Skills

- Responsive Web Design
- Optimization Techniques
- NextJS
- ReactJS
- Redux/Redux Tool Kit
- NodeJS
- ExpressJS
- MongoDB
- TypeScript
- JavaScript
- Bootstrap
- TailwindCSS
- Material UI
- Styled Components
- Html5
- CSS3
- SASS
- LightHouse
- Sentry
- ARIA(Accessibility)
- jest

Summary

Front-End Developer with **4.2** years of experience in creating responsive and user-friendly web applications using **ReactJS**, **NextJS**, and **Redux/Redux Toolkit**. Proficient in **JavaScript**, **TypeScript**, **HTML5**, and **CSS3**, I specialize in building scalable Single Page Applications (SPA) and implementing **Responsive Web Design** using frameworks like **Bootstrap**, **TailwindCSS**, and **Material UI**.

Experienced in backend integration with **NodeJS**, **ExpressJS**, and **MongoDB**, I ensure seamless frontend-backend communication. I follow accessibility standards with **ARIA** and maintain high code quality using tools like **Jest**, **React Testing Library**, **Lighthouse**, and **Sentry**. Skilled in version control with **Git/GitHub**, I thrive in agile environments, collaborating with cross-functional teams to deliver optimized and impactful solutions. I am committed to continuous learning and staying updated with modern front-end technologies.

Experience

Software Developer

Accenture | Hyderabad, 500090 | Nov 2020 - Current

- Coordinated with UX and UI designers to transform wireframes and designs into fully functional web applications that meet user expectations.
- Designed and implemented responsive web designs, guaranteeing optimal viewing experience across various devices and screen sizes.
- Developed and maintained high-quality, reusable JavaScript code for various web applications, enhancing user experience and interface efficiency.
- Utilized popular JavaScript library like ReactJS to expedite development processes and enhance application functionality.
- Implemented advanced JavaScript features, including ES6+ syntax and asynchronous programming techniques, to optimize application performance.
- Optimized web application loading times and performance by implementing efficient code, reducing server load, and improving user experience.
- Contributed to all phases of the development lifecycle, from design to writing and developing.
- Applied Agile methodologies to manage development projects, improving team productivity and project delivery timelines.
- Managed version control using Git, fostering team collaboration and maintaining a comprehensive record of code changes and updates.

- React testing Library,
- Git, GitHub

Education

Saveetha Engineering College
Chennai, IN-TN
Bachelor of Engineering:
Computer Science
2020

Projects

Accenture | Insurance Applications | New York Life Insurance

Developed a responsive customer portal for **New York Life Insurance** using **ReactJS**, **NextJS**, and **Redux Toolkit** to manage policies and claims. Designed seamless user interfaces with **TailwindCSS**, **Bootstrap**, and **Material UI**, ensuring cross-device compatibility. Integrated secure APIs with **NodeJS**, **ExpressJS**, and **MongoDB** for efficient data handling. Enhanced accessibility with **ARIA** standards and optimized performance using **Lighthouse** and **Sentry**. Written unit and integration tests with **Jest** and **React Testing Library** for quality assurance. Delivered a scalable solution in an Agile environment, streamlining policy management for users.

- Collaborated with cross-functional teams, including back-end developers, designers, and product managers, to develop user-friendly features for the **Insurance application**.
- Developed reusable and maintainable **ReactJS components** following best practices to enhance modularity and scalability.
- Managed state efficiently using **Redux/Redux Toolkit**, ensuring seamless data flow and real-time updates.
- Optimized application performance across devices using **Responsive Web Design**, **Lighthouse**, and best coding practices.
- Written comprehensive unit tests with **Jest** and **React Testing Library** to ensure code quality and functionality.
- Designed visually appealing, responsive interfaces with **TailwindCSS**, **Material UI**, and **Styled Components** to align with the application's branding.
- Enhanced accessibility with **ARIA standards**, ensuring inclusivity for all users.
- Integrated third-party services, including social media login and live chat functionalities, for improved user experience.
- Analyzed user behavior data to identify areas of improvement and implemented updates to optimize usability.

Accenture | Insurance Applications | BigBlue Cover

Worked on **BigBlue Cover**, a leading insurance provider, to revamp their online insurance application process with modern web technologies. Developed user-friendly and secure web applications using **ReactJS**, **Redux**, and **TypeScript** to streamline functionalities for car, health, and home insurance. Designed responsive and accessible user interfaces with **TailwindCSS**, **Material UI**, and **ARIA standards** to enhance the customer experience. Integrated **APIs** for policy management, premium calculations, and claim submissions, ensuring seamless data flow and secure transactions. Optimized performance and usability across devices using **Responsive Web Design**.

- Developed dynamic, responsive forms with **ReactJS**, **TailwindCSS**, and **ARIA standards** to collect user information for accurate insurance quotes and risk assessments.
- Built interactive dashboards for agents and customers using **Redux**, allowing efficient claims processing, policy management, and data access.

- Conducted unit testing with **Jest** and **React Testing Library** to ensure functionality, code quality, and accurate insurance calculations.
- Optimized application performance and accessibility across devices using **LightHouse** insights, **Material UI**, and best web development practices.
