

RAHUL ASIREDDY

DATA SCIENTIST

SUMMARY

Data Scientist with expertise in machine learning, statistical analysis, and predictive modeling. Proficient in Python and SQL, with a strong focus on Generative AI and Large Language Models (LLMs). Skilled in prompt engineering and model fine-tuning to deliver scalable solutions that drive business insights and performance.

CONTACT

- 📞 9381998175

TECHNICAL SKILLS

- Python Programming
- MYSQL
- Data Visualization
- Statistical Analysis
- Machine Learning
- Deep Learning
- Natural Language Processing
- Computer Vision
- LLMS
- LLAMA
- Text Generation
- Transformers
- Prompt Engineering
- Prompt Design and Optimization

CERTIFICATIONS

- Nasscom Data Science
- Nasscom Python Fundamentals
- Machine Learning with Python(IBM)

AWARDS

- Awarded Generative AI with LLMs certification --- coursera

WORK EXPERIENCE

Cyient Limited | Data Scientist

Hyderabad

Mar 2024 - present

Project : Multi-Lingual Sentiment Analysis Using GPT and Large Language Models (LLMs)

- Developed a multi-lingual sentiment analysis tool using a GPT-based LLM, achieving 92% accuracy in sentiment classification.
- Utilized a GPT-based LLM for enhanced context understanding in multilingual data, allowing sentiment analysis with minimal labeled data, leveraging few-shot and zero-shot learning capabilities.
- Created a preprocessing pipeline leveraging tokenization and data augmentation specific to multi-language text, reducing preprocessing time and optimizing model performance.
- Deployed the model as an API using FastAPI, enabling scalable, real-time sentiment predictions accessible through a web interface developed in Streamlit.
- **Technologies used :** Python, Large Language Models(GPT), Fast API, streamlit

Jotter.AI Private Limited | Data Scientist

Hyderabad

Sep 2022 - Feb 2024

Project : Automated Catalogue Generation using Draping System

- Implemented texture transformation from mannequin models using a Pose and Segmentation network, enabling accurate fitting of clothing on virtual models.
- Designed and developed a novel strategy for image extraction and matting that achieved 95% accuracy on high-resolution images (up to 6000x6000 pixels).
- Ensured seamless integration of high-quality images for enhanced visual representation of apparel.
- Optimized the system for automated catalog generation by refining image processing techniques, leading to efficient and scalable apparel display.
- Contributed to reducing operational costs and time-to-market by replacing manual photoshoots with AI-driven solutions.
- Ensured precise draping and presentation of apparel items, providing retailers with visually accurate and engaging product catalogs.
- Helped improve customer experience and online shopping accuracy, reducing the rate of returns and increasing sales
- **Technologies used :** Python, Computer Vision, Open CV, TensorFlow, R-CNN

Pharma Engineers Private Limited | Junior Executive Projects

Cherlapally

2020 Mar - 2022 Aug

- Preparing the preliminary P&I drawings (Piping & Instrumentation Floor Layout)
- Project Commissioning and validation
- Technical Documentation and Presentation
- Checking the performance of AHU's Calibration
- Validating the balancing of CFM's (Cubic feet per minute) for rooms

EDUCATION

Malla Reddy Engineering College

Bachelor of Technology in (9.07 CGPA)

Medchal, Hyderabad

2016 Jul - 2019 May
