Expertise in automation frameworks like Selenium, TestNG, and JUnit, and skilled in UI Testing and API Testing with tools like Postman and JMeter. Adept at driving process improvements, ensuring defect-free releases, and collaborating with cross-functional teams. Passionate about delivering quality software products through comprehensive test coverage and effective automation.

KEY SKILLS:

Automation Testing, Python Automation Testing, Manual Testing, E2E Testing, 5G Testing, EPC core Testing, 5G- Converge Charging System, Mobility E2E Billing, Payments, Agile, Defect Management/Bug Fixing, Risk Identification/Mitigation, Requirement Gathering/Analysis, UI Testing, API Testing, Mobile APP Testing, Test-Driven Development, Behavior-Driven Development, Functional Testing, Regression Testing, Test Strategy, Test Plan, Team Management, Test documentation, Black box testing, Sanity Test, Smoke Testing, Usability Testing, Test automation scripts, Bug detection and reporting, Software reliability analysis, Power BI Dashboard, Data Visualization.

TECHNICAL SKILLS:

Selenium, TestNG, Pytest Framework, Cucumber, BDD Framework, Python Behave, Maven, Java, Python, Jenkins, Git, GitLab, CI/CD Pipeline, Version Control Systems, PyCharm, Eclipse, Telecom BSS, CRM, Spirent Landslide, Putty, Zephyr, Jira, TestRail, Postman, SoapUI, Rest Assured, JMeter, SQL, Power BI Data Visualization, Splunk, Elasticsearch, Ginger, Kanban, AWS

PROFESSIONAL EXPERIENCE:

Software Test Engineer – Amdocs, Pune

August 2021 – Present

Client – AT&T USA

Projects:

CCS 5G Testing - Convergent Charging System (CCS) for 5G networks is a solution that enables communication service providers to charge their customers for the services they consume on 5G networks. CCS supports various charging models, such as prepaid, postpaid, subscription, pay-per-use, etc.

Opus (AT&T Retail Store) - Opus is AT&T retail store application used to sell products and services to customers. The application provides the item list, prices, and options to compare the products and pay online. It also provides services to existing customer like to get the bill details, details, change service or activate/deactivate services.

Trade-in Hyla Return Label to DF Shipment box - Hyla Return label is service for all new eligible device purchases, the customer will be presented with Trade intent which includes selecting model, conditions questions, return method. Based upon the model and condition questions the customer shopping cart will accurately reflect the eligible promotions and pricing.

Roles and Responsibilities:

- Automated test cases using Selenium, TestNG, and JUnit, improving test coverage by 30%.
- Allocated 30% of responsibilities to leading a team of 3-4 testers. This involved task delegation, offering guidance and mentorship, and ensuring the team achieved its productivity and quality objectives.
- Recording the test activities using visual aids such as flowcharts, layouts, diagrams, charts, etc. and writing clear and descriptive code comments.
- Reporting on software issues and defects by collecting, analyzing, and summarizing the data from the development and service or environment teams.
- Establish and configure the automation test environment for every release, including updates to the test automation suites.
- Understanding the complete E2E flow and planning the overall E2E testing strategy.

- Write, maintain, and enhance automated test scripts to cover critical functionalities.
- Regularly update and maintain automated test scripts to accommodate new features and changes in the application.
- Execute automated test scripts and analyze results to ensure the functionality meets the required standards.
- Developed E2E testing strategy for Opus, ensuring smooth integration of front-end, back-end, and database workflows.
- Creating performance metrics for test management by identifying key performance indicators, defining reporting and dashboard standards.
- Collaborating with development and infra team to get the environment and code ready for testing.
- Collaborated with development teams to improve test environments, ensuring test data availability, and improving test case execution speed.

QA Tester – GameCloud Technologies, Pune

Nov 2019 – July 2021

Client - Lockwood Publishing, UK

Project:

Avakin Life - Simulation and Role-Playing Game allowing people to interact virtually.

Roles and Responsibilities:

- Defining testing scope for the requirements and ensuring timely quality release for the defined scope.
- Performing QA on various platforms like Android, iOS, Amazon, Windows.
- Interacting with Overseas clients to execute the entire QA process.
- Reporting and tracking the defects using JIRA.
- Assigning tasks and handling the team in absence of the team leader.
- Drafting Daily Status Report & Time Slot and communicating it to the stakeholders.
