

POWER BI DEVELOPER

PROFILE SUMMARY

Experienced Power BI Developer with 4+ years of expertise in delivering end-to-end BI solutions using Power BI, SQL Server, SSIS, and SSRS. Proficient in data modeling, ETL development, DAX, and creating interactive dashboards that support strategic business decisions. Strong background in building scalable data solutions using Star/Snowflake schemas and performance-optimized reporting. Experienced in Azure services like Azure data factory, ADLS, Azure Databricks for cloud- based data integration , transformation and analytics

PROFILE HIGHLIGHTS

- Expertise in Business Intelligence and Data Warehousing solutions using **Power BI, SQL Server, SSIS, and SSRS**.
- Strong expertise in **Data modeling**, including **Star Schema, Snowflake Schema**, Fact and Dimension tables.
- Proficient in **T-SQL** for developing complex queries, stored procedures, views, and performance tuning.
- Strong expertise in **Power Query** for custom data transformations.
- Hands-on experience in **ETL** development using **SQL Server Integration Services (SSIS)** to extract, transform, and load data from various sources.
- Designed and deployed **SSIS packages** for data integration and automation, managed via **SSIS Catalog Database**.
- Created and maintained enterprise-grade reports using **SQL Server Reporting Services (SSRS)**.
- Expertise in building interactive **dashboards** and **KPIs** using **Power BI Desktop** and publishing to **Power BI Service**.
- Skilled in writing complex **DAX** expressions for calculated columns, measures, and time intelligence functions.
- Experience in working with Power BI **Dataflows, Scheduled Refresh, Row-Level Security (RLS)**, and Workspace Management.
- Strong collaboration with cross-functional teams to gather requirements, perform **data analysis**, and deliver **end-to-end BI solutions**.
- **Azure services** including Azure Data Factory (**ADF**), Azure Data Lake Storage (**ADLS**), and **Azure Data bricks** for cloud-based data integration and transformation.
- **Snowflake** Data Warehouse for scalable data storage and analytics.

TECHNICAL SKILLS

BI Reporting Tools	-	Power BI Desktop
Database	-	SQL Server, SQL DW, Snowflake DW, SharePoint
Languages	-	DAX, SQL
ETL Tools	-	SSIS, Power Query, SSRS, Dataflows
Cloud services	-	Azure data bricks, Azure ADLS, ADF, Power BI service

EDUCATIONAL HISTORY

BACHELOR OF SCIENCE

Sri Venkateshwara University,
2017 - 2020

AWARDS

BEST TEAMMATE AWARD

At Brillio(2024)

EXPERIENCE

- Worked as a Power BI Developer in NEXUS SOFTWARE (09/2020 – 08/2024).
- Worked as a Power BI Developer in BRILLIO (Reyna Solutions pay roll) (09/2024 – 12/2024).

PROJECTS

PROJECT - SALES & MARKETING

Client - Dayforce
Company - Brillio
Role - Power BI Developer

Description:

The project is about comprehensive Sales and Marketing Dashboard to visualize key performance indicators (KPIs) for tracking sales performance, marketing ROI, and customer engagement.

Roles & Responsibilities:

- Designed and implemented Power BI Dataflows to streamline the ETL process for integrating sales, marketing, and customer data from diverse sources.
- Utilized Dataflows to clean, transform, and standardize raw data, ensuring consistency across key sales and marketing metrics for accurate and reliable reporting.
- Created multiple Power BI Datasets tailored to specific reporting requirements, supporting various business functions.
- Automated data refresh processes within Power BI Dataflows to enable real-time reporting, minimizing manual intervention and enhancing data accuracy.
- Developed complex analytical models to track KPIs such as sales growth, customer acquisition cost, marketing ROI, and campaign effectiveness, empowering leadership with actionable insights.
- Enhanced Dataflow performance through incremental refresh configurations, reducing load times and improving responsiveness for large datasets.
- Collaborated with cross-functional teams including sales, marketing, and IT to gather reporting requirements and ensure Dataflows aligned with business objectives.
- Leveraged live connections in select reports to support real-time data access and centralized data management for enhanced performance and consistency.

PROJECT - SALES REPORTING

Client - Cardinal Health- US
Company - Nexus Software Pvt Ltd.
Role - Power BI Developer

Description:

The project is about Wright Medical Group is a specialty orthopedic company that offers solutions to relieve pain and improve mobility. The project focused on maintaining sales billing and distributor sales history data. It helped track invoice details and sales rep performance, providing clear insights into sales trends and distributor activities.

Roles & Responsibilities:

- Performed end-to-end ETL processes by extracting, transforming, and loading data from multiple source systems.
- Developed efficient SQL queries to support data preparation and reporting requirements.
- Created complex DAX measures and implemented custom tooltips to enhance report interactivity and insight delivery.
- Designed and developed dynamic visualizations including Donut Charts, Pie Charts, Bar Graphs, and Tree Maps to present data effectively.
- Published reports to Power BI Service and implemented role-based security to manage user-level access control.

PROJECT - AUDIT REPORT MANAGMENT

Client - EY Solutions
Company - Nexus Software Pvt Ltd.
Role - Power BI Developer

Description:

The project is about Coupon Management System to manage the creation, distribution, and redemption of promotional coupons. It allowed easy tracking of coupon inventory across locations and automated redemptions based on set rules. The system ensured smooth transactions with distributors, added validation checks to prevent fraud, and improved overall transparency and efficiency.

Roles & Responsibilities:

- Involved in writing optimized SQL queries to retrieve and manipulate data efficiently.
- Analyzed business requirements and collaborated with project managers and technical leads to define and implement functionality.
- Designed and implemented database objects such as Tables, Functions, Stored Procedures, and Triggers in SQL Server 2008 R2.
- Performed database testing and validated SQL queries to ensure data accuracy and integrity.
- Developed SSIS ETL packages for data migration activities, enabling smooth transition from legacy systems to current systems.
- Utilized Control Flow components such as For Loop Container, For Each Loop Container, Sequence Container, Execute SQL Task, and Data Flow Task in SSIS.
- Executed end-to-end data migration from old systems to new environments, including scheduling and automation of ETL packages.
- Prepared and maintained project status reports to track progress and communicate updates to stakeholders.
