

Zameer Khan

Mob: +91-844-661-0685 | E-Mail: khanzameer9@gmail.com | Location: Pune, India

Professional Summary

Full Stack Developer with 8+ years of experience in backend development using Node.js, Express.js, and PHP (CodeIgniter). **Proficient in building scalable web applications and RESTful APIs with strong database integration using MySQL, PostgreSQL, and SQL Server.** Currently transitioning into a full-stack role through Scaler Academy with a focus on React, system design, and modern cloud-native architectures. Adept at working in Agile teams, delivering quality code, and optimizing performance.

Key Skills

- Backend: Node.js, Express.js, PHP, CodeIgniter
- Frontend: HTML5, CSS3, JavaScript, jQuery, (Learning Angular & Next.js)
- Databases: MySQL, PostgreSQL, SQL Server
- Tools & DevOps: Git, GitLab, Docker, Postman, Redis, PM2
- Architecture: MVC, REST API Design, Microservices
- Methodologies: Agile (Scrum), CI/CD, TDD

Professional Experience

Software Developer Engineer

Brainbees Solutions Pvt. Ltd (FirstCry.com) | Apr 2019 – 25 May 2025

Technologies: Node.js, Express.js, PostgreSQL, MySQL, PHP, CodeIgniter

- Developed customer-facing APIs and backend services to support FirstCry's CMS and Warehouse Management System.
- Used Docker containers for isolated service environments and CI pipeline builds.
- Integrated Redis and Sequelize ORM for caching and data operations.
- Collaborated with product and engineering teams for feature planning and releases in Agile sprints.
- Implemented RESTful services and admin portals for internal operations.

- Participated in code reviews, system documentation, and bug triaging.

Projects:

- FC Backend CMS: Built APIs and templates to manage product metadata, improved product launch time by 30%.
- WMS (Warehouse Management System): Automated inventory tracking and dispatch modules; improved warehouse visibility.
- Implemented Docker-based staging setups for QA testing and faster deployments.

Software Developer Engineer

Kodesoft Technologies | Nov 2016 – Apr 2019

Technologies: PHP, CodeIgniter, MySQL, JavaScript, jQuery

- Delivered scalable modules for government and lab testing platforms.
- Led implementation of business logic and reporting in web applications.
- Engaged in client requirement gathering and deployment support.

Project:

- PhoenixLab NABL Portal: Designed frontend and backend for a quality certification system; managed test reports and lab workflows.

Education & Upskilling

- Scaler Academy – Full Stack Developer Program (Ongoing)

Learning: Angular, System Design, Frontend Architecture

- Master in Computer Application, Pune University
- Bachelor in Computer Application, SMU

Certifications & Achievements

- Excellency Award by IIT Mumbai for "Chhote Scientist" Project
- Active participation in college tech and sports events

Personal Details

- Date of Birth: 12 June 1989
- Gender: Male

Interests

- Reading self-development and technology books
- Following product design and system architecture trends
