

M.Yaswanth
Embedded Software Engineer
Mobile: +91-8121165763
Email: yashwanthm951@gmail.com

CAREER OBJECTIVE

Looking for an exciting software development opportunity where I can apply my skills and methodologies to drive the company's success, while also realizing my own career aspirations

PROFESSIONAL SYNOPSIS

- Professionally Skilled in different programming languages like C / C++ and Embedded C.
- Development of instrument Embedded software including GUI (Linux based) applying Qt.
- Strong exposure on Embedded Application design with multithreading, Socketing & IPC.
- Proficient in working with various communication protocols [TCP/IP, UART, SPI & I2C].
- Adept at working with database, including SQLite, to manage and manipulate data efficiently.
- Familiar with Operating systems, Design Patterns, Communication protocols.
- Design, build, and maintain efficient, reusable and reliable C++ code.
- ARM architecture design and Development for Embedded software development.
- Highly adaptable and quick to learn new technologies and tools.
- Strong in identify bottlenecks and bugs, and devise solutions to these problems.
- Proficient in a variety of SDLC & methodology including Agile.

PROFESSIONAL EXPERIENCE

- Working as an Embedded Software Engineer with 3+ Years of Experience in Future Nine Information Technologies Pvt. Ltd., from Oct 2020 to Till Date

SKILLS SUMMARY

Programming	:	C, C++, Embedded C, MATLAB
Operation systems	:	Linux / Windows
Processor Programming	:	8/ 16/ 32 Bit
Development Tools	:	QT-creator, Keil, Gcc, G++, Proteus.
Protocol /Driver	:	I2C, SPI, UART & TCP/IP
Database	:	SQLite-3

PROJECT SUMMARY

PROJECT

Project	:	Touch Based Frozen Beverage Delivery Mechanism
Role	:	Developer

Environment : QT-Creator, Embedded C++, Linux (UBUNTU)
Description :

Our system meets current trending technology to provide better experience in serviced industry. It pours drinks just right, making serving easy. To view the Sales and Operated details are saved in database individually. Implemented client-side frontend validations for enhanced user experience and data accuracy.

Responsibilities:

- Develop and maintain the automatic soda dispensation mechanism.
- Implement glass size-based soda dispensing logic for small, medium, and large cups.
- Create a secure and efficient database for storing sales and operational data.
- Integrate client-side frontend validations to ensure a smooth user experience and data accuracy

PROJECT #

Project : ARM Based Swift & Secure Data Transfer System
Role : Programmer
Environment : QT-Creator, Embedded C++, Linux (UBUNTU)
Description :

This application enables users to efficiently include real-time data, input validation, duplicate checking, and a user-friendly interface. Implemented a secure socket connection to transmit data to a server, ensuring smooth data synchronization.

Responsibilities:

- Responsible for designing, developing, and maintaining the application. Implement real-time data handling and input validation features
- Integrate duplicate checking mechanisms into the data processing workflow.
- Conduct regular testing, debugging, and optimization of the application
- Stay updated on emerging technologies and best practices in software development
- Set up a secure database to store product information safely(SQLite)

PROJECT #3

Project : Monitoring the feedback of Furnace in Display Screen
Role : Developer
Environment : Embedded c, Keil, Proteus
Description :

We have to monitor how well a furnace is working and show the information on another screen. By connecting this to the furnace controls, we can give constant updates that make the furnace work better and our production smoother. Come help us use technology to make our furnace process smarter

Responsibilities:

- Spearhead debugging efforts, promptly delivering resolutions and enhancements for software issues.
- Generate extensive documentation encompassing technical specifications, user manuals, and release notes.
- Promote knowledge-sharing and foster collaborative learning within the team.
- Ensure seamless and real-time data updates from the furnace

EDUCATION AND CREDENTIALS

- SSC With Board Of Secondary Education from Nalanda Vidya Bhavan High School, Hyderabad
- INTERMEDIATE(M.P.C) With State Board Intermediate Education, NRI junior Collage Hyderabad
- BTECH in Mechanical Engineering From RRS College of Engineering and Technology. Engineering and sciences Affiliated to JNTUH

PERSONAL VITAE

Date of Birth : 24th Nov 1995
Languages Known : English, Telugu and Hindi
Marital Status : Single

I hereby declare that the above mentioned particulars are true to the best of my knowledge and belief.

Date:

Place:
