Professional Summary

Results-driven **Software Development Engineer in Test (SDET)** with **7+ years** of experience in **test automation, quality engineering, and CI/CD optimization**. Specialized in web application testing, particularly within the **Life Sciences industry**, with expertise in **Veeva Vault** and **Regulatory Information Management (RIM)**. Adept at **designing scalable automation frameworks**, enhancing test reliability, and integrating **AI/ML-driven automation** for intelligent decision-making. Passionate about **building robust automation solutions** that improve software efficiency, reduce testing time, and accelerate high-quality releases.

Core Skills & Technologies

- ✓ **Automation Framework Design** – Selenium WebDriver, Cucumber, TestNG, Rest Assured, Winium Page Object Model (POM), Data-Driven, Hybrid Frameworks.
- ✓ **Cross-Browser & API Testing** – Ensuring seamless functionality across platforms with API automation and browser compatibility validation.
- ✓ **CI/CD & DevOps** – Jenkins, GitLab, Maven, Git, SourceTree ✓ **Docker & Kubernetes** (Containerized test environments).
- ✓ **Cloud & AWS Technologies** – Experience in AWS (ECS, S3, Lambda, EC2, Containers), creating efficient test environments.
- ✓ **AI/ML in QA** – Exploring the integration of AI/ML & GenAI to enhance test automation intelligence and predictive defect analysis.
- ✓ **Project Management & Agile**– JIRA, Confluence, Testrail, Kanban/Scrum.
- ✓ **Leadership & Collaboration** – Proven ability to mentor teams, drive automation strategies, and work in Agile environments.

Core Competencies

- **Test Automation:** Selenium WebDriver, Cucumber, TestNG, Rest Assured, Winium
- **Automation Frameworks:** Page Object Model (POM), Data-Driven, Hybrid Frameworks
- **CI/CD & Version Control:** Jenkins, GitLab, Maven, Git, Sourcetree
- **Cloud Technologies:** AWS (ECS, S3, Lambda, EC2, Containers)
- **API Testing:** Rest Assured, Postman
- **Languages & Technologies:** Java, JavaScript, SQL, OOPs Concepts, Collection API
- **Testing Types:** Functional, Regression, Smoke, API, Cross-Browser
- **Project Management:** JIRA, Confluence, Testrail, Kanban/Scrum

Professional Experience:

Veeva Systems Hyderabad

 **Jun 2020 - Present (4.10 Years)**  **Role: Software Engineer - Module Lead, Automation Engineer in Test**

- Lead test automation efforts for multiple **Vault products** (Document, Reporting, Dashboard, and Regulatory Information Management), improving software quality and reducing testing cycle time.
- Spearheaded automation for **Regulatory Information Management (RIM)** features, contributing to a **30% reduction in test execution time** and improving test stability by **20%**.
- Designed and executed test cases for various testing stages including **Sanity, Low-Risk, Validation, and Regression** using **Hybrid frameworks** and **API testing**.
- **Optimized test frameworks**, leading to increased scalability and reduced redundant code, ensuring quicker updates and easier maintenance of automation scripts.
- Led efforts to stabilize **flaky test cases**, reducing the number of false positives and improving overall **test reliability**.
- **Mentored new team members** and conducted internal training sessions, promoting skill development and knowledge sharing.
- **Monitored and maintained CI/CD pipelines** using **Jenkins** and **GitLab**, ensuring smooth deployments for testing in **AWS environments**.
- Collaborated with product teams to design **Proof of Concepts (POC)** for optimizing automation efforts, ensuring better test coverage.

Tools & Technologies:

Java, Selenium WebDriver, Cucumber, TestNG, Jenkins, GitLab, AWS, Postman, Maven, IntelliJ, JIRA, Confluence

GRhombus Consulting Pvt. Ltd | Hyderabad

 **Jan 2018 - June 2020 (2.6 years)**  **Role: Software Engineer in Automation Test**

- Automated key features such as **Core Doc, DVA, Rendition, and Bookmarks** with a focus on **Hybrid and API frameworks**.
- Designed and implemented a test-driven architecture for UI web automation using the **Page Object Model (POM)**, improving maintainability and reducing script duplication.
- Addressed and fixed **flaky tests**, ensuring the overall stability of the automated test suite.
- Led the integration of **CI/CD pipelines** with **Jenkins** and **GitLab** for seamless code deployment and continuous testing.
- Collaborated with onshore and offshore teams to align on goals and streamline testing activities.

Tools and Technologies:

Java, Selenium WebDriver, TestNG, Winium, AWS, Postman, Jenkins, GitLab, Maven, IntelliJ, JIRA

 **IAP Infotech (Corp) Pvt. Ltd | Bengaluru**

 **Jan 2014 – Jan 2016 (2 Years)**  **Role: Functional QA & Database Administrator**

- Performed **browser compatibility testing** across **iOS, Windows, and Mac** platforms to ensure functionality across devices.
- Automated database validation and **SQL query optimization** for validating data consistency across platforms.
- Designed utility tools for comparing **XML files** with database tables and generating **test reports** for manual and automated tests.

Tools & Technologies:

GitLab (Git), Suse-Linux OS, Eclipse, JIRA, IBM DB2, Java, FileZilla, Putty, Postman.

Key Achievements

- **Reduced test execution time by 30%** through strategic test case optimization and test parallelization, enabling quicker feedback and faster releases.
- Developed and implemented a custom **Automation Failure Tracker (AFT)** tool integrated with **JIRA**, significantly improving issue resolution times and enhancing failure tracking accuracy.
- Optimized **AWS testing environments**, ensuring quick data retrieval and up-to-date builds for consistent and reliable testing.
- Enhanced **test framework structure**, resulting in a more maintainable and scalable test suite.

Skills & Technologies

- **Programming:** Java, JavaScript, SQL, OOPs Concepts, Collection API
- **Test Automation:** Selenium WebDriver, Cucumber, TestNG, Rest Assured, Winium
- **CI/CD Tools:** Jenkins, GitLab, Maven
- **Cloud & Containerization:** AWS (ECS, S3, Lambda, EC2, Containers)
- **Version Control:** Git, Sourcetree
- **Testing Types:** Functional, Regression, Smoke, API Testing, Cross-Browser
- **Testing Frameworks:** Page Object Model (POM), Hybrid Frameworks, Data-Driven
- **Project Management:** JIRA, Confluence, Testrail, Kanban/Scrum

Achievements:

-  **Reduced test execution time by 30%** through automation framework optimization.
-  **Developed and implemented Automation Failure Tracker (AFT) tool**, improving failure tracking accuracy & resolution time.
-  **Optimized AWS testing environments**, ensuring quick data retrieval for reliable test execution.
-  **Enhanced automation framework scalability**, enabling **faster maintenance & updates**.

Additional Information

- **Willing to relocate** as needed.
- Available for **immediate joining**.
- Actively involved in the testing community, contributing to discussions around **test automation best practices** and **CI/CD optimization**.

Education:

B.E. in Computer Science and Engineering
Basavakalyan Engineering College
