Problem Solving

Trouble shooting

PyCharm

INTERESTS

WLAN

Network Security

WORK EXPERIENCE

Senor Software Engineer – WLAN & Automation Engineer

L&T Technological services -Bangalore

07/2022 - Present,

Achievements/Tasks

- Having 4.6 years of experience in Wi-Fi protocol testing on Mobile platform devices and Software Testing experience using Python and Robot Framework.
- Expertise in bug finding of different type of roam patterns and voice call with WLAN detailed packet capture analysis.
- Deep understanding and working experience on 802.11 standards 802.11 a/b/g/n/ac and 802.11ax/Wi-Fi6.
- Worked in Wi-Fi secure managements such as WEP/WPA/WPA2/WPA3-SAE/WPS.
- Hands on experience in working on cisco and other vendor security/wireless products: CISCO- WLC, Aruba-WLC.
- Written different python modules using scapy module to read and analyze packet captures.
- Excellent analytical, problem solving, communication and interpersonal skills along with a good attitude for learning.
- Raised Different bugs and worked along with Qualcomm and Synaptics team for Debugging and solving the issues.

ORGANIZATIONS

L&T Technologies Services (07/2022 - Present)

Senior Software Engineer

Tech well IT solutions (03/2019 - 06/2022)

Test Automation Engineer

PROJECT EXPOSURE

Wireless Insights (07/2022 - Present) - Zebra Technologies

- Wireless Insights is a full-functional real-time Wi-Fi-Analysis and troubleshooting tool to help analyze and resolve Wi-fi issues from a mobile device standpoint.
- Zebra Wireless Insights provides packet level data that is essential for troubleshooting and root cause analysis.
- Worked on Python Robot framework in development of scripts and bug fixing.
- Worked on Manual test case creation and Performed test case reviews.

5g Network Automation (09/2020-05/2022)

- Framework to perform execution of tests across multiple domains, including core network, RAN, and applications. Framework to support functional testing & validation.
- Reduces time to check the required parameter in the packet capture and informs which frame the required packet is present.
- Made modules generic and used variable files and robot file to run the module.

Bill Analyzer (Manual testing) (03/2019 - 08/2020)

- Bill analyzer is a web-based application used to postpaid customers for secure and easy access to their billing and using data over the internet.
- Understanding the business flow using functional specs.
- Creating the business scenarios in test plan module and Responsible for initiating status calls with client and for all status report.

EDUCATION

Bachelor of Technology

▣ Aditya Institute of Technology and Management, Tekkali.
07/2014 - 05/2018

Branch:

Mechanical Engineering - 7.63CGPA

Intermediate

▣ Sri Chaitanya Jr College, Srikakulam
05/2012- 05/2014 - 85.4%

CERTIFICATIONS

Complete Python Pro Bootcamp

- A certification course from Udemy
