

AS**Adapa Sravanthi**
Embedded SW TEST ENGINEER

adapa.sravanthi.official66@gmail.com

(+91) 8688706863

OBJECTIVE

Testing Intermediate in a Functional Testing Domain looking for an innovative, challenging, growth oriented and responsible career ahead

EXPERIENCE

Embedded SW TEST ENGINEER • Veoneer**Product:** RADAR (ECU) (ADAS)**Client:** Honda**Strategy:** Manual and Automation Test Execution

SKILLS

Operating System:

Windows
Linux

SDLC:

- V-Model
- Waterfall model

Test Methods:

- HW in loop(HIL)
- Delta Testing
- Smoke Test
- Regression Testing
- Automation Test

- Applied ISO 14229 (UDS) for diagnostic communication, ensuring compliance with automotive industry standards.
- Utilized ISO 14229 for communication between external diagnostic tools and electronic control units (ECUs).
- Played a key role in troubleshooting and debugging diagnostic issues, leveraging expertise in the ISO 14229 standard.
- In my role, I extensively utilized IBM DOORS to ensure comprehensive traceability throughout the software development lifecycle
- Specifically, I implemented a robust traceability framework to verify that all project requirements were meticulously covered.
- This involved linking requirements directly to test cases within IBM DOORS, facilitating efficient tracking of test execution and validation.
- The traceability features of IBM DOORS were instrumental in maintaining alignment between project objectives, requirements, and test outcomes, ultimately contributing to the overall success of the development process.
- Development of Functional Test cases from software Requirement's document.
- Integrated Functional testing activities.

Tools

- CANOE
- WINIDEA
- GIT Bucket
- Doors
- Jira
- Danview
- Drive Scope
- **Model Desk**
- **Motion desk**
- **Control desk**
- Hill testing

Protocols

- CAN
- UDS
- XCP
- SPI
- I2C
- UART

Programming Languages

- Embedded C
- CAPL
- C++

Know Hardware

- I system Debugger
- CANOE
- Radar ECU

- Creating the synthetic recordings based on configurations (Angle resolution, elevation angle, Fov, Resolution, angle resolution, Min range, Max range)
- Executing feature modules (**SDO, SID, LCA, BSD, STRK, CTRK.**)
- Executing the files in Jenkins using CI/CT tool. **Generating Mat. Files Using SIMS(HIL)**
- Test Execution by understanding the scope on test bench (**HIL**).
- Creating and analyzing scenarios synthetic data using **DSPACE**, Motion desk, Model desk, control desk.
- Verifying and raising the Jira tickets & Reports preparation based on release.

TECHNICAL EXPERIENCE

- In addition to my proficiency with IBM DOORS for requirements traceability, I have hands-on experience in the Software Development Life Cycle (SDLC), specifically in the domain of integration testing
- Familiar with Functional and Non-Functional Testing Techniques.
- Hands on experience in tools like **Canoe, Dspace Model desk, Motion desk, Danview, Winidea.**
- Good understanding and working knowledge of Software Development Life Cycles (SDLC) - V model.
- Having experience in Radar feature testing on features like BSD, SDO, LCA, CTRK, STRK and SID.
- Working knowledge on Configurations of radar like FOV, Resolution, angle resolution, range, Angle accuracy.
- Working knowledge on creating the synthetic data using DSPACE.
- Knowledge on CAN Protocol and UDS, XCP.
- Familiar with defining testing technique against the product
- product validation Familiar with defect analysis and report
- requirement Hands on Experience with test case execution and preparation
- Programming knowledge in C and Embedded C.
- Working Knowledge on Software in Loop (SIL).

PERSONAL PROFILE

GENDER:

FEMALE

DOB:

16-06-1999

MARITAL STATUS:

Single

LANGUAGE KNOWN:

English,
Kanada,
Telugu.

PERSONALITY TRAITS

Flexible
Team Player
Punctual
Agreeableness

ADDRESS

Talupurupadu(Vi),
Sangam(m),
Taravai(po),
Nellore (Di),
Andhra Pradesh

Ph: +91 - 8688706863

Project Experience

Project: RADAR (77GHz) -77GHz Rada

Employer : Veoneer- Magna International Bangalore, India.

Location : Bangalore, India

Designation : software Engineer

Industry : Automotive

Product : ECU – RADAR

Role: Currently working as software Engineer for RADAR team and involved in testing platform

Software Components (ECU) and Features (Blind spot detection, Safe door open, Line change

Assert, Stationary Tracker, Cluster Tracker). Synthetic data collection in virtual environmental (Dspace), configurations (Angle resolution, FoV, Range) Blockage Testing, Interference testing, SIL Testing.

Testing Methods: Feature Testing, Integration Testing, SIL Testing

EDUCATION

B.TECH 2021 SKR COLLAGE OF ENGINEERING & TECHNOLOGY

Specialization: ECE – 73.3%

Diploma • 2016 • SRI SIDDARTHA JR COLLAGE

MPC: – 67%

SSC • 2014 • ZPTC SCHOOL

General – 77%

DECLARATION: I hereby declare that all the information mentioned above is true to the best of my knowledge.

Signature
