

ANAND MISHRA

QA Engineer (Automation + Manual)

Bangalore, K.A | Ph no: +91 8447593301| Email: ananddeb1895@gmail.com| LinkedIn: [Anand](#)

Key Skills	Ratings
Automation and Manual Testing	3.3 Years
Postman	3.3 Years
API Testing	3.3 Years

PROFILE SUMMARY

I am a highly skilled **QA Engineer** with **3+ years of experience in Automation and Manual Testing**, specializing in **Selenium with Python**. Proficient in designing, developing, and executing automated test scripts, ensuring software quality across diverse applications. **Strong expertise in Python programming, Selenium automation, and .NET environments.**

WORK EXPERIENCE

THE METROMAX GROUP

Bangalore, K.A
Dec 2021 - Present

PROJECTS

SCOPELY

- Performing requirement feasibility analysis and identifying test scenarios/test objectives.
- **Worked in a complete Agile Environment with 4 weeks of the release cycle.**
- Identifying end-to-end test cases, regression suites, and system test cases.
- Created a traceability matrix to ensure 100% test coverage.
- Documented test cases and test scripts and maintained the bug reports using Microsoft Excel.
- Performing mobile testing on iPad, Android, and iOS devices using (**LambdaTest tool**).
- Responsible for the sanity and smoke test.
- Conducted cross-browser testing with Safari, Google, and Firefox.
- **Used POSTMAN and REQUESTLY for rest service testing.**
- **Implemented automated test script using Selenium WebDriver and Python (RPA) to perform regression testing for the web application.**
- **Utilized Jira for test case management, defect tracking, and reporting.**

FLEETDRIVE360

- Worked single-handedly as a manual test engineer to develop test cases and prioritize testing activities.
- Following the agile methodology to constant collaboration with stakeholders and continuous improvement at every stage.
- Test Case Writing/Designing
- **Raised Bugs and tracked them until Closure in 'JIRA'.**
- **Execute automated test scripts & troubleshoot failed test scenarios.**
- **Execute test cases, identify the defects, report to developers, and track defects till closure.**
- **Developed API test cases using POSTMAN to validate the RESTful APIs and ensure the data integrity.**

METRO-TMS

- Escalating issues and reporting to Scrum Master/Developer.
- Work directly with the developer team to fix defects.
- **Actively and independently acquires and analyses data for software process evaluation and improvements.**
- Performs both back-end system and front-end UI triage and troubleshooting when identifying defects.
- Determine manual test cases that are candidates for QE/functional testing.
- Verified Fixed Issues.
- **Utilized JMeter for load testing to simulate concurrent user interactions and identify performance bottlenecks in the application.**
- **Utilized Jira for test case management, defect tracking, and reporting.**

KLM Loyalty App (Mobile application):

- Escalating issues and reporting to Scrum Master/Developer.
- Work directly with the developer team to fix defects.
- Played a key role in testing and ensuring the quality of a cross-platform expense tracker mobile application.
- Conducted comprehensive testing to identify and report defects, ensuring the app's functionality and performance met user expectations across iOS and Android platforms.
- Developed test plans, test cases, and test scripts to validate the functionality and performance of the mobile expense tracker

app.

- Executed manual tests to identify defects and verify fixes, collaborating closely with developers to ensure timely resolution.
- Conducted compatibility testing across various mobile devices, screen sizes, and operating system versions to ensure a consistent user experience by using **(LambdaTest and Browser Stack)**.
- Identified and reported critical defects during testing, leading to their resolution and improved app stability.
- Contributed to achieving a high user satisfaction rating and positive feedback on app store reviews.
- Used Jira for test case management, defect tracking, and reporting.

PAYTM

Technical Support Engineer

NOIDA, UP
Nov 2018 – July 2020

- Taking ownership of customer issues reported and seeing problems through to resolution.
- Coordinated with different teams to gather the requirements on the issues.
- Provide initial responses or resolutions to the merchants.
- Helping the client's customer team via email in resolving about 25+ issues in a day.
- Providing Technical support /debugging of live issues.
- Performing sanity check for the services.
- Prepare data and information for making the regular report.

TECHNICAL SKILLS

Automation Testing – Selenium WebDriver, PyTest, Unit Test, Robot Framework
Programming – Python (3+ years of hands-on experience), .NET (basic understanding)
Manual Testing – Functional, Regression, Smoke, Sanity, UAT, Exploratory Testing
Test Frameworks – PyTest, Robot Framework
Test Planning & Execution – Writing test cases, executing test plans, and reporting defects
Bug Tracking & Reporting – Jira, TestRail, HP ALM, Bugzilla
CI/CD & DevOps – Jenkins, GitHub Actions.
API Testing – REST API testing using Postman, Requests library in Python)
Version Control – Git, GitHub, Bitbucket
Agile Methodologies – Scrum, Sprint Planning

EDUCATION

SKYLINE INSTITUTE OF ENGINEERING & TECHNOLOGY, GREATER NOIDA
 Bachelor of Technology, Computer Science & Engineering

GREATER NOIDA, UP
 Aug 2014-July 2018
