PROFILE

I am highly skilled and motivated Machine Learning professional with a passion for leveraging data-driven insights to solve complex problems. Proficient in developing and deploying machine learning models to drive business solutions. Experienced in data preprocessing, feature engineering, and model evaluation. Adept at using Python, TensorFlow, and scikit-learn to implement various machine learning algorithms. I have also worked on AWS, AWS SageMaker and also certified AWS Solution Architect. Strong ability to communicate technical concepts to non-technical stakeholders.

WORK EXPERIENCE

Associate Claim Process

06/2024 – 12/2024 | Gurugram

Allianz Partner

- Proficient in processing and reviewing travel and medical claims, ensuring that all documents meet required standards and guidelines.
- Utilized **ABS tool** to efficiently manage, track, and validate claim documents, ensuring accuracy and compliance with company policies.
- Verified the authenticity and completeness of claim documentation, including medical reports, invoices, receipts, and travel records.
- Ensured timely processing of claims, coordinating with internal teams to resolve discrepancies and expedite approvals.
- Conducted audits on claim submissions to identify potential errors, fraud, or inconsistencies, contributing to a 98% accuracy rate.
- Provided excellent customer service by communicating with claimants, answering inquiries, and guiding them through the claims process.
- Collaborated with cross-functional teams, including healthcare providers and travel agencies, to verify claim details and facilitate smooth claim resolutions.
- Regularly updated claim status in internal systems, maintaining accurate records for future reference and compliance purposes.
- Assisted in implementing best practices and procedural improvements to enhance the overall efficiency of the claims processing workflow..

Software Engineer - DataScience

09/2023 – 01/2024 | Chandigarh

Auxiliobits Pvt .Lmt

FinOps

Spearheaded a dynamic **FinOps** Recommendation project, leveraging advanced **Time Series Forecasting** techniques and

- **TensorFlow** for predictive analysis.

Developed and implemented robust models for forecasting future utilization of key resources, including **CPU, Memory**.

- Disk, based on thorough analysis of **historical data**.

Collaborated with cross-functional teams to ensure seamless integration of the predictive models into the existing

- Infrastructure, fostering a more proactive approach to resource management.
- Demonstrated expertise in leveraging machine learning and statistical methodologies to extract actionable insights, enhancing
- The efficiency of resource utilization in alignment with **FinOps** principles.

Machine Learning Engineer

08/2022 – 05/2023 | Bangalore, India

Quantiphi Analytics

Production Project

- I worked on production project on my company where we Implemented a machine learning solution on **AWS**

- **SageMaker** for insurance churn prediction, accurately forecasting customer attrition and renewals, optimizing;
- **Data Preprocessing:** I prepared the training data by performing necessary preprocessing steps such as handling missing values, encoding categorical variables, and splitting the data into training and validation sets. Training the **XGBoost Model**, Saving the Trained Model, Developed an inference pipeline using this trained model, which can be used to predict whether a new customer will renew their policy or not. **SageMaker Batch Transform, SageMaker Batch Inference, Deploying the Model.**

MLOps

- I have experience with **MLOps (Machine Learning Operations)** tools, which are designed to streamline and automate the deployment, monitoring and management of machine learning models in production environments. Here's how I would describe my experience with:
- **MLOps tools:**
- I have hands-on experience with various **MLOps** tools that facilitate the **end-to-end ML model** lifecycle, from development to deployment and maintenance. These tools enable efficient collaboration among data scientists, developers and operations teams, ensuring the seamless integration of machine learning models into production systems.
- I worked on **Git** and **Git-based** platforms (such as **GitLab** and **GitHub**) to version control machine learning models, **AWS**
- **CloudWatch** for monitoring the performance and health of deployed machine learning models, Model monitoring,
- Model serving, Model validation, **AWS Sagemaker pipeline, S3, ECR, Model deployment.**

PROJECTS

Insurance Predication:

Implemented a **Machine Learning** solution on **AWS SageMaker** for insurance churn prediction, accurately forecasting customer attrition and renewals.

I prepared the training data by performing necessary preprocessing steps such as handling missing values. Training the **XGBoost Model**, Saving the **Trained Model**, Developed an **inference pipeline** using this trained model, which can be used to predict whether a new customer will renew their policy or not.

SageMaker Batch Transform, SageMaker Batch Inference, Deploying the Model.

TechStack Used: Amazon Sage Maker | Python | Batch Inference | Advance Excel | Pipelines | Endpoint | AWS | S3 | SageMaker | ECR

License Plate Detection:

An Utilized **OCR** and **YOLOv5** to develop a robust license plate detection model capable of accurately identifying licenseplates in real-time video feeds, showcasing proficiency in computer vision and deep learning techniques.

Demonstrated practical experience in software development by integrating the model into a real-world application, enabling efficient and accurate identification of license plates in various settings.

TechStack Used: Python | TensorFlow | SQL | Advance Excel | Endpoint | Tableau

EDUCATION

B.tech (CSE)

Lovely Professional University

07/2018 – 08/2022 | Punjab, India

Intermediate

Bal Nikunj Inter College

05/2017 – 05/2018 | Lucknow, India

SKILLS

Technical skill(Technologies/Frameworks/Libraries) — • Machine Learning • Deep Learning • GEN AI

• AWS • API • LP • AWS Sagemaker • GCP • LLM • OpenAI • Numpy • TensorFlow • Pandas •

LangChain • Keras | **Language Skills(Languages/Tech Subjects)** — Python • C++ • Tableau • MySQL

• Advance Excel • Data Structures • Flask • OOPS • HTML/CSS • Node.js • MongoDB/DynamoDB •

LlamaIndex

ACHIEVEMENT

Completed AWS Solution Architect certification 2022.

- Successfully completed AWS Certified Solutions Architect – Associate exam in 2022.
- Gained in-depth knowledge of designing, deploying, and managing applications on AWS.
- Hands-on experience with key AWS services including EC2, S3, RDS, and VPC.
- Expertise in implementing best practices for security, cost optimization, and high availability.
- Demonstrated ability to architect scalable, fault-tolerant, and cost-effective cloud solutions.

Secured 5* in SQL by HACKERRANK.

- Achieved a 5-star rating in SQL on HackerRank.
- Demonstrated expertise in database management, query optimization, and data manipulation.
- Solved complex SQL challenges, showcasing strong problem-solving and analytical skills.

Presented Paper titled "Human Pose Estimation" in International Conference TICSAM TICSAM 2022 held on May 17, 2022 .

- Presented a research paper titled "*Human Pose Estimation*" at the **International Conference TICSAM 2022** on May 17, 2022.
- Conducted in-depth research on advanced computer vision techniques for human pose estimation.
- Shared key insights and findings with an international academic and professional audience.
- Strengthened public speaking and technical presentation skills through conference participation.

Solved more than 500+ problems across platforms.

- Solved 500+ coding problems across platforms like LeetCode, CodeChef, and HackerRank.
- Improved problem-solving skills in **Data Structures, Algorithms, and Competitive Programming**.
- Gained hands-on experience in optimizing code efficiency and implementing best practices.

Completed C++ certification by EBOX 2020.

- Completed C++ Certification from **EBOX** in 2020.
- Gained proficiency in object-oriented programming, data structures, and algorithm development.
- Developed hands-on experience through coding challenges and real-world problem-solving exercises.
