Objective:

To seek a challenging position demanding all my skills to explore and adapt myself in different fields and to make the most of technical background, customer focus, passion, Industry expertise with leadership skills and contribute to the development of organization with impressive performance and initiatives.

Career Highlights:

- 14+ years of industry experience, strong innovative and technical background
- 5+ years of experience in cloud services.
- 9+ years at SHIMAS Networks Pvt Ltd as IT Manager/Lead, during this time I was part of Implementing and administration of Web, Email hosting and LAMP stack.
- 1.6 years with Wipro Technologies (Future Focus InfoTech Pvt Ltd) with deep expertise in Amazon's cloud computing offerings and as AWS Solutions Architecture, JIRA L3/SME
- Public speaker at Kaushalya Bhagya (Skill India) across Karnataka
- Consulting and Implementation, Handling various IT Infrastructure cloud and non-cloud setup, Project Management, JIRA, Confluence, Bitbucket setup and administration.
- Excellent communicator and good listener.
- Enthusiastic learner who quickly grasps concepts and technical skills.
- Proven ability to create and deliver solutions tied to business growth, organizational development.
- Skilled problem identifier and troubleshooter comfortable managing systems, projects and teams in a range of IT environments.
- JIRA, Confluence and Bitbucket installations and plugin configuration.
- Installed, Configured, Maintained and administered the Atlassian suite.
- Migrated JIRA from 5.x to 6.x/7.x and Supported it for 24/7
- Migrated Confluence from 5.4 to 5.9/5.10 and Supported it for 24/7
- Proficient Experience in AWS and Azure Infrastructure
- Extensive experience in installing, configuring, troubleshooting, maintaining, implementation, and support on Redhat Linux, CentOS, and Ubuntu.
- Experience on working with VMware ESX server, vSphere, VMware Workstation, Virtual Box and Redhat KVM.
- Proficient knowledge on DevOps CI tools – Jenkins, CM tools- Ansible
- Proficient in handling all Sev1, Sev2 and Sev3 escalations and solving End-Client issues
- Preparation of RCA report on High severity and Escalation incidents, preparation of weekly & Monthly report for team.
- Mentoring juniors and closely monitoring the task till completion.

Experience Summary:

Organization: IDC Technologies Pvt. Ltd (L&T Technologies Services, Deployed at client location)
Designation: Cloud Solution Architect
Duration: Jul-2019 to Jul-2020

Project: MediaFirst is a software-defined, media-optimized cloud-based service for the creation, management and delivery of next-generation Pay TV as a Software as a Service (SaaS) offering.

- Performing proactive service checks and monitor/triage application alerts, emails and phone calls to ensure appropriate priority and response.
- Trouble shooting application service issues from kibana logs.
- Monitoring and troubleshoot server health issues.
- Checking and troubleshooting Media First application services.
- Experience with ELK – Elasticsearch, Logstash & Kibana, Grafana, Moogsoft, Prometheus and consul
- Proficient in handling all Sev1, Sev2 and Sev3 escalations and solving End-Client issues
- Preparation of RCA report on High severity and Escalation incidents.
- preparation of weekly & Monthly report for team.
- Mentoring juniors and closely monitoring the task till completion.

Organization: HummingSOFT India
Designation: Principle IT Consultant
Duration: Jan-2018 to Jun-2019

In this role, As a Principle IT Consultant and deliverables function is largely customer facing with a strong technical angle, deep experience in AWS, software and systems architecture, IT infrastructure, security, and other relevant technical concepts. Working closely with customers and prospects to make them successful on any IT platform like AWS, Azure, Digital Ocean etc.. building scalable, fault tolerant, cost effective, and secure systems.

Key Responsibility:

- Experienced in designing cloud models for Infrastructure-as-a-service (IaaS), Platform-as-a-service (PaaS), and Software-as-a-Service (SaaS).
- Responsible for architecting, designing, implementing and supporting of cloud-based infrastructure and its solutions.
- Proficient in AWS services like AWS Organizations, VPC, EC2, Elastic Beanstalk, S3, EFS, S3 Glacier, EBS, RDS, IAM, Route 53, CloudWatch, CloudFront, Simple Email Service, API Gateway, Workspaces, Redshift, AWS Budgets.
- Experienced in creating and launching EC2 instances using AMI's of Linux, Ubuntu, RHEL, and Windows.
- Created NAT gateways and instances to allow communication from the private instances to the internet through bastion hosts.
- Used security groups, internet gateways and route tables to ensure a secure zone for organization in AWS public cloud.
- Used IAM for creating roles, users, groups and implemented MFA to provide additional security to AWS account and its resources.
- Migrations of AMI to multiple AWS Accounts.
- Install, upgrade, integrate and administer **Atlassian Tools: JIRA, Confluence, Service Desk.**
- Extensively worked on the RHEL, CentOS and Windows servers 2012 and Windows Server
- Migrated the JIRA, Confluence and Bitbucket applications to the higher and latest versions.
- Design and tailoring solution to various client and integrating with exciting infrastructure
- HLD\LLD Design and end to end building, deployment, Testing and delivering it
- Manage team members locally and in remote locations
- Troubleshooting and fixing errors common to Applications and Application servers
- JIRA project setup and migration.
- Design and implementation of new service monitoring infrastructure on AWS cloud for the client.
- Deploying AWS cloud services with end to end network configuration including VPC and VPN tunneling which is used for access levels.
- Full proof configuration of Load balancer with ELB and route 53(DNS configuration).
- Deploying EC2 in AWS cloud environment.
- Configuring auto scaling in AWS environment which will increase the efficiency so that at the time of maximum traffic also, infra doesn't gets effected.
- Help customers build scalable, resilient, and high-performance applications and services on AWS
- Having knowledge about object based storage in AWS environment i.e., Amazon S3, Glacier.
- Keeping AWS environment secure through AWS Inspector and monitoring the servers through Cloudwatch.
- Automatic ticket logging and notification through mail by SNS service.
- Created LAMP stack and installed wordpress on that. Even created e-commerce website that went live, for testing purpose.
- Configured SSO, workmail, workdocs, workspace in AWS environment.

Key Technologies and Skills:

- Expert-level knowledge of Amazon EC2, Amazon S3, Amazon SimpleDB, Amazon RDS, Amazon Elastic Load Balancing, Amazon SQS, and other services of the AWS family
- High-Availability, Fault Tolerance, Scalability, Database Concepts, System and Software Architecture, Security, IT Infrastructure, Virtualization and Excellent customer facing skills and communication skills

DevOps Project

- Installed & Configured Docker and GIT Client.
- Have knowledge about elastic beanstalk, codedeploy, codecommit, codestar, codepipeline.
- Installation of CHEF & PUPPET server using AWS Ops work service.
- Developed a PHP project with Elastic Beanstalk & Code pipeline.

Organization: Diya Systems (Mangalore) Pvt Ltd.

Designation: Team Lead/Sr. Linux Administrator

Duration: May-2017 to Oct 2017

Client: Endurance International Group (EIG) : Providing cloud presence solutions, online resources, security and business applications.

Key Responsibilities:

- Configure, monitor, troubleshoot and provide operational support for fast growing web-presence products distributed across various data-centers around the globe.
- Worked on Shell & Python scripting.
- Deployed and maintained the cloud based application environments running on OpenStack
- Configured Various Network services such as NFS, DNS, and Send mail, Exim in RedHat Linux and CentOS servers.
- Provide remote infrastructure support for SaaS, PaaS, IaaS products across globally distributed data centers.
- Set up health checks for systems & applications in monitoring tools like Zabbix.
- Troubleshoot and fix issue meeting SLA's and operational standards.
- Manage incidents and escalations as per policies/procedures to meet incident management and uptime SLAs.
- Providing RCA's for most problematic servers for the week and providing permanent resolutions on issues using JIRA tickets.
- Performed performance analysis using tools like prstat, mpstat, iostat, sar, vmstat, truss, Dtrace
- Initiate emergency maintenance as needed for failed/failing hardware (drives, RAID controllers, power supplies, etc).
- Managing Database MySQL Servers.

Organization: Future Focus InfoTech Pvt.Ltd (Wipro Technologies)

Designation: Sr. IT Consultant / SME - Atlassian JIRA Admin

Duration: Dec-2015 to May 2017

Client: Electronic Arts - Leading Gaming Company - Redwood City, California

Key Responsibility:

Worked as an L3 Linux and JIRA Admin, handling GDAS related tickets with the exposure of Ticketing tool - Service-Now and ITIL Process

- Install, upgrade, integrate and administer Atlassian Tools: JIRA, Confluence, Bitbucket and Testrail.
- Extensively worked on Installation and configuration of Red hat Linux 5/6/7.x, CentOS 5/6/7.x, on large distributed environment.
- Worked on Virtual Box, VM Ware and VSphere
- Hosted and Maintained all these applications on Azure/AWS
- Created and Managed the Application links between JIRA to other JIRA, Confluence and Bitbucket instances.
- Worked on High Availability, Failover and Disaster recovery of the JIRA, Confluence and Bitbucket applications.
- Performed performance analysis using tools like prstat, mpstat, iostat, sar, vmstat, truss, Dtrace
- Troubleshooted and Resolved most of the Application and server related issues with the help of logs and raised Atlassian Support Requests whenever is needed.
- Created and Managed the Whitelist in JIRA and Confluence applications.
- Created and Maintained the Email Handlers in all 25 instances of JIRA.
- Created and Maintained the Confluence Spaces and Pages with permission levels.
- Migrated large spaces (~80GB) from once Confluence instance to other successfully
- Provided the Atlassian Products Knowledge transfer sessions and training with demos to the Business.

- Installed Nagios and Zabbix on the Global Servers.
- Worked with OKTA Authentication for the single sign on of Atlassian products.
- Worked on BitBucket Projects, Repositories, Branches and their permission levels.
- Extensively worked on all the administrative options in JIRA, Confluence and BitBucket.
- Created and Managed the License database for all the Instances of JIRA, Confluence and BitBucket including their plugins to make sure none of the instances and their plugins will expire without our knowledge
- Upgraded all the plugins and applications (JIRA, stash/Bitbucket, confluence) on production. Troubleshooting and fixing errors common to Applications and Application servers
- JIRA project migration.
- Worked with Apache and Tomcat for application hosting and issue troubleshooting.
- Worked on Single Sign On and delegated access technologies (SAML and OAuth) for the JIRA, Confluence and Bitbucket applications.
- Checking daily ticket activity and responsible for working a queue of JIRA tickets to address system issues, user requests, JIRA upgrades etc. on a daily basis.
- Managing permissions for the Atlassian Tools including JIRA and confluence - project wide/space/repository access.
- Create comprehensive JIRA workflows including project workflows, screen schemes, permission schemes, notification schemes etc...'
- Installation and configuration of Testrail - A Webbased Test Management tool.
- Worked on AWS EC2, S3, RDS, Route 53 DNS, IAM, Load balancing, Auto-Scaling and Cloud Formation.
- Worked on Ansible for deploying applications.

Organization: SHIMAS Networks Pvt Ltd.

Designation: IT Manager/Team Lead/Sr. System Administrator/Technical Support

Duration: Dec-2004 to Jan 2014

Providing IT Infra Support, Consulting, Managing Web, Application Hosting and Email Solutions.

Key Contributions:

- Providing production support for end-user customers in a 24/7 environment, diagnosed and resolved problems associated with network connection, Email and Website issues.
- Maintain trouble ticket queue to the best of my ability. Prioritize and respond to tickets in a timely manner.
- Creating User accounts, Mail account, groups, printer etc
- Involved in Installations of operating systems, patches, hardware, vendor software packages, system customization
- Involved in Setting up labs from scratch, testing hardware, installing and configuring various hardware devices like printers, scanners, modems, network and communication devices.
- Handling Domain name registration, renewals and Transfer requests.
- Research, analyze and develop recommendations for new technologies, focusing on Free and Open Source Software.
- Ensuring long term problem resolutions and customer satisfaction.
- Involved in Configuration of DHCP, DNS, NFS and Creating, troubleshooting and mounting NFS File systems on different flavors of Linux
- Scheduling and execution of planned infrastructure changes and events.
- Delegating work and supervising the activities of junior IT staff.
- Monitoring the health and stability of Linux and Windows System environments.
- Involved in troubleshooting and fixing the issues related to End user and application, Email and Website problems.
- Working 24/7 on call for application support and system/Server support
- Implemented and Extensively working on Ticket tool -Help Desk.

Organization: Pyda Computers
Designation: Customer Support Executive
Duration: Jan-2004 to Dec 2004

Key responsibilities:

- Providing support for the issues related to basic Hardware & Networking, Outlook and VPN
- Worked on Installation, Configuration & Upgrade of operating systems Linux, CentOS and Windows 2000
- Creating User accounts, Mail account, groups, printer etc
- Involved in Installations of operating systems, patches, hardware, vendor software packages, system customization
- Involved in Setting up labs from scratch, testing hardware, installing and configuring various hardware devices like printers, scanners, modems, network and communication devices.
- Troubleshooting of Operating System and Network related issues
- Operating System related issues and Registry Issue
- Involved in troubleshooting and fixing the issues related to End user and application problems.
- Third party applications like MacAfee, Norton, and IE issues

Skill Set Summary

Cloud Technologies: Amazon Web Services, Azure and GCP.

- Good awareness of DevSecOps, Agile methodologies, CI/CD, and tools like Azure DevOps, Jira
- Responsible for architecting, designing, implementing and supporting of cloud-based infrastructure and its solutions.
- Proficient in AWS services like AWS Organizations, VPC, EC2, Elastic Beanstalk, S3, EFS, S3 Glacier, EBS, RDS, IAM, Route 53, CloudWatch, CloudFront, Simple Email Service, API Gateway, Workspaces, Redshift, AWS Budgets.
- Created NAT gateways and instances to allow communication from the private instances to the internet through bastion hosts.
- Used security groups, internet gateways and route tables to ensure a secure zone for organization in AWS public cloud
- Used IAM for creating roles, users, groups and implemented MFA to provide additional security to AWS account and its resources.
- Implemented domain name service (DNS) through route 53 to have highly available and scalable applications.
- Migrations of AMI to multiple AWS Accounts.

Technical Skill Set

Cloud Computing	AWS, Digital Ocean, Azure, GCP
Operating Systems	Linux (RedHat, CentOS, Ubuntu), Windows 98/XP/2k3 and Windows 7
Mail Server	Mdaemon, Sendmail, Postfix, Exim, Qmail
Database	MySQL, Postgres, MongoDB
FTP	Proftp, VSFTP, Filezilla
Web Server	Apache, IIS, Nginx, Tomcat
Firewall	Ipfire, pfSense
Programming	Bash and Python
Dev and Monitoring tools	JIRA, Confluence, Bitbucket, Azure DevOps, Jenkins, SVN, GIT, WinSCP, postman, ElasticSearch, Logstash, Kibana (ELK), Grafana, Moogsoft, Consul, Zabbix

Atlassian JIRA administrator

- Expertise in complex JIRA configurations including configuration of Advanced Workflows, Custom field configurations, Screen Schemes, Permission schemes and Notification schemes.
- Performed application and system administration tasks including data backups.

- Integrated JIRA with Confluence using plugins.
- Installed and configured plugins like portfolio, Aha! script-runner, Testrail and Tempo plugins in JIRA.
- Successfully integrated various applications via web hooks in Jira with Bit bucket, Testrail, Slack, confluence Servers.
- Worked on JQL filters, Dashboards, Gadgets.
- Synchronizing Jira production data with Dev environment.
- Managing user permissions for tools according to the needs of projects and teams.
- Providing support for L3 and SME category
- Successfully Tested and deployed new versions of the tools JIRA, Confluence, Bitbucket, Testrail and plug-ins to ensure compatibility.
- Performed deployment operations on DEV, UAT, PROD Environments.

Linux Server Administration

- Good in finding root cause of issues raised incidentally / accidentally and implementing solution with proper planning.
- Installing servers (Web, Mail, DNS, MySql, Ftp, Samba, NIS, NFS, DHCP, LVM, RAID), Server Administration.
- Backup and Copy Tools – RSYNC, SCP, TAR, GZIP.

Infra Technical Support/Troubleshooting

- Conducting Periodic reviews with the customer and analyze calls and their trends to take proactive measures to reduce knowledge-based calls.
- LAMP and Tomcat Support
- Webhosting panels, cPanel/WHM, WHMCS.
- Setup Linux/Windows based Email Servers for SME's.
- Installation and configuration of Zabbix and Administration
- Setup and configure PfSense Firewall

Academic Qualifications

- B.Tech in Computer Science, from Karnataka State Open University - 2015.
- Diploma in Computer Science & Engg from Karnataka Department of Technical Board in 2011.
- SSLC from VLS Vidya Sagar High School in 2000.

Certifications

- AWS Solution Architect - July 2018.
- Google Cloud Onboard - Fundamental Training - March - 2017
- RedHat Certified Virtualization Administrator (**RHCVA**) # 100-170-331 in Jul 2013.
- RedHat Certified Engineer (**RHCE**) #805010795647915, in Feb 2010.
- Advanced Diploma in Computer Hardware and Networking from Canara Bank Trust - Computer Training center for Urban Poor (**CTCUP**) in 2003.
