

Radhika R Shinde
Software Test Engineer
Email: shinde.radhika.11@gmail.com
Mobile:8073216557

Technical Skills

- A result-oriented professional having about 3 years of experience in Mobile Handset Testing, Functional Testing, Regression Testing, Sanity testing, Stability testing, black box testing, manual testing.
- Expertise in mobile application testing and device testing and web application testing.
- Experience in software engineering best practices like SDLC, STLC, Bug verification & validation and report generation, Bug life cycle.
- Experience in defining testing methodologies, designing test plans and test cases execution.
- Experience with agile software development.
- Experience in Bug Tracking Tool: Redmine, Jira.

Work Experience

Parent Company: Alp Consulting
Client Company: Sasken Technologies Limited
Designation : Engineer – App Software Test
Project 1 : Honeywell ,Kyocera
Duration : Nov 2019 to Oct 2022

Project Description:

Performing CTS (Compatibility Test Suite), GTS (GMS Test Suite), CTS Verifier, VTS (Vendor Test Suite), STS (Security Test Suite), CTS-ON-GSI, CTS Instant and Camera ITS on Honeywell and Kyocera devices.

Compatibility Testing is a type of Software testing to check whether your software is capable of running on different hardware, operating systems, applications, network environments or Mobile devices.

The CTS runs on a desktop machine and executes test cases directly on attached devices or an emulator. The CTS is a set of unit tests designed to be integrated into the daily workflow of the engineers building a device. Its intent is to reveal incompatibilities early on, and ensure that the software remains compatible throughout the development process.

Roles and Responsibilities

- Flashing the devices and performing CTS, GTS, CTS Verifier, VTS, STS, AOSP, CTS Instant and Camera ITS testing on Android M, N, O, P, Q and R.
- Perform Sanity Testing, Manual Testing and Functional Testing.
- Re-executing the failure test cases.

- Perform initial analysis of the failures and submits the issue to respective R&D team.
- Defect creation and tracking the defect in Jira and Redmine.
- Preparing the final report and uploading the test results in Jira and Redmine.

Project 2: Kyocera – Upgrade to Q

Role: Engineer – App Software Test

Client: Kyocera

Tools used: ADB, DL Tool, Droid DM Tool.

Project Description:

- Upgrading Android from P to Q for Kyocera devices like JA32, CB64 and NA26

Roles and Responsibilities

- Design and Develop test plans/cases for different components of Android
- Flashing new version of Builds & doing Sanity Testing on them.
- Performing feature complete, Integration testing, System and Regression testing
- Bug Logging & Tracking on Red mine.
- Interacted consistently with the developers and analysts to determine the types of testing required throughout the Bug Life Cycle (BLC).
- Involved in Camera, pedometer, weather, telephony, Clock, application framework.

Education

- Bachelor of Engineering –(Computer Science) 2014
- A.G Patil institute of technology, Solapur, Maharashtra

Personal Details

- DOB: 11 Nov 1990
- Marital Status: Married

Truth Declaration

I hereby to declare that all of the above information is correct & true to the best of my knowledge.

Place: Bangalore
