Profile Summary

- Experienced Data Scientist with 4 years of work experience at GS Lab, Pune.
- Proficient in NumPy, Pandas, Sklearn, Matplotlib, Seaborn, Plotly, and Power BI for Data Visualization.
- Strong skills in Machine Learning, NLP and Deep Learning techniques for data modelling and representation.
- Knowledgeable in deploying ML/DL models using Heroku, AWS Ec2, Elastic Beanstalk, etc.
- Efficient in handling workload, team coordination, and delivering high-quality results on time.
- Familiarity with web development technologies like HTML, CSS, PHP, Django and Bootstrap.
- Proficient in web scraping and automation using Selenium and Beautiful Soup.

Academic Qualifications

- MCA (HONS.), Lovely Professional University, Punjab | CGPA: 8.9/10 | (2017 – 2020)
- Bachelor's degree, Vinoba Bhawe University, Hazaribagh | Percentage: 76.2% | (2013 – 2016)
- SR. SECONDARY, CBSE, Dhanbad Public School, Dhanbad | Percentage: 80.6% | (2011 – 2013)

Technical Skills

- **Expertise:** Machine Learning, Deep Learning, NLP, Data Visualization (Matplotlib/Plotly/Seaborn), Power BI, OpenCV, Data Cleaning/Processing
- **Languages:** Python, C++, Java, HTML, CSS, PHP, Laravel, Flask, Django
- **Other Skills:** Tableau, Linux, MySQL, Testing & Debugging Skills, Deployment using AWS, S3, Lambda, Bedrock, CI/CD Pipelines, Docker

Projects Undertaken

1. Name: EVA (Employee Virtual Assistant)

Tech Stack: Python, Django, NLP, BERT Algorithm, RAG, MongoDB, AWS, Docker

Description: Developed a Hangouts chatbot designed to assist employees by answering queries related to company policies, rules, leaves, and other HR-related information. This chatbot significantly reduced the workload on HR personnel by automating the response process.

Roles & Responsibilities:

- **Optimized Bot Training:** Used NLP and BERT to train EVA, achieving 82%+ accuracy in responses, enhancing user satisfaction.
- **Admin Panel Development:** Built a Django-based admin panel, allowing HR to update content independently, cutting support requests by 40%.
- **User Experience Enhancement:** Worked closely with HR teams to refine the chatbot's conversational abilities, increasing session completion rates by 30%.
- **Performance Monitoring:** Monitored and optimized chatbot performance, improving response accuracy by 25% and reducing response time by 20%.

2. Name: GenAI Cold Email Generator

Tech Stack: Python, LangChain, Llama 3.1, Groq Cloud, Streamlit, ChromaDB, WebBaseLoader.

Description: Developed an AI-powered tool that automates the process of generating personalized cold emails for job applications by scraping job listings from company career pages. The tool analyzes job descriptions, uses semantic search to identify relevant portfolio links, and generates tailored emails, streamlining the job application process.

Roles & Responsibilities:

- Integrated web scraping using WebBaseLoader to extract job listings, improving data retrieval.
- Used LangChain and llama-3.1-70b-versatile for job analysis and email generation, cutting manual effort by 30%.
- Implemented ChromaDB for semantic search, ensuring relevant portfolio links in emails.
- Leveraged Groq Cloud for faster inference, reducing email generation time by 25%.
- Helped deploy the app, achieving 91% accuracy in generating personalized emails.

3. Name: Car Brand Classifier

Tech Stack: Python, Resnet-50, TensorFlow, CNN, Keras, AWS Ec2

Description: "Car Brand Classifier App" Classifies cars of different brands using transfer learning technique Resnet-50. It uses Flask for the web app and it is deployed on AWS EC2.

- **Explore My GitHub for More Projects:** github.com/amark720

Achievements & Awards

- Received Certificate of Appreciation: KUDOS Awards from Project Manager in Mar 2022 & Nov 2023 for commitment to learning and outstanding contributions.
- Kaggle Expert with 2x Kaggle Notebooks and active discussion participation.
- Recognized as a GitHub "Starstruck" and "ACV Contributor" for contributions to open-source projects.

Work Towards Data Science Community

- GitHub url: github.com/amark720
- LinkedIn page: bit.ly/FreshersGold
- Kaggle url: kaggle.com/datawarriors
- Blog: StudyBullet.com

Professional Skills & Certifications

- Communication and Teamwork
- Learning and Implementing New Technologies
- Creative Problem-solving / Strategic Thinking
- Delegation, Adaptability Skills and Time Management
- Completed Machine & Deep Learning course from Coursera
- Completed 365DataScience course on Mathematics & ChatGPT

Interests & Extra-Curricular

- Microsoft Office Suite
- Meeting with Data Science People
- Google Advanced Search
- Automating Repetitive Tasks
- Language Proficiency- English, Hindi

Work Experience Summary

GS Lab, Pune

December 2019 – Present (5 years)

- **Data Scientist** (January 2021 – Present)
- **Python Intern** (December 2019 – January 2021)
