Professional Summary

- Seasoned iOS developer with 9+ years of expertise in designing, developing, and deploying diverse applications for various clients. Skilled in team leadership and management, successfully guiding teams to deliver high-quality solutions on schedule.
- Developed diverse apps including Cuttly for home care, Bestest for social networking, Funeral for support, Deal Alarm for deals, Day Stay for hospitality, Hono's HRMS for workforce management, and Silent Beacon for as a remote control replacement, demonstrating versatility and problem-solving across various domains.
- Experienced in implementing payment gateways such as Stripe, Razorpay and Braintree for seamless in-app transactions.
- Skilled in utilizing frameworks like Alamofire for efficient network calls, reducing redundancy and enhancing performance.
- Proficient in local storage solutions using CoreData and SQLite, ensuring efficient data management and storage within iOS applications.
- Demonstrated ability to leverage mapping SDKs like Google Maps for navigation and location-based services, improving user experience.
- Proficient in integrating popular social media authentication services like Facebook, Google, and Twitter to enhance user login options.

Experience

HonoAI

May 2020 - Present

Senior SDE - iOS

Swift, SwiftUI, Obj-C, WebKit, Firebase, GraphQL, Apollo, Azure, Git, CodeMagic, MVVM

- Oversaw and directed a team of 5 developers in maintaining, enhancing, and developing the HonoAI, Pulse, and Gate iOS apps, ensuring seamless operation and continuous improvement.
- Spearheaded the implementation of the CI/CD pipeline for the company's codebase, resulting in a 30% reduction in deployment time and significantly streamlining development processes.
- Successfully led the migration of a legacy Objective-C project to Swift, enhancing code efficiency and maintainability, achieving a 95% reduction in the codebase.
- Implemented a new recruitment module, integrating GraphQL API using Apollo CLI.
- Developed a survey application utilizing Firebase backend, integrating push notifications and OTP authentication for secure login. Employed Autolayout, Storyboard, and Alamofire in conjunction with the MVVM architectural pattern. Implemented SSL pinning for enhanced security in the Survey Pulse project.
- Developed a separate GateApp for iPads, utilizing Vision Kit for face detection and Microsoft Azure for recognition, reducing attendance marking time to 4-6 seconds. Implemented an offline attendance marking system for enhanced reliability.
- Developed a new LMS Academy & Learning module within the app, leading to a 20% increase in sales for the app.
- Localized the app to support multiple languages(LTR and RTL), enhancing global accessibility and user engagement.
- Implemented multiple configuration-based attendance marking methods, including Geofencing, Facial Recognition, and QR code scanning.

Innovative Incentives to & Rewards Pvt. Ltd.

Jan 2018 - May 2020

Senior SDE - iOS

Swift, Obj-C, Stripe, MapKit, AVFoundation, APNS, Alamofire, WebKit, Lottie Animations, Git

- Led a team of three developers to create iOS apps—Apollo Edge, Shop4Hella, Hella E-Connect, Nerolac Connect—contributing significantly to the company's product portfolio with an 85% share.
- Implemented Stripe payment gateway for seamless user transactions across all applications, enhancing user experience.
- Streamlined network handlers by migrating from Obj-C to Swift, integrating Alamofire and URLSession, effectively reducing code length and enhancing performance.
- Implemented push notification functionality using APNS across all applications to notify users about order invoices, improving user engagement and experience. This feature ensured timely updates on orders, improving customer satisfaction and retention.
- Integrated Google Maps feature to facilitate delivery partners with route navigation support, ensuring efficient and reliable delivery operations.
- Utilized local notifications to remind users to finalize purchases, improving user engagement by 12% and encouraging timely actions within the application.
- Developed diverse functionalities enabling document selection and upload support.
- Leveraged Swift Package Manager alongside CocoaPods to seamlessly integrate multiple varieties to improve application functionality and versatility.

Impinge Solutions

Aug 2017 - Jan 2018

Senior SDE - iOS

Swift, Obj-C, XMPP, CoreData, Git

- Engineered Silent Beacon, an application serving as a versatile remote control for various gadgets including RC cars and geofencing taggers, ensuring effortless operation and control.
- Utilized CoreData to locally store form data, ensuring efficient data management and offline access within the application.
- Implemented XMPP server SDK for Bluetooth device communication, managing BLE device integration within the app for seamless connectivity and functionality maintenance.
- Developed and maintained socket-based connections for robust Bluetooth data exchange.

Mobilyte

Dec 2015 - Aug 2017

SDE 2 - iOS

Obj-C, Auth Services, Stripe, Background Tasks, CoreLocation, CoreAudio, MapKit, PDFKit, Git

- Developed multiple applications including Bestest, Funeral, Deal Alarm, and Day Stay for diverse clients, showcasing versatility in meeting varied client requirements.
- Utilized Twilio to implement chat functionality in Bestest and Deal Alarm applications, enhancing user interaction and communication features.
- Incorporated popular social media authentication services such as Facebook, Google, and Twitter authentication to meet client specifications and enhance user login options.
- Incorporated Dacast SDK into the Funeral app, enabling live streaming and chat functionalities, enhancing user engagement and interactivity during funeral proceedings.
- Implemented Google Maps SDK in Deal Alarm, enabling navigation for delivery personnel and live package tracking for users, enhancing the app's functionality and user experience.
- Extended functionality by integrating MapBox for offline navigation in Deal Alarm, ensuring reliable delivery tracking even in remote areas, enhancing user experience and service coverage.
- Deployed push and local notifications in Day Stay and Deal Alarm, confirming bookings and notifying users about enticing deals, enhancing user engagement and providing timely updates.
- Incorporated Stripe payment gateway for in-app purchases in Deal Alarm and Day Stay, facilitating seamless transactions and enhancing user experience with convenient payment options.
- Developed a MVC architecture-based boilerplate code for seamless REST API integration, effectively reducing code redundancy by 25% and streamlining development process.

- Crafted Cuttly app, offering diverse home care services, catering to various household needs with efficiency and convenience.
- Integrated widely used social media authentication services like Facebook, Google, and Twitter to fulfill client requirements.
- Implemented SQLite database for local storage, facilitating form data storage and diverse application functionalities, ensuring efficient data management and offline access.
- Incorporated Braintree payment gateway to enable in-app transactions for requested services, ensuring seamless and secure payment processing within the application.
- Integrated Google Maps SDK, enabling navigation functionality for service personnel, facilitating efficient travel routes and enhancing service delivery.
- Incorporated Alamofire to enhance network calls, reducing redundancy and improving versatility in network operations for efficient data retrieval.
