

ROHIT BHOJWANI

React Developer / Software Engineer

work.rohitbhojwani@gmail.com | +91 87676-07676

OBJECTIVE

Results-driven Frontend Developer seeking to leverage my skills in a challenging role to develop scalable, high-performance web applications.

Proficient in UI development using front-end technologies like **HTML**, **CSS**, **JavaScript**, **React JS**, **Redux** and **Typescript**.

PROFESSIONAL SUMMARY

- 4.2+ years of hands-on experience in frontend web development with **React** and **JavaScript** Frameworks.
- Strong experience in **HTML5**, **CSS3** and UI libraries like Tailwind and Material-UI.
- Hands-on experience with React Ecosystem - **Redux**, **Redux libraries**, Redux Toolkit, Hooks, Context API, and **React Router** for dynamic workflows.
- Hands-on experience with backend integration, **RESTful API** integration and JSON.
- Experience in Version Control with **GIT** and **Agile** methodology with **Scrum** and **Jira** Software.
- Familiar with modern frontend build tools as **Webpack**, **Babel**, **Parcel**.
- Familiar with **debugging** tools **React Dev Tools**, Chrome Dev Tools, Lighthouse and **React Profiler**.
- Understanding of **responsive design** principles and **performant** web application development.
- Experienced in writing unit tests with **Jest** and **React Testing Library**, as well as applying performance optimization techniques.
- Knowledge of **Node Js** and **Express Js** for RESTful API design and creation.
- Excellent communication and problem-solving skills.

EDUCATION

Bachelors of Engineering, Computer Science

RTM Nagpur University

SKILLS

React JS

JavaScript

TypeScript

HTML

CSS

Jest

Redux

Material UI

Git

TECHNICAL EXPERTISE

Expertise: HTML, CSS, JavaScript, TypeScript, React, Redux, Redux Toolkit

Knowledge: Node, Express, MongoDB, Jest, Webpack, Parcel

Experience: Git, GitHub, Agile, Dev Tools, Flux, React Profiler

WORK EXPERIENCE

Software Engineer at Zetaion Systems Pvt. Ltd., Bengaluru

August 2020 – Present

PROFESSIONAL EXPERIENCE

Client: Rex Airlines

Description: Rex Airlines is Australia's second-largest regional airline by the number of regional destinations, serving 45 regional destinations across Australia.

Responsibilities:

- Responsible for building different screens and UI components of GCHP module with **React** and **SCSS** styling.
 - Implemented **Redux** and **Context API** for cargo details, improving state persistence and minimizing API calls.
 - Applied optimization techniques using **React Hooks** and **React.memo** to prevent unnecessary re-renders in cargo lists.
 - Created dynamic navigation across different submodules with **React Router** and Navigate functionality, ensuring protected routes as per **Role-Based Access control (RBAC)**.
 - Wrote **Unit tests** for components using **Jest** and React Testing Library.
 - Ensured responsive layout for all pages with **Flexbox** with SCSS.
 - Integrated **JSON Web Tokens (JWT)** with **bcrypt** for password hashing, for secure Authentication and Authorization, ensuring safe access to cargo management features for end-users.
 - Maintained **TypeScript** safety and code quality using **ESLint** and **Husky**.
 - Managed version control with **Git** and **GitHub**, ensuring timely code reviews and issue resolution.
 - Engaged in **Agile/Scrum** routines, including stand-ups and sprint planning with Jira.
 - Provided technical leadership and mentorship to the junior team members.
-

Client: CMA CGM

Description: CMA CGM is a French shipping and logistics company. The company is headquartered at the CMA CGM Tower in Marseille, France, and is the third-largest container shipping company in the world.

Responsibilities:

- Developed a responsive document acceptance and verification module with **React** and **Styled Components**.
 - Utilized **Redux Toolkit** for global state of document status and verification.
 - Used **Redux Thunk** for async actions in document verification and approval.
 - Integrated **React Router** for navigation between document types and tracking pages.
 - Performance optimization of web app using **React Hooks** like **useCallback** and **useMemo** to prevent re-render.
 - Integrated with **RESTful APIs** for booking and compliance data, retrieve and update data for bookings, compliance status.
 - Optimized React components using **memoization**, **lazy loading**, and **code splitting**.
 - Adopted best practices in coding standards and performance.
-

Client: Zalando

Description:

Zalando SE is a publicly traded German online retailer of shoes, fashion and beauty active across Europe.

Responsibilities:

- Maintained UI components for seller fulfillment and warehouse module using React.
- Developed **Form components** for logistics submodule such as order details, shipping labels and warehouse selection, enhancing user experience.
- Used **React Hook Form with Yup** validation to implement client-side validation, ensuring data integrity and improving user feedback during form submission.
- Troubleshoot **CSS** and corrected misalignment using **Chrome Dev Tools** and testing responsiveness with **media-queries** and **Flexbox**.
- Participated in analyzing project requirement and conducting research tasks on given requirements to support the workflow.
- Collaborated on creating Schemas using **Mongoose** ORM for **MongoDB** database with team members.
- Applied accessibility standards for improved keyboard navigation and usability with **accessibility** standards.
- Used **Git and GitHub** for version control, regularly pushing code for reviews, investigating issues, and debugging errors for timely bug resolution.
