Professional Summary:

- DevOps and Automation Engineer with 3 years of industry experience.
- Experience in building Infrastructure, configuration management.
- Excellent understanding of building CICD pipelines.
- Proficient in preparing the Test Scenarios, Defect Report and Tracking the status.
- Expert in detecting bugs and classifying them based on the severity.

Technical Skills:

- **Cloud:** AWS, Azure, Active Directory
- **Scripting:** Python, Bash shell Scripting, PowerShell
- **Containers:** Docker
- **Tooling:** Terraform, Ansible, Packer, Docker, GitLab, GitHub, Jenkins, API Automation
- **Ticket Tracking Tools:** JIRA, ServiceNow
- **Environment:** Linux, windows

Experience:

DevOps and Automation Engineer DigitalXC

June 2021 to Present

DigitalXC: RS Components (Client)

Job Responsibilities:

- Automated routine AD tasks using PowerShell scripts, reducing manual workload by 30%
- Created and managing Powershell Script for Server Hardening.
- Working with Graph Api for Automating tasks for Microsoft Teams & Office365.
- Created infrastructure in AWS, including VPC, EC2, S3 bucket, Lambda and IAM Roles and Hosted essential tools like Docker and Jenkins, ensuring a robust and scalable environment
- Designed and executed a comprehensive automation solution using Ansible and Terraform to generate health check reports and server metrics within the AWS cloud.
- Designed and executed a automation solution using Bash-Script to generate health check reports and server metrics for Hyper-V windows Servers.
- Developed a 'zero-touch' automation solution with Python and Boto3, enabling AWS snapshots to be automatically deleted post-retention period, enhancing data management efficiency and reducing storage costs
- Engineered and implemented robust **CI/CD pipelines**, leveraging GitHub for SCM and seamless integration with AWS services; streamlined deployment processes, reducing time-to-market by 50% and ensuring 99% uptime.
- Automated build jobs and deployment process with Jenkins. Enabled email notification in Jenkins to alert whenever a job or pipeline fails.
- Spearheaded the implementation of a robust CI/CD pipeline using Jenkins, resulting in a reduction in deployment time and a decrease in production issues.
- Led the automation of Active Directory tasks using PowerShell scripts, resulting in a 40% reduction in administrative time and enhancing system reliability.

- Performed Active Directory cleanup and optimization to improve system performance and reduce security risks.
- Developed PowerShell scripts to automate bulk user creation, password resets, and other administrative tasks.
- Led Active Directory migrations, minimizing downtime and ensuring a smooth transition of user accounts and policies.
- Automated the process of auditing and cleaning up inactive AD accounts, improving security and reducing clutter
- Implemented a PowerShell-based automation framework for routine Active Directory maintenance, cutting down manual effort by 50% and increasing operational efficiency.

DigitalXC: Bank Muscat (Client)

Job Responsibilities:

- Developed an Ansible script to automate server hardening processes aligned with CIS benchmarks, significantly elevating system security and compliance. This script meticulously configured system settings, disabled unnecessary services, enforced password policies, and optimized network parameters to mitigate vulnerabilities.
- Developed PowerShell scripts to automate bulk user creation, password resets, and other administrative tasks.
- Led the automation of Active Directory tasks using PowerShell scripts, resulting in a 40% reduction in administrative time and enhancing system reliability.
- Architected and developed a automation solution for WebSphere installations using Ansible, crafting the process entirely from the ground up Designed and implemented it.
- Ansible script to automate the IBM MQ installation process, ensuring a smooth and uniform setup experience across different settings, all while significantly reducing the need for manual intervention.

DigitalXC: Beyond Gravity (Client)

Job Responsibilities:

- Migrating On-prem Virtual Machine to AWS
- Designed and executed a comprehensive automation solution using Ansible and Terraform to generate health check reports and server metrics within the AWS cloud.
- ndjdDesigned and executed a comprehensive automation solution using Ansible and Terraform to generate health check reports and server metrics within the AWS cloud.

DigitalXC: Nynas (Client)

Job Responsibilities:

- Developed automation solution for Citrix health Check and Vcenter Health Check Report
- Using Ansible and Bash Script, developed the Automation for Infoblox IP Management solution such as DHCP Reservation, Static IP Fulfilment and DNS Fulfilment.

- Collaborate in the automation of AWS infrastructure via Terraform and Jenkins – software and services configuration via Ansible playbooks
- Experienced in Infrastructure as Code (IAC). Developed Terraform modules to create custom VPC, subnets, EC2 instances, ELB and security groups etc.
- Supported development teams in troubleshooting the infrastructure and deployment related issues.
- Developed Ansible playbooks to deploy, configure, and upgrade applications.
- Managed and governed the version control (GIT) tools including branching and tagging Implemented Continuous Integration with Jenkins.

DigitalXC:

Job Responsibilities:

- Developed an Ansible script to automate server hardening processes aligned with CIS benchmarks, significantly elevating system security and compliance for the Red-Hat Servers.
- Developed a 'zero-touch' automation solution with Python and Boto3, enabling AWS snapshots to be automatically deleted post-retention period, enhancing data management efficiency and reducing storage costs.

EDUCATION:

- Centurion University of Technology and Management - **(83%)**
Jul 2017 – May 2021
- Sri chaitanya Junior College – (77%) May 2014- April 2016
- ST.Joseph's EM School – (74%) May 2002 – March 2014

Achievements:

- Awarded as the best employee of the year 2022
- Awarded the Automation Leader for the Year 2023
- Best Project Award for the Year 2023
- Awarded the Best Startup Idea within the Odisha State
