SKILLS

Programming Languages	Python SQL
Technologies	AWS Azure AI/ML Gen AI LLM Transformers Statistical Inference EDA Deep Learning NLP CNN PEFT GANs CRF SVM TensorFlow Neural Networks Docker Kubernetes Terraform Scikit-Learn MLOps WebSocket REST CI/CD Git Bitbucket Flask fastApi

EXPERIENCE

Tata Consultancy Services <i>Systems Engineer</i>	May 2021 - Present <i>Bengaluru, KA</i>
- Collaborated with a cross-functional team of 8 to successfully deliver a critical project ahead of schedule, improving the efficiency by 30%. - Presented Proof of Concepts of Large Language Models on isolated systems, minimizing privacy risk to 10%. - Resolved a longstanding issue of memory and time usage of an ML Model dealing with a very large dataset dealing with code files, saving 70% of the time for inference. - Performed exhaustive researches to implement efficient solutions to complex problem statements, solving 90% of blockers. - Leveraged strong communication skills to facilitate smooth on-boarding of new members increasing their efficiency and capabilities.	
Techwalnut Innovations LLP <i>Machine Learning Intern</i>	Nov 2020 – April 2021 <i>Chennai, TN</i>
- Collaborated with a team of 5 to create a mobile application to identify different sheet samples for the client. - Implemented Image Classification using Convolutional Neural Networks. - Implemented application for Face Recognition and detection and landmarks detection.	

PROJECTS

Personal Assistant Bot <i>Gen AI Developer</i>	Tata Consultancy Services
- Independently built and documented POCs of different LLMs for Question-and-Answer Machine. - Performed PEFT fine-tuning and quantization on different LLMs to increase model efficiency and accuracy. - Developed pipeline using fastApi and Python Socket-IO to develop a chatbot. - Independently enhanced and implemented RAG pipeline for accuracy and real time query to the chatbot.	
Content Recommendation Engine <i>AI/ML Engineer</i>	Tata Consultancy Services
- Set up an NLP engine to recommend documents of the client with desired topics and assign topics to the documents provided by the client. - As a part of preprocessing cleaned and prepared the data using nltk and sklearn (scikit-learn) modules of python. - Vectorized the data and generated DTM and LDA models using sklearn modules. - Evaluated runs using MIFlow and performed hyperparameter tuning to increase accuracy.	
Low Code – No Code Studio <i>Python Developer</i>	Tata Consultancy Services
- Set up backend on python to generate Jupyter notebooks with pre-populated code lines according to the component selection by the user on the UI canvas in isolated environments on different docker containers. - Designed REST services and WebSocket using flask and Python SocketIO to create a pipeline for training, evaluation, inference and deployment of models. - Leveraged MLflow to maintain model lifecycle and enable reusability of the models.	

EDUCATION

Bachelors of Technology Computer Science and Engineering	Galgotias University, Noida 2017-2021
--	--

CERTIFICATIONS

AWS	CLF (Cloud Practitioner) DVA (Developer Associate)
AZURE	AI 900 (AI Fundamentals) AI 102 (AI Engineer Associate) DP 900 (Data Fundamentals) AZ 900 (Azure Fundamentals)
