

Summary — Project and Program Manager with over 10 years of experience delivering results across technology and operations. Skilled in leading cross-functional teams, optimizing processes and executing complex projects at Amazon, Jio, and high-growth startups. Passionate about building efficient, scalable, and data-driven systems with a strong foundation in project execution and Python development.

Skills

Automation Selenium, Generative AI (Anthropic, HuggingFace)

Languages Python, Bash/Shell, C/C++

OS Debian, Ubuntu, Windows, MacOS
Testing Pytest

Project Management Clickup, Excel, Jira, MS Project, Confluence

Experience

Vrisva Space Private Limited

STAFF ENGINEER - SOFTWARE DEVELOPMENT

Jan 2025 - May 2025

Bengaluru, KA, IN

Client: ARDE

- Led comprehensive program management for multi-million dollar motion simulator deployment.
- Coordinated cross-functional teams across hardware, software, and control system integration.
- Managed complex stakeholder relationships with ARDE officials, ensuring alignment between technical deliverables and client requirements.

Client: Openpilot - BYD ATTO3

- Analyzed and optimized CI/CD pipeline workflows, resulting in a 40% reduction in deployment time through automated testing and integration processes.
- Coordinated distributed global development teams using systematic project tracking through Teams, GitHub, and Discord platforms.
- Designed system validation frameworks using specialized analytics tools (Cabana, Replay, PlotJuggler) for real-time performance monitoring
- Implemented systematic debugging protocols for critical system integration issues, improving system stability and reducing operational downtime.
- Created standardized documentation processes for issue tracking, root cause analysis, and solution implementation.

Aegeus Technologies Private Limited

DEVELOPMENT ENGINEER - PROGRAM OPERATIONS & PRODUCT DEVELOPMENT

Mar 2023 - Dec 2024

Bengaluru, KA, IN

- Established communication frameworks with internal teams (Production, Operations, Quality) and external stakeholders (OEMs, Service Providers, Clients).
- Led multiple process optimization initiatives resulting in significant operational improvements and cost reductions.
- Analyzed operational data to drive product development decisions for AGV solutions.
- Key Achievements:
 - Quality Control Program: 50% reduction in post-production fault rates.
 - Motor Quality Assurance: 90% efficiency increase, 75% time reduction in the testing process.
 - Remote Calibration Process: 15-20 minute time savings per unit, eliminating manual recording- keeping.
 - Product Enhancement: 80-90% reduction in production breakdowns, improved client trust with repeat orders.

Amazon Seller Service Private Limited (ASSPL)

PROJECT SPECIALIST - PHYSICAL SECURITY PROGRAM MANAGER (PSPM)

Apr 2019 - Apr 2022

Bengaluru, KA, IN

- Analyzed and coordinated project forecasts from cross-functional leadership teams across South & Central Indian regions
- Reviewed and optimized warehouse layouts ensuring alignment with Security and Loss Prevention (SLP) requirements.
- Managed complex communication frameworks between SLP Operations, internal teams, and external partners.
- Ensured compliance of physical security project standards, project Scopes of Work, budgets and timelines.
- Coordinated materials and manpower allocation during project execution phases.
- Supported regional and site SLP managers by generating actionable insights through rigorous data analysis and structured reporting, enabling them to focus efforts on high-impact areas.

Reliance Jio Infocomm Limited (RJIL)

PROJECT MANAGER - SECURITY AND LOSS PREVENTION

Sep 2014 - Apr 2019

NaviMumbai, MH, IN

- Managed installation and commissioning programs for Electronic Security, Surveillance, and Access Control across multiple facility categories.
- Led integration programs for Access Control, CCTV Surveillance, and Attendance Recording systems.
- Coordinated simultaneous programs across Small (eNodeB), Medium (AG2, ILA, NLD), and Large (IDC) facilities.

- Built and deployed training programs for all users of the physical security systems.
- Coordinated materials and manpower allocation during project execution phases.
- Major Programs: Internet Data Centre implementations in Jamnagar, Navi Mumbai and Nagpur; IPv6 Implementation across PAN India eNodeB sites.

Education

Army Institute of Technology, University of Pune
Bachelor of Engineering in Electronics and Telecommunication
Grade: First Class

2010 - 2014
Pune, MH, IN

Certifications

 *Python Programming* —  *Linux command and Shell scripting*
