[QA Automation Engineer and System QA](#)

I am looking forward to working in an organization, which provides the environment for growth with competent and strong leaders in Manual and Automation Testing. I have an urge and inclination for learning new technologies, a strong work ethic combined with a commitment to excellence in all projects undertaken.

Executive Digest

- Having 3 years of experience in software Testing which includes both **Manual and Automation Testing**
- 3 years of Experience in Test automation using Selenium tool with **BDD-Cucumber/TestNG** framework.
- 2 year of experience in test automation using **Appium tool** with **Java-TestNG framework**.
- 1 year of experience in Playwright Automations using Typescript/JavaScript
- Proficient in developing and maintaining automation scripts from scratch.
- Good at designing Test Cases for Functional Testing, Regression, and Smoke Testing
- Strong at executing Test Execution of functional, regression, sanity, exploratory, smoke Testing, and GUI testing.
- Good Experience in Payments, Authentications, Gaming payments, E-Commerce domains, Job Card management domains.
- Experience in Social media, E-commerce, CRM, HRM applications
- Extensive Understanding and application of **STLC, SDLC** and **Agile** methodology across various project stages
- Smart and proactive at defect findings and logging to **Meta Task tool/Azure DevOps /JIRA Tool**
- Strong Experience in **Agile and Scrum** methodology
- Known for quick adaptability and as valuable team player, excelling under tight deadlines and high pressure situations
- Experience with Test case management tool like **Azure Devops/Meta Task tool**
- Experience in **CI/CD Azure DevOps/Jenkins/GitHub Actions**
- Knowledge on **Playwright-JavaScript/Type Script** for Web UI automation
