A Postgraduate, having professional experience on **Database Administration & Database Service Support** for **Banking Domain & Manufacturing domain**; gaining expertise in oracle databases, seeking to consolidate the career through challenging opportunities as ...

Database Administrator

PROFESSIONAL COMPETENCE

- 12+ years of relevant experience in Administration and oracle, PostgreSQL Administrator
- Experience in handling Production, Test and Development Database support and Maintenance as well.
- Experience in Installation and configuration of Postgresql versions 11 and 12 & 13 databases on Linux and windows
- Proven customer service experience, and must communicate clearly, courteously, and professionally in person and over the phone Required hands on experience with PostgreSQL databases.
- Experience in Installation, Configuration and Maintenance of Oracle databases in a production environment.
- Configure the Primary and standby database for PRD environment.
- Performing the switchover and switchback activities.
- Applied the patches on On-Primse and AWS Environments.
- Applied and upgradged the databases from Pg13-15 in AWS and On-Primse environment.
- Involved in the AWS Global Cluster configuration.
- Involved in analyzing the performance issues of Postgresql databases by using tools pgbadger and other reports.
- Involved in configuration and installation of Oracle 19c databases.
- Involved Switchover and swithback activities.
- Involved configuring the RAC and adding nodes and deleting nodes.
- Experience in handling Production, Test and Development Database support and Maintenance as well.
- Experience in Installation and configuration of Postgresql versions 11 and 12 & 13 databases on Linux and windows
- Proven customer service experience, and must communicate clearly, courteously, and professionally in person and over the phone Required hands on experience with PostgreSQL databases.
- Experience in database recovery, point time recovery and failover scenarios, capacity planning, replication, performance and tuning, deployment, and support Experience with maintenance activities such as patching.
- loads and data extractions and load volume processing.
- In-depth understanding of Postgresql Database Architecture.
- Good experience in PostgreSQL backup and restore.
- Designing and managing PostgreSQL database schemas.
- Experience in Oracle-to-PostgreSQL migrations using AWS Schema Conversion Tool (SCT) and AWS DMS tasks for seamless database transitions.
- Configure replication instances and managed schema conversion for cross-platform migrations between Oracle and PostgreSQL databases.
- Implemented real-time data replication using Change Data Capture (CDC) techniques to ensure synchronization between source and target databases
- Optimized migration processes by leveraging AWS services such as S3 and Lambda data transformation and integration
- Managed RDS instances for Oracle and PostgreSQL, including setup, monitoring, backups, and scaling across AWS availability zones

- Designed disaster recovery solutions leveraging RDS features like automated backups and multi-AZ deployments
- Integrated RDS with other AWS services, such as EC2, S3, CloudWatch, and Route 53 for seamless operations
- Optimized database performance by analyzing metrics in AWS CloudWatch and adjusting instance types or parameters as needed
- Configured automated backups and snapshots for RDS instances, ensuring data integrity and quick recovery in case of failures
- Strong in backup and recovery strategies in Aurora PostgreSQL.
- Good Experience in PostgreSQL dba tasks.
- Good experience in Vacuum and analyze tables.
- Hands on experience on auto vacuum configuration.
- Enable logging and implementation alert mechanism using cloudwatch and tools
- Experience in taking backups and recovery using SQL dump utilities pg_dump and pg base backup utilities.
- Experience in monitoring standalone and standby database administration.
- Involved in performance tuning and optimization.
- Preparing weekly and Monthly report of incoming, resolved, SLA breached tickets.
- Managing the PostgreSQL.conf and pg_hba.conf configuration and WAL log files.
- Managing database Roles and Privileges.
- Experience in setting up and managing physical standby using Warm Standby, Hot Standby and Streaming replication.
- Knowledge on upgrade of postgres databases.
- Perform health check of databases.
- Involved in performance tuning.
- Good knowledge on pgBadger, pgBouncer utilities.
- Experience in Installation, Configuration and Maintenance of Oracle databases in a production environment.
- Good Knowledge of ITIL Structure like Problem Management,
- Polite & dedicated Team Player with high tolerance & patience level, humorous nature and good in communication & interpersonal skill

OS Level Activities - User Creation on UNIX, create groups, add user into group, the crontab Schedule.

Technical Skills include

- **Operating Systems:** RHEL AS 6 & 7, Windows 2008&12 Server
- **Databases:** Postgres 9.5 , 10 ,11 & 12
- **Utilities** : pg_dump, pg_restore, pg_dumpall, PL SQL and pg_ctl, RMAN, Golden Gate, expdp, impdp

Certification & Training include.

- Microsoft certified azure fundamentals az-900
- Microsoft Certified Associate (MCSA) from Microsoft.
- Oracle Cloud certified professional.
- Oracle Certified Professional (OCP).
- AWS Solution architect associate

PROJECT SUMMARY

► **CTS**

Client name: CCC

Duration: Sep 2023 - Present

Technology: Postgres 12 & 13, Ora2PG, DMS RHEL 6 & 7, Pgadmin, Oracle 12c & 19c

Role: DBA

Involved in Migration of Oracle database to Aurora PostgreSQL using AWS DMS and AWS SCT.
 Involved in the upgrading AWS RDS & Aurora PostgreSQL from 12 to 14, Applied AWS Maintenance,
 Involved in upgrading the Instance classes.
 Involved in Analyze schemas and applications to determine the most appropriate migration strategies and architectures.
 Worked on the oracle to Aurora PostgreSQL migration issues & have multiple meetings with Dev team, Involved in the different kind of testing (Load, Sanity etc.,)
 Strong in backup and recovery strategies in Aurora PostgreSQL.
 Good Experience in PostgreSQL dba tasks such as Maintenance activities like Vacuum, pg_repack, reindex etc.
 Good experience in Vacuum and analyze tables.
 Involved in Installation of Regional cluster, Global clusters and upgrading the Regional and global clusters.
 Hands on experience on auto vacuum configuration.
 Enable logging and implementation alert mechanism using CloudWatch and tools.
 Performed Minor and Major version upgrades in AWS RDS & Aurora.
 Provided suggestion on the performance issues by generating PgBadger Reports.
 Helped the Dev team in the migration while converting the code
 Experience in operational support, and upgrades for PostgreSQL Azure Architecture.
 Involved in resolving the database health issues.
 Assisted Application user to generate the Assessment report for the Postgresql Database to migrate the database from On-premises to Azure.
 Provided suggestion on the performance issues by generating PgBadger Reports.
 Helped the Dev team in the migration while converting the code
 Performed in Oracle-to-PostgreSQL migrations using AWS Schema Conversion Tool (SCT) and AWS DMS tasks for seamless database transitions
 Configured replication instances and managed schema conversion for cross-platform migrations between Oracle and PostgreSQL databases
 Implemented real-time data replication using Change Data Capture (CDC) techniques to ensure synchronization between source and target databases
 Optimized migration processes by leveraging AWS services such as S3 and Lambda data transformation and integration
 Managed RDS instances for Oracle and PostgreSQL, including setup, monitoring, backups, and scaling across AWS availability zones
 Designed disaster recovery solutions leveraging RDS features like automated backups and multi-AZ deployments
 Integrated RDS with other AWS services, such as EC2, S3, CloudWatch, and Route 53 for seamless operations
 Optimized database performance by analyzing metrics in AWS CloudWatch and adjusting instance types or parameters as needed
 Configured automated backups and snapshots for RDS instances, ensuring data integrity and quick recovery in case of failures

► **Cloud4c**

Duration: Sep 2022 - Aug 2023

Team Size: 10

Technology: Oracle 11g,12c Postgres 9.5,10 & 11 RHEL 6 & 7

Role: DBA

Activity Detail:

- Support day-to-day DBA Admin tasks.
- Support day-to-day DBA Admin tasks
- Work as part of the team to support daily DBA tasks and handle client communication
- Migrate an Oracle database to Aurora PostgreSQL using AWS DMS and AWS SCT
- Analyze schemas and applications to determine the most appropriate migration strategies and architectures
- Worked on the oracle to Aurora PostgreSQL migration issues.
- Strong in backup and recovery strategies in Aurora PostgreSQL.
- Good Experience in PostgreSQL dba tasks.
- Good experience in Vacuum and analyze tables.
- Hands on experience on auto vacuum configuration.

- Enable logging and implementation alert mechanism using cloudwatch and tools
- Installed, configured and maintained PostgreSQL 9.5,10 &11
- Performed Database Cloning and refresh on to Test environment using pg_dump and cold/hot file system backup methods.
- Monitoring the Database growth and increase space in production database.
- Backup and Recovery using hot backup method and pg_dump/pg_restore utilities.
- Performing logical backups using pg_dump, pg_dumpall and pg_restore utilities and restore specific objects and schemas.
- Configured DR site.
- Creation of databases and configuration of rules in pg_hba.conf file.
- Creation of users and assigning roles & permissions to the users.
- Upgraded from 9.3 to 9.5.
- Performed Index Rebuilding and vacuum operation to enhance the performance.
- Setting up of replication, using Streaming replication and WAL file shipping.
- Working in managed service team with more than 50+ Customer around the Australia as offshore Postgres DBA Consultant.

DXC Technologies

Duration: Aug 2018 - Jun 2022

Team Size: 20

Technology: Postgres 11 &12, Oracle RAC

Role: Senior Software Engineer

Activity Detail:

- Administrating Production Database,
- Development environment support on Postgresql 10,11
- Strong knowledge in PostgreSQL database.
- Experience in working on versions PostgreSQL 11 and above.
- Capacity planning, installation, configuration, database design, migration, performance monitoring, security, troubleshooting, as well as backup and data recovery.
- Re-organization of database and schema objects.
- Used CRONTAB tool for scheduling automated alerting scripts at the time of need.
- Monitoring Table space and file system growth.
- Monitor through OEM grid control and gets alert.
- Coordination with different stakeholders for resolution of issues at all levels.
- Status update to the business.
- Working on various Incidents, Problem Management, Service Request and Change Request.
- Involved in Checking and preparing daily database back up report
- Raising service request with Oracle support for analysis of performance issue.
- Installed and configured Oracle 11g databases across production, development, and test environments, ensuring compliance with project specifications
- Managed and supported Oracle 11g, 12c RAC, and standby databases, providing 24x7 on-call support for databases, utilizing Oracle Cloud Control for monitoring and alerts
- Administered user access and space management, granting necessary privileges while ensuring data security and integrity
- Applied critical patches and upgrades, maintaining database performance and security across all environments
- Regularly refreshed development and test instances with production data to ensure accurate testing and development
- Created and managed user roles and privileges based on activity requirements, enhancing security and operational efficiency
- Executed table and index defragmentation to optimize performance and manage storage effectively
- Conducted health checks on OCR, issues in a RAC 11g environment

► **Infosys**

Client name: DOP

Duration: Feb 2016 - Jul 2018

Team Size: 20

Technology: Golden gate, Oracle 10g, Oracle 11g (AIX, Solaris, HP/Unix, Linux, Windows 2000/2003)

Role: Engineer in Database Administration.

Job Profile:

- Providing Telephone/Email/On-Site Support for various Oracle Database Modules.
- Activities done:

Daily Activities

- Sending Daily Health Check Monitoring Reports to App Owner
- Performing Database Maintenance/Performance check Activities as per USD calls logging.
- Updating USD Call status
- Providing Telephonic Support to App Owner for various Database Activities.
- Attending emails and providing solutions.

Weekly and Monthly Activities.

- Table Re-org, Switch Over – Switch Back, Patch Application, Up gradation,
- Migration, DB Reviews, Base lining. Creating Standby database.
- New Oracle
- Installation and database creation. DR-drills

Backup Activity

- Backup of the database as per request in taken through Cold Backup/RMAN/EXPDP
- Creating shell Scripts for Backup through Autosys

Restore Activity

- Restoring Of database during Disaster Recovery or Restoration Drill
- Rman restorations for UAT setups.

Performance and Tuning

- Monitoring and Tuning of database for the High Load Period, identifying Database.
- Locks, Enqueues, Longops, Huge CPU consumption Queries, Tracing Sessions,
- Suggestion of Immediate or Scheduled changes in database for performance Improvisation.

RAC (Real Application Cluster)

- Sending Daily Healthcheck report to the RAC Databases.
- Applying the Patches in RAC Database.
- Troubleshoot RAC Databases.
- Switchover & Switchback RAC Databases.

Others

- OEM agent configuration and Daily report generation and sending to App owners.
- Automated Drill level Prechecks with OEM
- Basic Troubleshoot of Golden Gate.
- Creating Databases in SQLSERVER, Configuring the log shipping ,Backups

► Fujitsu

Client name : TAYOTA

Duration: Apr 2015 - Jan 2016

Team Size: 4

Technology: Oracle 9i, Oracle 10g (32 & 64-bit)

Role: Database Administrator

► IBM

Client name : Philips

Duration: Feb 2013 - Mar 2015

Team Size: 7

Technology: Oracle 9i, Oracle 10g (32 & 64-bit)

Role: Database Administrator
