors to enhance evidence collection, conduct efficient audit interviews, and produce comprehensive reporting.
- Trained internal teams on SOC 2 compliance best practices, improving organizational audit preparedness and reducing findings.
- Conducted internal audits to evaluate IT control effectiveness and remediated gaps to achieve SOC 2 Type II certifications for multiple clients.
- Executed ITGC testing and control assessments across user access, change management, backup, and incident response areas for multiple audits.
- Conducted detailed walkthroughs and control evaluations, ensuring alignment with SOX and other regulatory frameworks.
- Led evidence collection and control testing efforts to support internal and external ITGC audits with minimal auditor findings.
- Led and supported Third-Party Risk Assessments to evaluate vendor compliance with SOC 2, ISO 27001, and internal security policies.
- Managed and evaluated security questionnaires (SIG, CAIQ, custom assessments) to assess vendor compliance with SOC 2, ISO 27001:2022, and internal security policies.
- Built and maintained a centralized TPRM tracking system to oversee vendor onboarding, risk classification, documentation, and periodic re-assessments.
- Verified third-party adherence to contractual security controls and regulatory requirements such as GDPR and HIPAA.
