E-mail: [kasvarma.401@gmail.com](mailto:kasvarma.401@gmail.com)

## OBJECTIVE AND STRENGTHS

To work with a group of dedicated professionals and to make a worthy contribution towards the growth of the organization . Also, to get adjusted to changing market as when the organization needs.

## PROFESSIONAL SUMMARY

A competent professional with **8 Years** of experience in IT.

- Worked as a **Web Developer** in the e-commerce domain and banking domain.
- Involved in the development/continuous enhancement of applications as per the requirement by using **Node.js , JavaScript ,** and related technologies , including **RESTful** services for seamless functionality.
- Skilled in database management with extensive experience in designing, optimizing, and maintaining relational databases using **MySQL** .Capable of creating efficient SQL queries , performing database schema design , and ensuring data integrity for robust backend support in web applications.
- Involved in interface development , maintenance , testing , bulk data handling and missing data investigations.
- Profound knowledge and experience in the development of server-side applications and APIs.
- Hands-on experience in using **GitHub , MySQL , Node , React** and **Postman**.
- Good knowledge of **AWS**.
- Experience in developing Web applications using Visual Studio Code.

## TECHNICAL SKILLS

|                                   |                                                 |
|-----------------------------------|-------------------------------------------------|
| <b>Languages</b>                  | : Java Script                                   |
| <b>Client/Server</b>              |                                                 |
| <b>Technologies</b>               | : HTML , CSS , React , Node , MySQL , NPM , AWS |
| <b>WEB Frameworks</b>             | : React.js ,Node.js                             |
| <b>Architecture pattern</b>       | : RESTful.                                      |
| <b>IDE</b>                        | : Visual Studio Code , Eclipse.                 |
| <b>Build Tool</b>                 | : NPM Scripts.                                  |
| <b>System Configuration Tools</b> | : Git-Hub.                                      |

## EDUCATIONAL DETAILS

Completed **B.Tech** in the stream of ECE in the year 2015.

## PROFESSIONAL EXPERIENCE

APR 2019 to till date: Worked with SJS Technologies, as a Web Application Developer. NOV 2016 to MAR 2019 : Worked with SJS Technologies, as a Manual tester.

### Project:

|                     |                                                                              |
|---------------------|------------------------------------------------------------------------------|
| <b>Client</b>       | FLC                                                                          |
| <b>Duration</b>     | Oct 2022 to till date                                                        |
| <b>Technologies</b> | HTML , CSS , React, Node, MySQL, MongoDB, RESTful services , npm, JSON , AWS |

### Roles and Responsibilities:

1. Developed and maintained secure banking web applications using React.js to ensure a seamless user experience for financial transactions.
2. Implemented and optimized RESTful APIs using Node.js for efficient communication between client and server in compliance with banking security standards.
3. Integrated AWS cloud services to enhance application scalability and ensure high availability.
4. Conducted data validation and maintained the integrity of sensitive customer information in MySQL databases.
5. Worked closely with banking stakeholders to gather requirements and ensure adherence to financial regulatory standards.
6. Performed rigorous testing , including edge case scenarios , to ensure application reliability in a high-stakes banking environment.
7. Monitored and resolved real-time production issues to maintain uninterrupted banking operations.

### Project:

|                     |                                                                   |
|---------------------|-------------------------------------------------------------------|
| <b>Client</b>       | Risk360                                                           |
| <b>Duration</b>     | Oct 2021 to 2022                                                  |
| <b>Technologies</b> | HTML , CSS , React , Node , MySQL , RESTful services , npm , JSON |

### Roles and Responsibilities:

1. Designed scalable web applications for monitoring and managing business processes in a service-driven environment.
2. Developed reusable React components to ensure consistency and efficiency across the platform.
3. Built backend services in Node.js to automate key service workflows and improve operational efficiency.
4. Leveraged AWS services to deploy and monitor applications with minimal downtime and high performance.
5. Collaborated with service managers to customize solutions for client-specific needs and requirements.
6. Conducted troubleshooting and resolved performance issues to maintain uninterrupted service delivery.
7. Created detailed project documentation to facilitate user onboarding and technical handovers.

### Project:

|                     |                                                                  |
|---------------------|------------------------------------------------------------------|
| <b>Client</b>       | Union360 ,Chargeback360                                          |
| <b>Duration</b>     | APR 2019 to 2021                                                 |
| <b>Technologies</b> | HTML , CSS , React , Node , MySQL , RESTful services , npm ,JSON |

### Roles and Responsibilities:

1. Developed dynamic dashboards to track chargebacks and transaction data,enabling better decision-making for service clients.
2. Implemented secure API endpoints to process large volumes of sensitive financial transactions.
3. Conducted bulk data processing and reconciliation for error identification and resolution.
4. Provided end-to-end post-production support for transaction management systems , ensuring uninterrupted client operations.
5. Optimized database schemas and SQL queries to handle high transaction volumes efficiently.
6. Participated in client meetings to identify service gaps and proposed technology-driven solutions to address them.

### Project:

|                     |                              |
|---------------------|------------------------------|
| <b>Project</b>      | Chargeback360.               |
| <b>Duration</b>     | NOV 2016 to MAR 2019         |
| <b>Technologies</b> | Manual , Automation Anywhere |
| <b>Tools</b>        | Excel.                       |

### Roles and Responsibilities:

1. Performed manual testing of service-based applications , focusing on payment reconciliation workflows.
2. Automated repetitive test cases using Automation Anywhere to reduce time-to-market for new features.
3. Used Excel for chargeback data analysis and presented insights to stakeholders for process improvements.
4. Coordinated with developer store solve issues related to service integrations.
5. Documented testing processes and results for audits and compliance purposes
