

YOGA NARASIMHA B K

Designation : Software Engineer
Current Company : **Cyient Ltd.**
Total Years of Exp.: 3 Years
Email ID: yoganbk@gmail.com
Contact No : **9066515176**

1. Profile:

To obtain a challenging position as an Embedded Engineer, leveraging my 3 years of experience in developing, and testing embedded systems. I am eager to work in a collaborative environment, tackling complex challenges and delivering high firmware solutions to drive technological advancements.

2. Key Skills:

Domain : Internet of Things (IoT)
Work Area : Embedded C Development, Linux Internals
Tools : Keil Compiler, Serial Window, Logic Analyzer, STM32CubeMX, CRO, Soldering, Multimeter
Linguistic Skills : English, Kannada, Hindi

3. Academics:

Degree	Specialization	University/ Board	Year of Passing
Bacheolar of Engineering	Electronics & Communication	Vishveshwaraya Technological University	2016
Pre- University Education	Physics, Chemistry, Mathematics, Electronics	Department of Pre-University Education, Karnataka	2011
Secondary School Leaving Certificate	Secondary School Leaving Certificate	Karnataka State Secondary School Education Board	2009

4. Employment Scan:

Organization	Designation	Duration
Cyient LTD	Software Engineer	01-Sep-2023 to till date
HRT Technology	Embedded System Developer	01-Mar-2021 to 31-Aug-2023

5. Professional Experience:

- a. **Department: Embedded Development (AUTOSAR Training)**
Duration: 01-Sep-2023 to Till date
Designation: Software Engineer
Roles & Responsibilities: AUTOSAR Training & Cyient's Internal Project
- b. **Department: Embedded Development**
Duration: 01-Mar-2021 to 31-Aug-2023
Designation: Embedded System Developer
Roles & Responsibilities: Embedded C Development, Debugging, preparing project Documentation, Reading Reference Manuals, Schematics & Datasheets.
Tools Used: Keil Compiler, STM32CubeMX, Serial Window, Logic Analyzer, CRO

6. Key Projects Executed:

- 6.1 Customer:** Oryana Ventures
Country: Japan
Duration: 01-March-2023 to 31-August-2023

Project: Water Quality and Quantity monitoring in Water Tanker System with data reporting to virtual database.

Project Objective:

Maintainance & monitoring water quality in water tanker system with water dispensed quality and quantity measurement and data updating using GSM module to cloud database and in customer's application.

Role: Embedded C Developer

Responsibilities:

Interfacing peripherals like pH & TDS, water sensors, Bluetooth module with micro-controller development board, implementing communication protocols and participating in low level system design.

- 6.2 Customer:** Oryana Ventures
Country: Japan
Duration: 01-May-2022 to 31-Dec-2022

Project: Automated Sewage Water Treatment Plant

Project Objective:

Automating Sewage Treatment plant operations eliminating human intervention by switching motor controls in each tank when met with set parameters.

Role: Embedded C Developer

Responsibilities:

Interfacing peripherals like Temperature & Humidity sensors with micro-controller development board, implementing communication protocols, low level system design & preparing project documentation.

- 6.3 Customer:** Oryana Ventures
Country: Japan
Duration: 01-August-2021 to 28-February-2022

Project: Hydroponics Nutrient Solutions Quality Monitoring & Maintainance System.

Project Objective:

Automated Nutrient Solutions Quality monitoring & maintainance system in Hydroponics plants using water sensors to frequently check nutrient solution quality and feeding plants with different nutrient solutions at regular intervals to ensure quality crop yield.

Role: Embedded C Developer

Responsibilities:

Interfacing peripherals with micro-controller development board, implementing communication protocols like MODBUS-RS485, I2C, UART, SPI, low level system design & preparing project documentation.

7. Previous Experience:

- a. **Company:** HRT Technology
Duration: 01-March-2021 to 31-August-2023
Designation: Embedded System Developer
Roles & Responsibilities: Embedded C Development, Debugging, Prepared project Documentation, Reading Reference Manuals, Schematics & Datasheets
Tools Used: Keil Compiler, STM32CubeMX, Serial Window, Logic Analyzer, CRO
