

# AMAR SUNADHOLI

python Programmer

## CONTACT

- +91 7026315737
- amarsunadholi1415@gmail.com
- Bengaluru Karnataka

## EDUCATION

2017 - 2021

### GOGTE INSTITUTE OF TECHNOLOGY BELAGAVI

- Information Science and Engineering
- CGPA 8.4/10

## CERTIFICATES

- Coursera Blockchain Basics
- AI Bootcamp - Introduction to AI
- Cambridge Business English Certificate
- 

## SKILLS

- Python
- NumPy
- DevOps
- Panda
- SQL
- Linux

## LANGUAGES

- English : Fluent
- Kannada : Fluent
- Hindi : Fluent

## PROFILE SUMMARY

Highly motivated Junior Python Developer with a passion for developing innovative solutions. Skilled in developing and maintaining Python-based web applications, optimizing database queries, and collaborating with cross-functional teams to improve application functionality. Proven track record in increasing user engagement, reducing development time, and improving code quality.

## INTERNSHIP

08/2020 - 10/2020

### MITRAS IT SOLUTIONS HUBBALLI

#### DATA SCIENCE ENGINEER

- Data collection and preprocessing, data exploration and cleaning, data visualization using tools like Tableau or Matplotlib, statistical modeling, machine learning algorithms, SQL database management, programming languages like Python or R, and effective communication to present findings to stakeholders.
- Identifying relevant questions and developing effective solutions using data analysis techniques.
- Clearly explaining complex data insights to both technical and non-technical audiences.
- Collaborating with other data scientists, engineers, and stakeholders throughout the project lifecycle.

## Work Experience

2021 Dec-present

### As Junior Python Developer

- Led a team of three developers to optimize a data processing pipeline, reducing execution time by 40% and improving system efficiency using advanced Python libraries.
- Implemented a machine learning model that increased predictive accuracy by 25%, enhancing the decision-making process for key business operations.
- Collaborated with cross-functional teams to integrate a new API, resulting in a 30% increase in data accessibility and user engagement.

TOOLS: Python NumPy, panda, Matplotlib, plotly

## Project

### Real time Stock Market Data Dashboard

Description: This projects fetches live stock prices analyzes trends and provides visual insights using above mentioned tools.

- Integrated real time stock market APIs for live price updates
- processed and analyse stock data using Pandas and NumPy for trend predictions.
- Built real time Interactive visualizations using Plotly and Matplotlib.
- Created an alert system using SMPP/smtplib(email/SMS notification) for price changes.
- developed streamlit dashboard for interactive real time data monitoring.
- Optimized API calls to reduce latency and improve data fetching efficiency.

## Roles and Responsibilities

- Developing and maintaining python based application and software
- Writing clean and efficient code using python language
- participating in code review and provide constructive feedback to peers
- working with project manager and stockholders to understand and analyze project requirement
- troubleshooting and resolving issues and bugs in python code
